Subject: **Phase I Environmental Site Assessment**
10711 Dale Avenue and 8230 Pacific Street
Stanton, California
AEC Project No. 16-148SD

Dear Ms. Miles:

Advantage Environmental Consultants, LLC (AEC) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) Practice E1527-13 Standard Practice for Environmental Site Assessment and 40 Code of Federal Regulations (CFR) Part 312, of the above-referenced property. This ESA included public environmental agency and historical record reviews, interviews, site observations, and report preparation. This report includes AEC's findings, conclusions, recommendations, and supporting documentation.

We appreciate the opportunity to be of service on this project. If you should have any questions regarding this report, or if we can be of further assistance, please contact us at (760) 744-3363.

Sincerely,

ADVANTAGE ENVIRONMENTAL CONSULTANTS, LLC

Daniel Weis, R.E.H.S.

1.0 Executive Summary

1.1 Summary and Findings

At the request of Stanton Energy Reliability Center, LLC, Advantage Environmental Consultants, LLC (AEC) has conducted a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of 40 Code of Federal Regulations (CFR) Part 312 Standards for Conducting AAI and American Society for Testing and Materials (ASTM) Standard Practice E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process of the 3.98 acre property located at 10711 Dale Avenue and 8230 Pacific Street in the City of Stanton, Orange County, California. The Site is situated to the west of Dale Avenue and to the south and east of the intersection of Pacific Street and Fern Avenue. The Site is comprised of three legal parcels identified as Assessor Parcel Numbers (APNs) 126-531-43 (10711 Dale Avenue), 126-531-40 (8230 Pacific Street), and 126-553-18. The western portion of the Site (bound to the west by the intersection of Pacific Street and Fern Avenue and to the east by the Stanton Storm Channel) is currently developed with a wooden garage building, an asphalt-paved parking area, an un-paved truck parking area, and a wooden pallet storage area. The western portion of the Site is currently occupied by a trucking company and a wooden pallet storage company. The eastern portion of the Site (bound to the west by the Stanton Storm Channel and to the east by Dale Avenue) is vacant and undeveloped land with the exception of a wooden power pole. The eastern portion of the Site is currently unoccupied. Surrounding areas are primarily utilized for commercial/light-industrial properties to the northwest, vacant and undeveloped land with power lines to the north and northeast, the Barre Substation and Peaker Plant to the east (across Dale Avenue), a railroad track with a self-storage facility to the south, and the City of Stanton Corporate Yard to the west.

A metal aboveground storage tank (AST) was observed in the central portion of the western portion of the Site adjacent to the northeast of the garage building. The AST was not labeled with regard to contents but appeared to be filled with used oil products. Moderate staining was observed on the unpaved ground areas in the vicinity of the AST and slight petroleum odors were noted in and around the AST area. Adjacent to the AST is a reported former underground storage tank (UST) area in an unpaved driveway area adjacent to the northeast of the garage building. The UST was reportedly removed in the past. In addition, multiple 55-gallon drums and plastic containers were observed in the central/western portion of the Site in the vicinity of the truck storage areas and in the northwestern portion of the Site where truck maintenance activities occur. The drums and plastic containers appeared to be partially filled with used oil products. Some of the containers were open and were observed to contain oil. Multiple areas of stained soil and pavement were observed in the western portion of the Site. The areas appeared to be from poor housekeeping, drum overfilling, leaking equipment, truck maintenance activities, and from oil leaks associated with tanker trucks stored on-Site.

AEC reviewed standard regulatory record sources which included Federal, State and local environmental databases provided by Ecolog Environmental Risk Information Service Ltd. (ERIS), for information pertaining to documented and/or suspected releases of regulated hazardous substances and/or petroleum products within specified search distances. The 8230 Pacific Street Site address was identified on the following regulatory databases:

- RCRA NON GEN - Able Degassing, Inc. is referenced on the RCRA NON GEN database as a used oil transporter of hazardous waste treatment and disposal and other non-hazardous waste treatment and disposal of ignitable and corrosive waste.

- UST - Bob's Towing is referenced on the UST database with no indications of a release or violations reported.
- FINDS/FRS - Able Degassing, Inc. is referenced on the FINDS/FRS database with a NAICS code description of hazardous waste treatment and disposal and other nonhazardous waste treatment and disposal. No further information was provided.
- CHMIRS - Geo Trans is referenced on the CHMIRS database for an incident on November 18, 2002 when 300-gallons of an unknown material was contained and removed off-Site under the oversight of the Orange County Emergency Management Division. No further details were provided.
- HAZNET - Valvo Services, Inc., Ziba Investment Corporation, and Able Degassing, Inc. are referenced on the HAZNET database for the off-Site disposal of waste oil and mixed oil and tank bottom waste in 2003, 2004, 2005, 2006, 2008, 2012, and 2013. No further information was provided.

Multiple ASTM and non-ASTM databases listings for adjacent/nearby off-Site properties were also mapped within specified search distances of the Site. These listings are not considered to be significant environmental concerns to the Site. This opinion is based on several factors including the nature of the regulatory database listings, distance of the off-Site listed properties from the Site, orientation of the listed properties relative to the Site, interpreted direction of groundwater flow, and/or regulatory case status information for the various properties as described in the database report.

Historical resources reviewed during the preparation of this ESA included aerial photographs and topographic maps. According to the historical resources reviewed, the Site appears as mostly vacant and undeveloped land with evidence of past agricultural uses remaining and possible hay piles on the eastern end. The intersections of Pacific Street and Fern Avenue with residential land uses are visible to the northwest and Dale Avenue is present to the east. A railroad track is visible to the south of the Site in the 1953 aerial photograph. In the 1963 aerial photograph, the Site appears to be vacant and undeveloped land with some vegetation with the Stanton Flood Channel visible crossing the central portion of the Site. In the 1972 aerial photograph, the Site appears to be partially developed with two structures, a cleared parking area, and a drainage ditch to the north in the western portion and vacant and undeveloped graded land in the eastern portion. In the 1980 aerial photograph, the western portion of the Site appears to be mostly vacant and undeveloped graded land with the drainage ditch visible in the north with the previous structures not visible. Also, in the 1980 aerial photograph, the eastern portion of the Site appears to be used for agricultural purposes. In the 1994 aerial photograph, the western portion of the Site appears to be partially developed with the current garage building and cleared truck parking areas in the western portion and the eastern portion of the Site appears to be used for agricultural purposes with several greenhouse structures also visible. In the 2003, 2004, and 2005 aerial photographs, the western portion of the Site appears to have been partially paved and used for truck storage with the garage building and mobile home building visible and with wooden pallet storage visible in the eastern portion of the western portion of the Site. Also in the 2003-2005 aerial photographs, the eastern portion of the Site is used for agricultural purposes with multiple large plots of trees and a greenhouse visible. In the 2009, 2010, and 2012 aerial photographs, the western portion of the Site appears to remain partially developed with a partially paved truck parking area, garage building, mobile home building, an unpaved parking area, and a pallet storage area and the eastern portion of the Site appears to be vacant and undeveloped and partially graded with several trees remaining in the 2009 aerial photograph and vacant in the 2010 and 2012 aerial photographs. Adjacent and nearby properties were mostly undeveloped in the

early 1950s. In the 1960s, scattered commercial/light-industrial development became evident in the area, followed by increased similar development from the 1970s through the present.

1.2 Conclusions

This assessment has not revealed any current recognized environmental conditions in connection with the Site. The former UST that was removed from the western portion of the Site (portion of the overall property to be leased from the existing landowner) is considered to be a historical recognized environmental condition in connection with the Site. In addition, during our reconnaissance of the Site, numerous containers of used oil and other chemical products were observed. Areas of stained soil and pavement were observed in the areas of several of such containers. Because such releases are likely surficial in nature, such releases are not considered to be recognized environmental conditions. However, because the Site is proposed for future development, including a building in its western area, AEC has advised Stanton Energy Reliability Center, LLC that the completion of a Phase II Environmental Site Assessment should be considered. The Phase II ESA would be conducted to evaluate the potential vapor intrusion exposure pathway (in to the future Site building) and to evaluate soil conditions in the western portion of the Site for potential contaminants of concern relative to future construction and soil management activities. Concurrent with this Phase I ESA, AEC completed the Phase II ESA, the results of which have been provided under separate cover. In summary, no significant environmental concerns were identified during the completion of the Phase II study.

2.0 Introduction

2.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) prepared by Advantage Environmental Consultants, LLC (AEC) is to provide a professional opinion on the presence of recognized environmental conditions and other suspect environmental conditions in connection with the Site, as they existed on the date of the site inspection, and to recommend whether further investigation is required. Recognized environmental conditions include Historical Recognized Environmental Conditions (HRECs) and Controlled Recognized Environmental Conditions (CRECs). 40 CFR Part 312 Standards for Conducting AAI and ASTM Standard Practice E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, define good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants pertinent to the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), as well as petroleum products. As such, this ESA is intended to satisfy one of the threshold criteria for satisfying the landowner liability protections to CERCLA liability assuming compliance with other elements of the defense. In other words, this ESA represents one of the practices that constitute "all appropriate inquiry" into the previous ownership and uses of the property consistent with good commercial or customary practice, as defined in 42 USC Section 9601(35)(B) and 40 CFR Part 312.

