## **BACKGROUND**

On December 30, 2015, Applicant Mission Rock Energy Center, LLC (owned by Calpine Corporation) submitted an AFC to construct, own and operate an electrical generating facility in Ventura County, California, approximately 2 miles west of Santa Paula, near Highway 126. The facility would be a natural gas-fired, simple-cycle power plant comprising five combustion turbine generators (CTGs), with a combined nominal generating capacity of 255 megawatts (MW). Additionally, Mission Rock would house twenty (20) on-site ion battery units for the storage of electricity, providing an additional 100 MWhours (25 MW for up to 4 hours) of nominal capacity. The CTGs would also be fitted with clutch systems enabling synchronized condenser operation to provide voltage (Volt-Ampere Reactive or "VAR") support to the local grid without contemporaneous operation of the combustion turbines.
