## **Please Keep Aliso Canyon Shut Down --**

My name is Jon Teboe. I am a fifteen year resident of Porter Ranch Estates. I live less than one half mile from the Aliso Canyon facility.

I attended the AQMD public hearing at CSUN on August 6, 2016. One of the board members asked that a professional who deals with methane poisoning speak at their next hearing.

The extreme symptoms I experienced last year from October to December 2015 ARE the classic symptoms of methane poisoning.

My symptoms were : extreme headaches, continuous severe heart palpitations, cognitive impairment, dizziness, loss of motor coordination, severe flu-like symptoms, lethargy, and severe stomach and gastrointestinal problems.

I went to urgent care four times. Because of the heart palpitations, I had to take tests to see if there was heart damage. And now I am on high blood pressure medication! I never had to take blood pressure medication until this catastrophe!

I still have NOT fully recovered.

SoCal Gas has not had my house professionally cleaned. I am still experiencing headaches and a dry cough.

My doctor doesn't know why or what's causing the dry cough; so he ordered chest X-rays. I am waiting for the results.

On August 6, 2016 the Aliso Canyon facility operations manager, under oath, testified that they are still finding leaks "an average of 2 a day" ! Let me repeat that - "an average of 2 a day."

That's over 700 leaks found a year, right?

When more gas is pumped in, MORE will escape. I will get more sick if this happens.

Please shut this leaking facility down permanently.

People are still getting sick.

With all the new housing developments MANY more people WILL get sick!

Please close the Aliso Canyon Facility permanently.

Thank you for allowing me to give my testimony today.

Sincerely,

Jon Teboe