The goal of the process is to identify all environmental conditions and recognized environmental conditions, which are defined by the Practice as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. The term recognized environmental condition includes hazardous substances or petroleum products even under conditions in compliance with laws. In addition, the term also includes historical recognized environmental conditions and controlled recognized environmental conditions. A historical recognized environmental condition is defined by the Practice as "a past release of hazardous substances or petroleum products that has occurred in connection with a property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." A controlled recognized environmental condition is defined by the Practice as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." The term recognized environmental condition is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The term "environment" is defined in CERCLA 42 USC 9601(8) as "(A) the navigable waters, the water of the contiguous zone, and the ocean waters of which the natural resources are under the exclusive management authority of the United States under the Magnuson-Stevens Fishery

conservation and Management Act, and (B) any other surface water, ground water, drinking water supply, land surface or subsurface strata, or ambient air within the United States or under the jurisdiction of the United States.

The term "release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant), but excludes (A) any release which results in exposure to persons solely within a workplace, with respect to a claim which such persons may assert against the employer of such persons, (B) emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station engine, (C) release of source, byproduct, or special nuclear material from a nuclear incident, as those terms are defined in the Atomic Energy Act of 1954 [42 U.S.C. 2011 et seq.], if such release is subject to requirements with respect to financial protection established by the Nuclear Regulatory Commission under section 170 of such Act [42 U.S.C. 2210], or, for the purposes of 42 USC 9604 or any other response action, any release of source byproduct, or special nuclear material from any processing site designated under section 7912(a)(1) or 7942(a) of this title, and (D) the normal application of fertilizer.

2.2 Detailed Scope of Services

The Phase I ESA was conducted in accordance with generally accepted Phase I industry standards using ASTM Standard Practice E 1527-13, 40 CFR Part 312 and as described in AEC's Proposal Number P16-155SD dated May 10, 2016. The following services were provided for this assessment:

- A search for environmental liens and other potential environmental related encumbrances to title of the Site.
- An evaluation of standard environmental record sources contained within Federal, State and local environmental databases within specific search distances.
- An evaluation of additional environmental record sources obtained from local regulatory agencies.
- A qualitative evaluation of the physical characteristics of the Site through a review of published topographic, geologic, and hydrogeologic maps; published groundwater data; and area observations to characterize surface water flow in the Site area.
- An evaluation of past Site and adjacent/nearby property uses through a review of historical resources including aerial photographs and topographic maps.
- A physical inspection of the Site (interior and exterior) conducted to search for conditions indicative of potential environmental concerns including underground storage tanks (USTs), aboveground storage tanks (ASTs), associated tank piping; stained soil or pavement, equipment that may contain or have historically contained polychlorinated biphenyls (PCBs), and other potential environmental concerns as defined in the ASTM-2013 standard.

-
- A physical assessment of indications of past uses and visual observations of adjacent and surrounding properties (from curbside or public spaces) to assess potential impacts to the Site.
 - Interviews completed with representatives of the current owner of the Site and local regulatory officials.
 - The preparation of this Phase I ESA report, which includes the findings of the study and our opinion regarding their level of significance. Conclusions have been drawn based on the significance levels of the findings with subsequent recommendations provided.

2.3 Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM guidelines, 40 CFR Part 312 and the scope of work for the project proposed by AEC. No other warranties either express or implied are made by AEC. AEC's evaluations, analyses, and opinions should not be taken as representations regarding subsurface conditions or the actual value of the Site. Subsurface conditions may differ from the conditions implied by the surficial observations, and can only be reliably evaluated through intrusive techniques.

Documentation and data provided by Stanton Energy Reliability Center, LLC, designated representatives of Stanton Energy Reliability Center, LLC, other interested third parties, or from the public domain, and referred to in the preparation of this assessment, are assumed to be complete and correct and have been used and referenced with the understanding that AEC assumes no responsibility or liability for their accuracy. AEC's conclusions are based upon such information and documentation and on our observations of Site conditions, as they existed on the date of the site inspection. Because Site conditions may change significantly over a short period of time and additional data may become available, data reported and conclusions drawn in this report are limited to current conditions and may not be relied upon on a significantly later date.

2.4 Limitations and Exceptions

Reasonable efforts have been made during this assessment to uncover evidence of underground storage tanks (USTs), aboveground storage tanks (ASTs), ancillary equipment associated with such tanks, and other subsurface structures. "Reasonable efforts" are limited to information gained from visual observation of unobstructed areas, recorded database information held in public record, and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to paving, construction or debris pile storage, or incorrect information from sources.

This investigation was not an environmental compliance audit. While some observations and discussion in this report may address conditions and/or operations that may be regulated, the regulatory compliance of those conditions and/or operations is outside the scope of this investigation. Nothing in this report constitutes a legal opinion or legal advice. For information regarding specific individual or organizational liability, AEC recommends consultation with independent legal counsel.

This ESA does not address non-scope ASTM considerations including asbestos containing materials (ACMs), radon, lead-based paint (LBP), lead in drinking water, wetlands, protected environments and habitat, industrial hygiene concerns, indoor air quality (not resulting from vapor

intrusion concerns relative to hazardous substances and petroleum products), and high voltage power lines.

2.5 Special Terms and Conditions

No special terms and conditions between AEC and Stanton Energy Reliability Center, LLC pertinent to the findings of this ESA or methodology used to complete this assessment are noted. In addition, AEC does not have a financial interest in the Site.

2.6 User Reliance

This report was prepared for use solely and exclusively by Stanton Energy Reliability Center, LLC. The report is not for the use or benefit of, nor may it be relied upon by, any other person or entity for any purpose without the advance written consent of AEC. AEC makes no representation to any third party except that it has used the degree of care and skill ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other use or disclosure is intended or authorized by AEC. In the preparation of this ESA, AEC has used the degree of care and skill ordinarily exercised by a reasonably prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other warranties are made to any third party, either express or implied.

3.0 Site Description

3.1 Location and Legal Description

The Site is comprised of reported 3.98 acres in the City of Stanton, Orange County, California. The Site has reported physical addresses of 10711 Dale Avenue and 8230 Pacific Street, Stanton, California. The Site is located to the west of Dale Avenue and to the south and east of the intersection of Pacific Street and Fern Avenue. The Site is comprised of three legal parcels identified as APNs 126-531-43 (10711 Dale Avenue), 126-531-40 (8230 Pacific Street), and 126-553-18. A Vicinity Map is included in section 13.1.

3.2 Site and Vicinity General Characteristics

The Site and its adjacent/nearby properties are situated in a mostly urbanized area in the City of Stanton, Orange County, California. Surrounding areas are primarily utilized for commercial/light-industrial properties to the northwest, vacant and undeveloped land with power lines to the north and northeast, the Barre Substation and Peaker Plant to the east (across Dale Avenue), a railroad track with a self-storage facility to the south, and the City of Stanton Corporate Yard to the west. Additional details pertaining to the Site and its adjoining properties are provided in the sections below.

3.3 Current Use of the Site

The western portion of the Site (bound to the west by the intersection of Pacific Street and Fern Avenue and to the east by the Stanton Storm Channel) is currently developed with a wooden garage building, an asphalt-paved parking area, an un-paved truck parking area, and a wooden pallet storage area. The western portion of the Site is currently occupied by a trucking company and a wooden pallet storage company. The eastern portion of the Site (bound to the west by the Stanton Storm Channel and to the east by Dale Avenue) is vacant and undeveloped land with the exception of a power pole. The eastern portion of the Site is currently unoccupied.

3.4 Description of Structures, Roads, Other Improvements on the Site

As previously discussed, one wooden garage building and a paved truck parking area was observed in the western portion of the Site. In addition, two mobile homes are present in the northwestern portion of the western portion of the Site. Also, an unpaved truck parking area, several shipping containers used for storage, and a wooden pallet storage area are also present in the western portion of the Site. There are no habitable structures, roadways, or other improvements on the eastern portion of the Site with the exception of a wooden power pole near Dale Avenue. Water service at the Site and its adjoining properties is believed to be provided by Golden State Water. Electricity in the Site vicinity is provided by Southern California Edison (SCE) and natural gas service in the vicinity of the Site is provided by the Southern California Gas Company. The City of Stanton provides sewer and storm water services in the vicinity of the Site. A Site Plan is included in Section 13.2. Photographs taken of the Site are included in Section 13.3.

3.5 Current Uses of the Adjoining Properties

The area surrounding the Site primarily consists of residential land uses to the northwest (across the intersection of Fern Avenue and Pacific Street) and southeast (across Dale Avenue), commercial/light-industrial land uses adjacent to the northwest, vacant and undeveloped land with wooden power poles and metal electrical pylons with overhead wires and the extension of the Stanton Storm Channel to the northeast, a roadway (Dale Avenue) with an electrical substation and power plant to the east, a railroad track and self-storage facility to the south, and the City of Stanton Corporate Yard to the west. AEC performed a visual inspection of adjoining properties from the Site. No current uses of adjoining properties or properties in the surrounding vicinity were identified as a potential environmental concern to the Site.

