Porter Ranch Resident

If my business had a leak or spill like SoCalGas I would be out of business so what gives them the right to stay in business? Just because they have the big bucks behind them! As a small business owner I know my consequences they do not! They are negligent and careless, those fields are antique and were not made for so called natural gas storage they were Getty Oil fields when I moved here! As a homeowner in Porter Ranch for the last 42 years they have disrupted our lives with sickness and chaos. We have had health problems over the years and never knew why and now we do. They need to be shut down and now! I never relocated and now they refuse to clean our home and we live within a mile of the well that blew! Don't let the big gas and oil companies rule over peoples lives! Please listen to the people that live here not the people who get money from SoCalGas!