4.0 User Provided Information

4.1 Title Records

AEC was provided with Fidelity National Title Insurance Company Owners preliminary title reports pertaining to the Site which were issued on April 13, 2016 (eastern portion - 10711 Dale Avenue) and June 8, 2016 (western portion – 8230 Pacific Street). According to the title reports, the eastern portion of the Site is vested in Stanton Energy Reliability Center, LLC, a Delaware limited liability company and the western portion of the Site is vested in Genevieve L. Valov and Peter P. Valov. No environmental liens or deed restrictions were noted in the title reports. In addition, no such encumbrances in connection with the Site were noted during research completed with the Orange County Assessor's and Recorder's office.

4.2 Environmental Liens or Activity and Use Limitations

The client was unaware of environmental related liens or activity and use limitations (i.e. engineering or institutional controls) that are related to potential recognized environmental conditions at the Site.

4.3 Specialized Knowledge

The client is unaware of specialized knowledge pertinent to potential recognized environmental conditions at the Site.

4.4 Commonly Known or Reasonably Ascertainable Information

Except for the former presence of a UST in the western portion of the Site (which was removed under regulatory agency oversight), the client is unaware of commonly known or reasonably ascertainable information pertinent to potential recognized environmental conditions at the Site.

4.5 Valuation Reduction for Environmental Issues

The client is unaware of information pertaining to the relationship of the value of the Site to the estimated fair market value of the Site that might indicate that significant contamination exists at the Site.

4.6 Owner, Property Manager, and Occupant Information

The Site is currently owned by two separate entities. The western portion of the Site at 8230 Pacific Street (APNs 126-531-43 and 126-553-18) is owned by Genevieve L. Valov and Peter P. Valov and is occupied by a truck storage company and a wooden pallet storage company. The eastern portion of the Site at 10711 Dale Avenue (APN 126-531-43) is currently owned by Stanton Energy Reliability Center, LLC; a Delaware Limited Liability Company and is currently vacant and undeveloped land with no identified permanent occupants.

4.7 Reason for Performing Phase I ESA

Stanton Energy Reliability Center, LLC (user of this report) retained AEC to conduct this Phase I ESA in connection with the planned lease (western portion of the Site) and associated development of the Site, and to identify environmental issues which may be present.

4.7 Client Provided Documents

Stanton Energy Reliability Center, LLC provided three prior environmental reports relating to the Site. AEC reviewed and summarized the reports below:

Southern Pacific Transportation Company Underground Storage Tank Removal, prepared by SP Environmental Systems, Inc. and dated August 2, 1990:

This document was prepared by SP Environmental Systems, Inc. and was submitted to the County of Orange Environmental Health Agency UST Program for the removal of a 1,000-gallon UST at the property located at 8230 Pacific Street (western portion of the Site) and known as the former Bob's Towing facility on June 5, 1990. Approximately 15-gallons of unleaded gasoline remained in the UST and was pumped out prior to triple rinsing and degassing of the UST prior to removal. The UST was noted to be in excellent condition and estimated to be less than 10 years old and formerly used to refuel business vehicles. No odor or staining was observed after the UST was removed and the void was backfilled from material on-Site. Two soil samples (one from the center of the tank at approximately 9-feet below ground surface and one sample from the excavated soil stockpile) were collected upon tank removal. Both samples were analyzed by an off-Site laboratory and reported non-detect concentrations of total petroleum hydrocarbons (TPH) as gasoline and for benzene, toluene, ethyl benzene, and xylenes (BTEX).

Phase I Environmental Site Assessment, Parcel 2 of Parcel Map No. 92-193, 8230 Pacific Street, Fern St./Pacific St./Stanton Storm Channel, Stanton, California 90680, prepared by Applied Geotechnical Engineering, Incorporated and dated December 21, 1993:

This Phase I ESA was prepared by Applied Geotechnical Engineering, Incorporated for Mr. Peter Valov and Grubb & Ellis Company and identified multiple areas of potential environmental concern at the Site including the following:

- Hydrocarbon stained areas
- Stressed vegetation
- Areas of storage of petroleum/oil fluids
- Potential impairments from off-Site sources
- Surface drainage from Fern Street and Pacific Street to the north
- Discharges to an unlined/earthen canal/ditch across the Site
- The adjacent property to the north having a leaking UST

The consultant concluded that in the absence of drilling, sampling, and testing of soil and/or groundwater from the Site, they did not have sufficient data to present an opinion regarding the conditions of the soil and/or groundwater at the Site due to off-Site sources and past and present activities at the Site. The consultant also mapped the on-Site AST, the area of the former UST (both in locations different from those observed and reported to AEC during the present Site assessment), the canal/ditch in the northern portion of the Site, and areas of staining on paved surfaces.

Supplemental Information- Environmental Site Assessment- Phase I, Parcel 2 of Parcel Map No. 92-193, 8230 Pacific Street, Fern Street/Pacific Street/Stanton Storm Channel, Stanton California, prepared by Applied Geotechnical Engineering, Inc. and dated January 4, 1994:

This document presented information that was not available during the preparation of the Phase I ESA dated December 21, 1993. The report discussed the removal of a 1,000-gallon UST in July of 1990 and that no contamination of the subsurface soil was found during the tank removal. Tank closure was granted by Orange County on August 7, 1990. Based on the additional information and documents received, the consultant concluded that there remain areas of potential environmental concern at the Site unrelated to the former UST and as referenced in the Phase I ESA report.

5.0 Records Review

5.1 Standard Environmental Record Sources

AEC reviewed Federal, State and local environmental databases provided by Environmental Risk Information Services (ERIS), for information pertaining to documented and/or suspected releases of regulated hazardous substances and/or petroleum products within specified search distances. A copy of the ERIS Report is included in Section 13.4.

AEC also reviewed unmappable sites listed in the environmental database report by cross-referencing addresses and site names. Unmappable (“orphan”) sites are sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be mapped because of inaccurate or missing location information in the record provided by the regulatory agency. Any unmappable sites that AEC identifies within the specified search radii were evaluated as part of the preparation of this report. None of the orphan listings are considered to be an environmental concern to the Site.

The following Federal databases related to potential on-site and off-site sources of contamination were reviewed and interpreted by AEC:

Federal Databases	Search Distance From Site
National Priorities List (NPL)	One mile
National Priority List – Proposed (Proposed NPL)	One mile
Deleted National Priorities List (Deleted NPL)	One-half mile
Superfund Enterprise Management System (SEMS)	One-half mile
SEMS Archive Sites (SEMS Archive)	One-half mile
Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)	One-half mile
CERCLIS No Further Remedial Action Planned (CERCLIS NFRAP)	One-half mile
CERCLIS Liens (CERCLIS LIENS)	Property only
Resource Conservation and Recovery Act (RCRA) CORRACTS Corrective Action	One mile
RCRA non-CORRACTS Treatment, Storage, and Disposal (TSD) Facilities	One-half mile
RCRA Large-Quantity Generator (LQG)	One-quarter mile
RCRA Small-Quantity Generator (SQG)	One-quarter mile
RCRA Conditionally Exempt Small Quantity Generator (CESQG)	One-quarter mile
RCRA Non-Generators (RCRA NON GEN)	One-quarter mile
Federal Engineering Controls (FED ENG)	One-half mile
Federal Institutional Controls (FED INST)	One-half mile
Emergency Response Notification System (ERNS)	Property only
Federal Brownfields (FED BROWNFIELDS)	One-half mile
Material Licensing Tracking System (MLTS)	Property only

The following State/local databases related to potential on-site and off-site sources of contamination were also searched and reviewed:

State/Local Databases	Search Distance From Site
State Response Sites (RESPONSE)	One mile
EnviroStor Database (ENVIROSTOR)	One mile
Solid Waste Information System (SWF/LF)	One-half mile
EnviroStor Hazardous Waste Facilities (HWP)	One mile
Land Disposal Sites (LDS)	One-half mile
Leaking Underground Fuel Tank Reports (LUST)	One-half mile
Delisted Leaking Storage Tanks (DLST)	One-half mile
Permitted Underground Storage Tanks (UST) in Geotracker	One-quarter mile
Aboveground Storage Tanks (AST)	One-quarter mile
Delisted Storage Tanks (Delisted TNK)	One-quarter mile
Proposed Closure of Underground Storage Tank Cases (UST Closure)	One-quarter mile
Historical Hazardous Substance Storage Information Database (HHSS)	One-quarter mile
Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions (LUR)	One-half mile
Hazardous Waste Management Program Facility Sites with Deed/Land Use Restrictions (HLUR)	One-half mile
Deed Restriction and Land Use Restriction (Deed)	One-half mile
Voluntary Cleanup Program (VCP)	One-half mile
GeoTracker Cleanup Sites Data (Cleanup Sites)	One-half mile
Orange County Health Care Agency Listing of Aboveground and Underground Storage Tanks (ORANGE AST and UST)	One-eighth mile

Descriptions/sources of each of the above referenced regulatory databases and the dates these databases were last updated by the applicable regulatory agencies are included in the ERIS report.

Subject Site

The 8230 Pacific Street Site address was identified on the RCRA NON GEN and UST databases in the ERIS Report. The 8230 Pacific Street Site address was identified as Able Degassing, Inc. on the RCRA NON GEN database as a used oil transporter of hazardous waste treatment and disposal and other non-hazardous waste treatment and disposal of ignitable and corrosive waste. The 8230 Pacific Street Site address was also identified as Bob’s Towing on the UST database. No indications of a release or violations were reported. The Site was not identified on any other of the standard regulatory databases reviewed in the ERIS Report.

Adjoining and Nearby Properties

Several listings are mapped in the standard regulatory databases within 1/8-mile of the Site. The table below presents a summary of the listed facility and an opinion regarding the potential impact to the Site.

Listed Property and Address	Database(s)	Mapped Distance and Direction From Site	Details	Significant Concern To Site?
Buddy Wilson-Property 8231 Monroe Avenue	UST	0.02-mile NW	Referenced on the UST database with no references to releases or violations.	No
California Shipping 8151 Electric Avenue	UST	0.02-mile WSW	Referenced on the UST database with no references to releases or violations.	No
Southern California Edison Barre Peaker Generating Station 10670 Dale Avenue	AST Orange AST	0.03-mile ENE	Referenced on the AST and Orange AST databases with no references to releases or violations.	No
Charbonneaus Tractor 8181 Electric Avenue	UST	0.04-mile WSW	Referenced on the UST database with no references to releases or violations.	No
Mahood's Auto Body 8354 Standustrial	RCRA SQG	0.05-mile N	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
WC Engine & Trans 8352 Standustrial	RCRA SQG	0.05-mile NNE	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
Fat Jack Enterprises 8322 Standustrial, Unit B	RCRA SQG	0.05-mile NNW	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
Western Avenues Property 8130 Electric Avenue	UST	0.05-mile WSW	Referenced on the UST database with no references to releases or violations.	No
Quicksand 8358 Standustrial	VCP	0.06-mile N	Referenced on the VCP database. Since the early 1980s to 2007, the facility was used for metal spraying and finishing which (based on sampling conducted in 2004 by the DTSC) has contaminated the building, yard, and neighboring facilities with zinc. Fieldwork (implementation of Removal Action Workplan) was reportedly completed in February of 2014 and a CEQA Notice of Exemption was finalized in December of 2015. Land use restrictions are noted.	No

Listed Property and Address	Database(s)	Mapped Distance and Direction From Site	Details	Significant Concern To Site?
Security Painting 8361 Standustrial	RCRA SQG	0.06-mile N	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
Harpers Backhoe Service 8231 Electric Avenue	UST	0.06-mile SSW	Referenced on the UST database with no references to releases or violations.	No
Baxter Griffin Co. 8210 Monroe Avenue	LUST UST	0.06-mile W	The facility was referenced on the LUST database for a gasoline release to the soil that was encountered in May of 1994. Assessment and remediation was conducted under regulatory agency oversight. The release case was closed on July 19, 1995. The facility is also referenced on the UST database.	No
Fox Electric Motor Repair 8307 Standustrial	RCRA SQG	0.06-mile NNW	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
All Metals Processing 8305 Standustrial	CERCLIS CERCLIS NFRAP SEMS ARCHIVE	0.06-mile NNW	Referenced on the CERCLIS database for a 1988 discovery which had a Preliminary Assessment conducted in 1988 which gave the facility a low priority level and was subsequently archived in 1991 and listed on the NFRAP database since the facility did not qualify for the NPL. The facility was also listed on the SEMS ARCHIVE database due to its NFRAP status.	No
Gary's VW 8301 Standustrial	RCRA SQG	0.06-mile NW	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
All Metals Processing Company 8401 Standustrial	HHSS RCRA LQG ENVIROSTOR	0.06-mile NE	The facility was listed on the HHSS database for a listing for the installation of a 15,000-gallon single-walled concrete container that was reportedly used as a clarifier. The facility was also referenced as a large quantity generator of hazardous waste (ignitable waste, corrosive waste, spent cyanide plating bath solutions from	No

Listed Property and Address	Database(s)	Mapped Distance and Direction From Site	Details	Significant Concern To Site?
			<p>electroplating operations, reactive wastes, methyl ethyl ketone, wastewater, cadmium, and chromium. Several compliance inspections were conducted and several violations were reported in 1993, 2003, 2004, 2005, 2008, 2009, 2010, 2013, and 2014. With the exception of the violations received in 2014, none of the violations appeared to be significant. In 2014, the facility was noted as a "significant non-complier." No indications of a release or additional enforcement actions at this facility were reported. The facility was also listed on the ENVIROSTOR database for investigations being conducted by the DTSC from 1988 to 2015 to evaluate potential cadmium, chromium, copper, nickel, hexavalent chromium, volatile organic compounds and semi-volatile organic compounds. Investigations are reportedly ongoing.</p>	
<p>Allec Trucking 10821 Dale Avenue</p>	<p>UST</p>	<p>0.06-mile ESE</p>	<p>Referenced on the UST database with no references to releases or violations.</p>	<p>No</p>
<p>Kern Products 8341 Monroe Avenue</p>	<p>LUST</p>	<p>0.07-mile S</p>	<p>The facility was referenced on the LUST database for a gasoline release to the soil that was encountered in 1987. Assessment and remediation was conducted under regulatory agency oversight. The release case was closed on June 15, 1988.</p>	<p>No</p>
<p>Couch & Philippi, Inc. 10680 Fern Avenue</p>	<p>LUST UST</p>	<p>0.07-mile NW</p>	<p>The facility was referenced on the LUST database for a gasoline release to the soil and groundwater that was encountered in January of 1989. Assessment and remediation was conducted under regulatory agency oversight. The release case was closed on February 21, 1989. The facility is also</p>	<p>No</p>

			referenced on the UST database.	
Cul A Quip 8237 Monroe Avenue	UST	0.07-mile SW	Referenced on the UST database with no references to releases or violations.	No
Hi Tech Treatment Co. Inc. 8355 Monroe Avenue	RCRA NON GEN	0.08-mile S	Referenced on the RCRA NON GEN database for the transport of ignitable waste with no reported violations.	No
Exotic Chem Co. Inc. 8371 Monroe Avenue	RCRA SQG	0.08-mile SSE	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
CBS Bug Shop #2 8362 Monroe Avenue	RCRA SQG	0.08-mile SSE	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
Johnson & Turner Painting Co. 8241 Electric Avenue	UST	0.08-mile SSW	Referenced on the UST database with no references to releases or violations.	No
Magnolia Drapery Cleaners 8368 Monroe Avenue	RCRA SQG	0.08-mile SSE	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
Hot Robs by Boyd Inc. 8372 Monroe Avenue	RCRA NON GEN	0.08-mile SSE	Referenced on the RCRA NON GEN database for its NAICS description of automotive body, paint, and interior repair and maintenance with no reported violations.	No
8400 Block Monroe Avenue	ERNS	0.08-mile SSE	This area was referenced for a January of 1998 incident when a caller reported that the flood control ditch appeared to have anti-freeze in it. No additional cleanup or enforcement actions were reported.	No
Stanton Truck & Heavy Duty Repair 8281 Monroe Avenue	RCRA SQG	0.08-mile SW	Referenced as a small quantity generator of hazardous waste with no reported violations.	No
Beeline Asphalt & Concrete 10821 Dale Avenue	LUST HHSS UST	0.08-mile SW	The facility was referenced on the LUST database for a diesel release to the soil that was encountered in December of	No

Listed Property and Address	Database(s)	Mapped Distance and Direction From Site	Details	Significant Concern To Site?
			1990. Assessment and remediation was conducted under regulatory agency oversight. The release case was closed on March 14, 1991. The facility was also listed on the HHSS database for two listings for the 1963 installation of one 10,000-gallon and one 4,000-gallon carbon steel gasoline-filled UST that were reportedly operated until 1984. The facility was also referenced on the UST database with no references to releases or violations	
Nancy Rohrs & Mark Lassiter 10961 Dale Avenue	UST	0.08-mile ESE	Referenced on the UST database with no references to releases or violations.	No
Solag Disposal 8270 Monroe Avenue	LUST	0.11-mile SW	The facility was referenced on the LUST database for a diesel release to the soil and groundwater that was encountered in September of 1991. Assessment and remediation was conducted under regulatory agency oversight. The release case was closed on December 7, 1995.	No
City of Stanton Corporate Yard 8100 Pacific Street	SWF/LF Orange AST	0.11-mile W	The facility was referenced on the SWF/LF database for the limited volume transfer and processing of construction/demolition, inert, metals, mixed municipal and wood waste. The facility is also referenced on the Orange AST database with no references to releases or violations.	No
Katella Plywood & Lumber Co. 8121 Katella Avenue	UST	0.12-mile SW	Referenced on the UST database with no references to releases or violations.	No
Great Scott Tree Service, Inc. 10761 Court Avenue	AST Orange AST	0.12-mile W	Referenced on the AST and Orange AST databases with no references to releases or violations.	No

The properties listed in the table above are not considered to be significant environmental concerns to the Site. Several properties mapped between one-eighth to one-mile from the Site also appear on various regulatory databases (SEMS ARCHIVE, CERCLIS, CERCLIS NFRAP, ENVIROSTOR, SWF/LF, and LUST). These properties are also not expected to have adversely impacted the Site. These opinions are based on several factors including the nature of the regulatory database listings, distance of the off-Site listed properties from the Site, orientation of the listed properties relative to the Site, interpreted direction of groundwater flow, and/or regulatory case status information for the various properties as described in the database.

Non-ASTM Regulatory Databases

Below is a list of non-ASTM databases searched by ERIS and reviewed by AEC during the preparation of this assessment. The descriptions of each database and their data release frequency are included in the ERIS report, included in Section 13.4.

Federal

FINDS/FRS – Facility Registry Service/Facility Index

TRIS – Toxic Chemical Release Inventory System

HMIRS – Hazardous Materials Information Reporting System

NCDL – National Clandestine Drug Labs

ODI – Open Dump Inventory

IODI – EPA Report on the Status of Open Dumps on Indian Lands

TSCA – Toxic Substances Control Act

HIST TSCA – Toxic Substances Control Act

FTTS ADMIN – Federal Insecticide, Fungicide, & Rodenticide (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS, Administrative Case Listing

FTTS INSP – FTTS Inspection Case Listing

PRP – Potentially Responsible Parties List

SCRD DRYCLEANER – State Coalition for Remediation of Drycleaners Listing

ICIS – Integrated Compliance Information System

FED DRYCLEANERS – Drycleaner Facilities

State

DRYCLEANERS – Cleaner Facilities

INSP COMP ENF – EnviroStor Inspection, Compliance, and Enforcement

CDL – Clandestine Drug Labs

SCH – School Property Evaluation Program Sites

CHMIRS – California Hazardous Material Incident Report System

SWAT – Sites Listed in the Solid Waste Assessment Test Program Report

HAZNET – Facility and Manifest Data

CDO/CAO – Cease and Desist Orders and Cleanup and Abatement Orders

HIST CHMIRS – Historical California Hazardous Material Incident Report System

HIST MANIFEST – Historical Hazardous Waste Manifest Data

The Site is listed on multiple non-ASTM databases as referenced below:

- FINDS/FRS - Able Degassing, Inc. is referenced on the FINDS/FRS database with a NAICS code description of hazardous waste treatment and disposal and other nonhazardous waste treatment and disposal. No further information was provided.
- CHMIRS - Geo Trans is referenced on the CHMIRS database for an incident on November 18, 2002 when 300-gallons of an unknown material was contained and

removed off-Site under the oversight of the Orange County Emergency Management Division. No further details were provided.

- HAZNET - Valvo Services, Inc., Ziba Investment Corporation, and Able Degassing, Inc. are referenced on the HAZNET database for the off-Site disposal of waste oil and mixed oil and tank bottom waste in 2003, 2004, 2005, 2006, 2008, 2012, and 2013. No further information was provided.

Multiple non-ASTM databases listings for adjacent/nearby off-Site properties are also mapped within specified search distances of the Site. These listings are not considered to be significant environmental concerns to the Site. This opinion is based on several factors including the type and nature of the facility listings, regulatory case status, distance of the off-Site listed properties from the Site, orientation of the listed properties relative to the Site, and interpreted direction of groundwater flow.

5.2 Physical Setting Sources

The following physical setting sources were reviewed to provide information about the topographic, hydrologic, geologic and/or hydrogeologic characteristics of the Site.

5.2.1 Topography and Hydrology

USGS Topographic Quadrangle

Based on a review of the United States Geological Survey (USGS) 7.5 Minute Series, Anaheim, CA Topographic Quadrangle map dated 2015, the elevation of the Site is approximately 70 feet above mean sea level and is depicted as mostly flat with a slight slope down to the west. The Stanton Storm Channel is depicted crossing the central portion of the Site. Fern Avenue to the west, Dale Avenue to the east, and railroad tracks to the south are depicted. No structures are depicted at the Site. Adjacent properties in all directions are also generally depicted as developed with roadways in their current configurations.

Hydrology/Storm Water Management

Surface drainage at the Site is facilitated by on-Site area drains in the western portion of the Site and nearby municipal storm drains along public roadways that are maintained by the City of Stanton. The Site does not appear to receive significant drainage from off-Site properties with the exception of the central portion of the Site which has the concrete-lined Stanton Storm Channel crossing the Site. While significant drainage from off-Site up-gradient properties is expected during rain events from flow through the channel, no on-Site infiltration is expected since the conveyance channel is concrete-lined. The remainder of the Site does not appear to receive significant drainage from off-Site properties.

5.2.2 Geology

The Site lies within the Peninsular Ranges Geologic Province of California. This geomorphic province is traversed by a group of northwest trending sub-parallel fault zones and encompasses an area that extends 125 miles from the Transverse Ranges and the Los Angeles Basin south to the Mexican Border and beyond another 775 miles to the tip of Baja California. Rocks within the Peninsular Range Province were emplaced during Cretaceous age orogenic events and uplifted

into the present mountain ranges during the late Tertiary and Quaternary. Igneous, metamorphic and sedimentary rocks are all found within the Peninsular Ranges. The area is seismically active, with several known active faults crossing the Province. Based on information depicted on the 2010 Geologic Map of California, the Site is underlain by Pleistocene- Holocene- aged marine and nonmarine (continental) sedimentary rocks consisting of alluvium, lake, playa, and terrace deposits which are unconsolidated and semi-consolidated. Based on the 2010 Fault Activity Map of California, the Site is depicted to the west of an unnamed fault which trends to the southeast, to the east of the Los Alamitos Fault, to the south of the Norwalk Fault and to the west of the El Modeno Fault.

5.2.3 Hydrogeology

According to the Water Quality Control Plan for the Santa Ana River Basin, published by the Santa Ana RWQCB, the Site is situated in the Orange County Management Basin within the East Coastal Plain of the Lower Santa Ana River sub-basin within the Santa Ana River basin. Groundwater within the Orange County Management Basin is listed with existing or potential beneficial use designations for municipal, agricultural, industrial, and process supply purposes. Information obtained from the GeoTracker website for nearby properties, revealed groundwater depths measured between 18 to 20 feet below ground surface with gauged gradients to the east-southeast and to the southwest.

5.3 Historical Use Information on the Subject Site and Adjoining Properties

Several historical sources (as described in the following sections) were reviewed during this assessment to develop a history of the previous uses of the Site and to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Site.

5.3.1 Aerial Photographs

AEC reviewed aerial photographs dated 1953, 1963, 1972, 1980, 1994, 2003, 2004, 2005, 2009, 2010, and 2012 provided by online sources. In the 1953 aerial photograph, the Site appears as mostly vacant and undeveloped land with the exception of the eastern end which appears to be graded with possible hay piles visible. The remainder of the Site appears to have been used for agricultural purposes. The intersection of Pacific Street and Fern Avenue is visible to the northwest and Dale Avenue is present to the east. A railroad track is visible to the south of the Site. In the 1963 aerial photograph, the Site appears to be vacant and undeveloped land with some vegetation with the Stanton Flood Channel visible crossing the central portion of the Site. In the 1972 aerial photograph, the Site appears to be partially developed with two structures, a cleared parking area, and a drainage ditch to the north in the western portion and vacant and undeveloped graded land in the eastern portion. In the 1980 aerial photograph, the western portion of the Site appears to be mostly vacant and undeveloped graded land with the drainage ditch visible in the north with the previous structures not visible. Also, in the 1980 aerial photograph, the eastern portion of the Site appears to be used for agricultural purposes. In the 1994 aerial photograph, the western portion of the Site appears to be partially developed with the current garage building and cleared truck parking areas in the western portion and the eastern portion of the Site appears to be used for agricultural purposes with several greenhouse structures also visible. In the 2003, 2004, and 2005 aerial photographs, the western portion of the Site appears to have been partially paved and used for truck storage with the garage building and mobile home building visible and with wooden pallet storage visible in the eastern portion of the western portion of the Site. Also in the 2003-2005 aerial photographs, the eastern portion of the

Site is used for agricultural purposes with multiple large plots of trees and a greenhouse visible. In the 2009, 2010, and 2012 aerial photographs, the western portion of the Site appears to remain partially developed with a partially paved truck parking area, garage building, mobile home building, an unpaved parking area, and a pallet storage area and the eastern portion of the Site appears to be vacant and undeveloped and partially graded with several trees remaining in the 2009 aerial photograph and vacant in the 2010 and 2012 aerial photographs.

Adjacent properties to the north appear as vacant and undeveloped land with natural drainages in the 1953 aerial photograph. Three commercial/light-industrial buildings (similar to the present) are visible to the northwest and mostly vacant and undeveloped with the extension of the Stanton Storm Channel is visible to the northeast in the 1963 aerial photograph. Additional structures are visible to the north and south of Standustrial Street by the 1963 aerial photograph. In the 1972, 1980, and 1994 aerial photographs, the adjacent property to the northeast of the Site appears to be used for agricultural purposes with several roadways and structures (likely greenhouses) visible. The metal power pylons are first visible in the 1980 aerial photograph. In the 2003, 2004, and 2005 aerial photographs, the northeastern adjacent property appears to be graded and cleared and used for truck and vehicle parking and as vacant and undeveloped partially vegetated land in the 2009, 2010, and 2012 aerial photographs.

Adjacent properties to the east appear as developed with a roadway (Dale Avenue) and vacant and undeveloped land with natural drainages and agriculture to the southeast in the 1953 aerial photograph. The eastern adjacent Dale Avenue appears to have been paved and widened by the 1963 aerial photograph with vacant and graded land with several metal power poles beyond and with the mobile home park visible to the southeast. The eastern adjacent Dale Avenue appears to have been widened in the 1972, 1980, and 1994 aerial photographs with agricultural land and power poles beyond and with the mobile home park visible to the southeast. In the 2003, 2004, and 2005 aerial photographs, the properties beyond Dale Avenue appear to remain agricultural with fields and greenhouses visible and redeveloped with the Peaker Plant in the 2009, 2010, and 2012 aerial photographs.

Adjacent properties to the south appear as developed with a railroad track with vacant and with agriculture beyond in the 1953 aerial photograph. In the 1963, 1972, 1980, and 1994 aerial photographs, the railroad track remains with the extension of the Stanton Storm Channel and vacant and undeveloped land beyond with several larger commercial/light-industrial structures visible to the north of Monroe Avenue. In the 2003-2012 aerial photographs, the southern adjacent properties appear to have developed with the current self-storage complex including buildings and paved parking areas with commercial/light-industrial properties beyond.

Adjacent properties to the west appear as vacant and undeveloped land to the west and as partially developed with the intersection of Pacific Street and Fern Avenue visible with residences beyond to the northwest in the 1953 and 1963 aerial photographs (similar to the present). In the 1972 aerial photograph, the western adjacent property appears as partially developed with several small structures and vacant and undeveloped graded land by the 1980 aerial photograph. In the 1994 aerial photograph, the western adjacent properties appear as agricultural and in the 2003-2005 aerial photographs they appear to be used as a vehicle and material storage areas. In the 2009-2012 aerial photographs, the adjacent properties to the west appear to have been redeveloped into the current City of Stanton Corporate Yard with several buildings and paved areas visible.

5.3.2 Topographic Maps

AEC reviewed topographic maps of the subject property from 1896, 1899, 1901, 1902, 1905, 1906, 1911, 1912, 1920, 1922, 1930, 1932, 1935, 1939, 1944, 1946, 1947, 1950, 1956, 1961, 1967, 1972, and 1981 provided by online sources. On the 1896 and 1899 maps, the Site and adjacent properties are depicted as vacant and undeveloped land. On the 1899 map the area to the south of the Site is labeled as "Clair." On the 1901 to 1950 maps the Site is depicted as vacant and undeveloped land with a roadway (Dale Avenue) to the east and a railroad track depicted to the south (Southern Pacific Railroad Los Alamitos Branch). On the 1935, 1947, and 1961 maps, the southern adjacent railroad track is depicted as triple tracked (side spurs) to the south of the Site. On the 1950 and 1956 maps, the Site remains vacant and undeveloped with the northwestern adjacent properties appear to be developed with single-family residences (similar to the present), the southeastern adjacent properties appear to be developed with agriculture, and the Barre Substation is depicted farther to the east of the Site (across Dale Avenue). On the 1967 through 1981 maps, the Stanton Storm Drain is depicted crossing the central portion of the Site as well as the overhead power lines crossing the western portion of the Site (similar to the present). The adjacent residential properties to the northwest are shaded pink indicating development and the northwestern adjacent properties (east side of Fern Avenue) are depicted as developed with several large rectangular structures. Development along Standustrial Street is also depicted. In addition, the Barre Substation appears to have been expanded to the west and Radio Towers are depicted farther to the east. Development on the north side of Monroe Avenue to the south is also depicted in the 1967 through 1981 maps. Increased infill development is depicted to the north and south on the 1981 map.

5.3.3 State of California Division of Oil and Gas Records

According to online resources provided by the California Department of Conservation, Division of Oil, Gas and Geothermal Resources, no gas or oil wells were mapped on or adjacent to the Site.

6.0 Site Reconnaissance

The objective of the Site reconnaissance was to obtain information indicating the likelihood of recognized environmental conditions in connection with the Site. The reconnaissance was conducted on July 8, 2016 by Mr. Greg Stull of AEC's Western Regional office. Mr. Stull was escorted by Mr. Mark S. Juergensen of Clean Tech Energy during the Site reconnaissance.

6.1 Methodology and Limiting Conditions

The Site reconnaissance consisted of walking the Site and driving along roadways (for viewing of adjacent/nearby properties). Full access to the Site was provided. As stated previously, a Site Plan is included in Section 13.2. Photographs of the Site were taken to document existing Site conditions and are included and described in Section 13.3.

6.2 General Site Setting

The Site is comprised of reported 3.98 acres in the City of Stanton, Orange County, California. The Site has reported physical addresses of 10711 Dale Avenue and 8230 Pacific Street, however, only one permanent garage structure (8230 Pacific Street) is present at the Site. The Site is located to the west of Dale Avenue and to the south and east of the intersection of Pacific Street and Fern Avenue. The western portion of the Site (bound to the west by the intersection of Pacific Street and Fern Avenue and to the east by the Stanton Storm Channel) is currently developed with a wooden garage building, an asphalt-paved parking area, an un-paved truck parking area, and a wooden pallet storage area. The western portion of the Site is currently occupied by a trucking company and a wooden pallet storage company. The eastern portion of the Site (bound to the west by the Stanton Storm Channel and to the east by Dale Avenue) is vacant and undeveloped land with the exception of a power pole. The eastern portion of the Site is currently unoccupied. The Site and its adjacent/nearby properties are situated in a mostly urbanized area in the City of Stanton, Orange County, California. Surrounding areas are primarily utilized for commercial/light-industrial properties to the northwest, vacant and undeveloped land with power lines to the north and northeast, the Barre Substation and Peaker Plant to the east (across Dale Avenue), a railroad track with a self-storage facility to the south, and the City of Stanton Corporate Yard to the west.

6.3 Site Observations

AEC examined the Site for evidence of the following potential environmental concerns:

Conditions	Not Observed or Noted	Observed or Noted	Potential Concern?
Hazardous Substances/Petroleum Products		X	Yes
Waste Generation/Storage/Disposal	X		--
ASTs		X	Yes
USTs		X	No
PCB Containing Equipment	X		--
Chemical/Petroleum Odors	X		--
Pools of Liquid	X		--
Floor Drains/Sumps/Wells	X		--
Drums		X	Yes

Conditions	Not Observed or Noted	Observed or Noted	Potential Concern?
Stains or Corrosion	X		--
Unidentified Substance Containers	X		--
Stained Soil or Pavement		X	Yes
Stressed Vegetation	X		--
Pits, Ponds or Lagoons		X	No
Wastewater Discharges/Disposal Systems	X		--
Septic Systems/Cesspools	X		--
Non-Hazardous Solid Waste Disposal Areas		X	No
Drinking Water Systems/Water Wells	X		--
Other Features	X		--

The noted items above are discussed in greater detail below.

Hazardous Substances/Petroleum Products

Multiple plastic containers were observed in the central/western portion of the Site in the vicinity of the truck storage areas and in the northwestern portion of the Site where truck maintenance activities occur. The plastic containers appeared to be partially filled with used oil products. Some of the containers were open and were observed to contain oil. Several areas of oil stained ground and pavement were observed in the vicinity of the containers.

ASTs

A metal AST was observed in the central portion of the western portion of the Site adjacent to the northeast of the garage building. The AST was not labeled with regard to contents but appeared to be filled with used oil products. Mild staining was observed on the unpaved ground areas in the vicinity of the UST and slight petroleum odors were noted in and around the AST area.

USTs

The former area of a UST was reported in the central area of the western portion of the Site in an unpaved driveway area adjacent to the northeast of the garage building. The UST was reportedly removed in 1990.

Drums

Multiple 55-gallon metal drums were observed in the central/western portion of the Site in the vicinity of the truck storage areas. The drums appeared to be partially filled with used oil products. Some of the drums were open and were observed to contain oil. Several areas of oil stained ground and pavement were observed in the vicinity of the drums and appeared result from poor housekeeping practices when transferring drum and container contents.

Stained Soil or Pavement

Multiple areas of stained soil and pavement were observed in the western portion of the Site. The areas were observed in and appear to be from poor housekeeping, drum overfilling, leaking equipment, truck maintenance activities, and from stored oil leaks from the on-Site tanker trucks.

Pits, Ponds, or Lagoons

As previously mentioned, the Stanton Storm Channel bisects the central portion of the Site and appears to drain to the south. The channel is concrete-lined and maintained by the City of Stanton. The channel is interpreted to be used during rain events. No staining, odors or other suspect environmental conditions were noted in the area of the channel.

Non-Hazardous Solid Waste Disposal Area

Several areas of solid waste and debris were observed at the Site. An area of solid waste and debris was observed in the along the southern boundary of the eastern portion of the Site and appeared to consist of wooden building debris, household debris, automobile tires, and other miscellaneous materials. A second area of solid waste observed at the Site is along the western property boundary and consists of wooden building debris, concrete blocks, plastic containers and household debris. No staining, odors or other suspect environmental concerns were noted in the debris areas.

7.0 Interview Information

7.1 Interview With Owners

As stated previously, the Site is currently owned by two separate entities. The western portion of the Site at 8230 Pacific Street (APNs 126-531-43 and 126-553-18) is owned by Peter A. Valov and is occupied by a truck storage company and a wooden pallet storage company. The eastern portion of the Site at 10711 Dale Avenue (APN 126-531-43) is currently owned by Stanton Reliability Center, LLC, a Delaware Limited Liability Company and is currently vacant and undeveloped land with no identified permanent occupants. According to a verbal interview conducted with a representative of the current eastern Site owner, the eastern portion of the Site is reportedly currently vacant and undeveloped with no known environmental concerns. The western portion Site owner was unavailable for interview as a part of this assessment.

7.2 Interview With Site Managers

The Site owners are also considered to be the Site Managers. Interviews completed with the Site owners are discussed in Section 7.1 above.

7.3 Interviews With Occupants

The western portion of the Site is currently occupied by a truck storage company and a wooden pallet storage company. AEC was asked to not disturb the current occupants and therefore, no interviews were conducted with the western Site tenants. The eastern portion of the Site is currently vacant and undeveloped land with no known permanent occupants.

7.4 Interview With Local Government Official

During the preparation of this assessment, various regulatory agencies were contacted during the regulatory records search pertaining to the Site. Information obtained during the regulatory records search is included in pertinent sections of this report.

7.5 Interview With Others

No interviews with other persons knowledgeable of the historical use of the Site were conducted during the preparation of this ESA.

8.0 Findings, Opinion, Conclusions and Recommendations

Advantage Environmental Consultants, LLC has performed a Phase I Environmental Site Assessment, in conformance with the scope and limitations of ASTM Practice E 1527-13 of the property located at 10711 Dale Avenue and 8230 Pacific Street (Orange County APNs 126-531-40, 126-553-18, and 126-531-43) in Stanton, Orange County, California. Qualifications for the environmental professionals involved in the performance of this ESA are included in Section 13.5. Any exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

This assessment has not revealed any current recognized environmental conditions in connection with the Site. The former UST that was removed from the western portion of the Site (portion of the overall property to be leased from the existing landowner) is considered to be a historical recognized environmental condition in connection with the Site. In addition, during our reconnaissance of the Site, numerous containers of used oil and other chemical products were observed. Areas of stained soil and pavement were observed in the areas of several of such containers. Because such releases are likely surficial in nature, such releases are not considered to be recognized environmental conditions. However, because the Site is proposed for future development, including a building in its western area, AEC has advised Stanton Energy Reliability Center, LLC that the completion of a Phase II Environmental Site Assessment should be considered. The Phase II ESA would be conducted to evaluate the potential vapor intrusion exposure pathway (in to the future Site building) and to evaluate soil conditions in the western portion of the Site for potential contaminants of concern relative to future construction and soil management activities. Concurrent with this Phase I ESA, AEC completed the Phase II ESA, the results of which have been provided under separate cover. In summary, no significant environmental concerns were identified during the completion of the Phase II study.

9.0 Deviations and Data Gaps

No deviations from the ASTM-2013 standard or data gaps of significance as defined in the ASTM-2013 standard that would alter AEC's conclusions and recommendations regarding the Site were noted during the preparation of this assessment.

10.0 Additional Services

No additional services were completed by AEC during the preparation of this assessment.

11.0 References

“All Appropriate Inquiry” as necessary to satisfy the defenses available under 42 U.S.C. §§ 9607(b)(3), 9607(r)(1), and 9607(q), relying on definitions provided at 42 U.S.C. §§ 9601(35)(B); and as further explained in 40 CFR §§ 312.1 – 312.31.

12.0 Signatures and Qualifications of Environmental Professionals

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in 40 CFR 312.10. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

13.3 Site Photographs

1. View of the western portion of the Site with the paved parking area and mobile home visible in the foreground with the garage building beyond.

2. View of the western portion of the Site with the paved parking lot area and storm drain visible, looking to the northwest.

3. View of the western portion of the Site with the northern end of the garage building and pallet storage area visible, looking to the northeast.

4. View of the unpaved truck parking area in the central area of the western portion of the Site, looking to the southwest.

5. View of the wooden pallet storage area in the eastern area of the western portion of the Site, looking to the west.

6. View of the unpaved truck parking area and wooden pallet storage area in the central and eastern areas of the western portion of the Site.

7. View of the truck parking and pallet storage area in the northern/central area of the western portion of the Site, looking to the southeast.

8. View of the material storage and mobile home parking area in the northwestern area of the western portion of the Site, looking to the west.

9. View of the central Stanton Storm Channel portion of the Site with wood pallet storage visible beyond, looking to the west.

10. View of the central Stanton Storm Channel portion of the Site, looking to the southeast.

11. View of the vacant and undeveloped eastern portion of the Site, looking to the east.

12. View of the vacant and undeveloped eastern portion of the Site along Dale Avenue with the on-Site power pole visible, looking to the west.

13. View of the vacant and undeveloped eastern portion of the Site, looking to the southeast.

14. View of the vacant and undeveloped eastern portion of the Site with the on-Site power pole visible, looking to the southwest.

15. View of the truck maintenance activities in the northern area of the western portion of the Site, looking to the southwest.

16. View of the reported former UST location in the central area of the western portion of the Site, looking to the east.

17. View of the AST and drum storage area in the central/western portion of the Site, looking to the north.

18. View of the oil truck parking area in the central/western portion of the Site with draining to open drums and containers visible.

19. View of oil-stained soil in the un-paved truck parking area in the eastern area of the western portion of the Site.

20. View of oil-stained asphalt and drum storage area in the central/western portion of the Site, looking to the northeast.

21. View of an area of oil-stained asphalt in the southwestern portion of the Site, looking to the southwest.

22. View of debris observed in the southern/eastern portion of the Site, looking to the southwest.

23. View of the northwestern adjacent residences, looking to the northwest at the intersection of Pacific Street and Fern Avenue.

24. View of the northwestern adjacent commercial/light industrial facility at the corner of Pacific Street and Fern Avenue, looking to the east.

25. View of the northern adjacent vacant and undeveloped land with metal power pylons, looking to the northwest.

26. View of the northeastern adjacent vacant and undeveloped land (with the exception of power poles), looking to the west.

27. View of eastern adjacent Dale Avenue with the Barre Substation and Peaker Plant (10670 Dale Avenue) beyond, looking to the northeast.

28. View of the southern adjacent railroad tracks with the self-storage building and office (Extra Space Storage- 10741 Dale Avenue) beyond, looking to the southeast.

29. View of the southern adjacent railroad tracks with self-storage building beyond beyond, looking to the southwest.

30. View of the western adjacent City of Stanton Corporate Yard (8100 Pacific Street), looking to the southwest from across Pacific Street.

Senate District: 29
County: ORANGE
Summary Link: http://www.envirostor.dtsc.ca.gov/public/profile_report.asp?global_id=70000085

SITE HISTORY:

The Site and property is owned by Mr. Charles Currey. The Site consists of a 6,780 square foot building on an 8,000 square foot lot. The Site is in an industrial area, but there are residential neighborhoods and a school within a quarter mile of the site. Since the early 1980's, the Site has been used by the previous operator of Quicksand, Mr. Steve Booth for metal spraying and finishing until about first quarter, 2007. DTSC's Statewide Compliance Division conducted an enforcement action at the Site in December of 2004. DTSC obtained soil samples and concluded that the area is contaminated with toxic levels of zinc. Illegal metal spraying operations (related to metalizing metal parts such as iron fences, outdoor furniture, iron parts. etc.) resulted in a widespread, fine debris layer of zinc and metals within the site building, in the yard, and in some neighboring facilities. Hazardous waste was stored inadequately, and there was evidence of illegal hazardous waste disposal. The extent and nature of contamination is yet unknown.

Assembly District: 65
Senate District: 29
Zip: 90680

Potential Contaminants:

METALS: Arsenic, Cadmium and compounds, Chromium III, Chromium VI, Copper and compounds, Nickel
VOLATILE ORGANICS (8260B VOCs): 1,2-Dichloroethane (EDC), 1,2-Dichloroethylene (cis), Chloroform, Methylene chloride, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride

Site History:

According to Corrective Action and Consent Agreement (CACA) signed between RP and DTSC on October 7, 2013 , the hazardous waste facility is located at 8401 Standustrial Avenue, Stanton, County of Orange, California 90680 (Facility). The Facility consists of three buildings. Building 1 and Building 2 are joined together and are located at 8401-8441 Standustrial Avenue. Building 3 is located at 8371-8381 Standustrial Avenue

The hazardous waste and hazardous waste constituents of concern at the Facility are cadmium, chromium, copper, nickel, hexavalent chromium, volatile organic compounds (VOCs), and Semi-VOCs. The hazardous wastes or hazardous waste constituents may have migrated or may migrate from the Facility into the environment through the following pathways: subsurface soils, groundwater, airborne dust particulate matter, and rain surface runoff. The Facility is located on the north side of Standustrial Avenue in the City of Stanton, Orange County, California. Surrounding properties consist of mixed commercial and industrial areas. The upper shallow groundwater bearing zone has been measured at approximately 14 to 15 feet (bgs). The Stanton Storm Channel is approximately 150 feet to the south from the Facility. Releases from the Facility may migrate or may have migrated towards the Stanton Storm Channel and/or the other nearby industrial and commercial facilities.

As per CACA signed by RP and DTSC, and DTSC's approved Revised Current Conditions Report (CCR) and Facility Investigation (FI) Work Plan dated December 31, 2014. DTSC approved the FI Work Plan. FI Investigation of the facility is being done since First Quarter of 2015.

Document Type:					Site Screening	
Date Completed:					3/3/1992	
Comments:					EPA's SSI Report was reviewed by Region 4 staff. The site is located in a commercial/industrial area. Operations performed (since 1961) include metal plating, anodizing, and painting. Annual waste generated are: 830 gals TCA, 212gals paint, 1256 gals mixed solvent, 200 gals waste oil and 38.83 tons of filter cake. Staff prepared an HRS package which shows: Sm=8.52 (Sgw=14.69, Ssw=0.16, Sa=1.23) Sfe=16.04, & Sdc=1.39. Staff recommends referral to the local agency.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev (ft)	Site	DB
					<p>Document Type: Site Screening Date Completed: 1/9/1992 Comments: The SSI Report was reviewed by Region 4 staff. The former Diversified Chemical Corp. (Di-Chem) property occupied both sides of Electric Ave. N. of Court St. in the City of Stanton, Orange County. Presently, the property is occupied by: Paint Illustrations by Linda, California Comfort Vans, Boyd's Hotrods, and Charbonneau Tractor Maintenance. All the properties have controlled access. The buildings are still in place but the underground tanks are either removed or in process of being removed under the oversight of Orange County Health Care Agency. EPA recommended NFA because: a clay layer overlies the drinking water aquifers; there is a lack of drinking water or food chain targets via surface water; and low potential for air release because the majority of the site is paved. No sampling was done by EPA, but results of OCHCA's sampling (1989) done during underground tank removal was used. Staff recommends PEARM to determine if there is a risk that DTSC should address in the future.</p> <p>Activity Type: Completed Activities</p> <p>Doc Link: Area Name: Sub Area:</p>

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Jun 27, 2016

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Jun 27, 2016

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Jun 27, 2016

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Mar 07, 2016

SEMS List 8R Archive Sites:

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Mar 07, 2016

Comprehensive Environmental Response, Compensation and Liability Information System -

CERCLIS

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jun 21, 2016

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jun 21, 2016

RCRA Generator List:

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jun 21, 2016

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jun 21, 2016

RCRA Conditionally Exempt Small Quantity Generators List:

[RCRA CESQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt Small Quantity Generators (CESQG) generate 100 kilograms or less per month of hazardous waste or one kilogram or less per month of acutely hazardous waste.

Government Publication Date: Jun 21, 2016

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jun 21, 2016

Federal Engineering Controls-ECs:

FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jul 30, 2014

Federal Institutional Controls- ICs:

FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Jul 30, 2014

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 7, 2015

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jul 14, 2016

State

State Response Sites:

RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jun 30, 2016

EnviroStor Database:

ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Apr 28, 2016

Solid Waste Information System (SWIS):

SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Jul 15, 2016

EnviroStor Hazardous Waste Facilities:

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jul 18, 2016

Land Disposal Sites:

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Aug 24, 2016

Leaking Underground Fuel Tank Reports:

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jun 06, 2016

Delisted Leaking Storage Tanks:

DLST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Jul 07, 2016

Permitted Underground Storage Tank (UST) in GeoTracker:

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jul 18, 2016

Aboveground Storage Tanks:

AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

Delisted Storage Tanks:

DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Jul 18, 2016

Proposed Closure of Underground Storage Tank Cases:

UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Jul 07, 2016

Historical Hazardous Substance Storage Information Database:

HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jul 18, 2016

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Jul 12, 2016

Deed Restrictions and Land Use Restrictions:

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Aug 11, 2016

Voluntary Cleanup Program:

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jul 18, 2016

GeoTracker Cleanup Sites Data:

[CLEANUP SITES](#)

A list of cleanup sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jun 06, 2016

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:

[INDIAN LUST](#)

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Jan 31, 2016

Underground Storage Tanks (USTs) on Indian Lands:

[INDIAN UST](#)

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Jan 31, 2016

Delisted Tribal Leaking Storage Tanks:

[DELISTED ILST](#)

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Jan 31, 2016

Delisted Tribal Underground Storage Tanks:

[DELISTED IUST](#)

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Jan 31, 2016

County

Alameda County LOP Sites List:

[ALAMEDA LOP](#)

A list of Leaking Underground Storage Tanks (LUST) facilities in Alameda County. This list is made available by Alameda County Department of Environmental Health (ACEH). ACEH implements a Local Oversight Program (LOP) under contract with the State Water Resources Control Board to provide regulatory oversight of the investigation and cleanup of soil and groundwater contamination from leaking petroleum USTs.

Government Publication Date: Jun 22, 2016

Alameda County UST List:

[ALAMEDA UST](#)

A list of all registered Underground Storage Tanks (USTs) in the County of Alameda. The list is made available by Alameda County Department of Environmental Health.

Amador County CUPA List:

[AMADOR CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Amador County. This list is made available by Amador County Environmental Health Department which is the CUPA for Amador County and administers a consolidated hazardous materials program.

Government Publication Date: Jun 06, 2016

Butte County CUPA List:

[BUTTE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Butte County. This list is made available by Butte County Public Health Department, Environmental Health Division which was certified by the California Environmental Protection Agency as the CUPA for Butte County.

Government Publication Date: Jul 01, 2016

Calaveras County CUPA Facilities List:

[CALAVERAS CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Calaveras. This list is made available by Calaveras County Environmental Health Department which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Jun 21, 2016

Calaveras County Landfills List:

[CALAVERAS LF](#)

A list of landfills in Calaveras County. This list is made available by Calaveras County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jun 21, 2016

Calaveras County UST Remediation Sites:

[CALAVERAS LUST](#)

A list of Leaking Underground Storage Tank (LUST) facilities in Calaveras County. This list is made available by Calaveras County Environmental Health Department. Local Implementing Agency (LIA) provides oversight of site remediation with soil contamination while CalEPA - California Regional Water Quality Control Board - Central Valley Region oversees remediation of sites with groundwater contamination.

Government Publication Date: Jun 20, 2016

Colusa County CUPA List:

[COLUSA CUPA](#)

A list of facilities associated with Business Plan and Hazardous Generator programs in the County of Colusa. This list is made available by Colusa County Environmental Health which was certified by the California Environmental Protection Agency as Certified Unified Program Agency for Colusa County.

Government Publication Date: Jan 26, 2016

Contra Costa County CUPA List:

[CONTRACO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Contra Costa. This list is made available by Contra Costa County which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Jul 21, 2016

Del Norte County CUPA Facility List:

[DELNORTE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Del Norte County. This list is made available by Del Norte County Environmental Health Division which is the designated CUPA for the county.

Government Publication Date: Jul 21, 2016

EI Dorado County CUPA Facility List:

[ELDORADO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in EI Dorado County. This list is made available by EI Dorado County Department of Environmental Management - Hazardous Waste Division which is approved by CalEPA as CUPA for EI Dorado County.

Government Publication Date: May 24, 2016

Fresno County CUPA/Solid Waste Programs Resource List:

[FRESNO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Fresno County. This list is made available by Fresno County Department of Environmental Health Division which is approved by Cal-EPA as CUPA for the County.

Government Publication Date: Jul 13, 2016

Humboldt County CUPA Facility List:

[HUMBOLDT CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Humboldt County. This list is made available by Humboldt County Division of Environmental Health which is approved by the State Secretary for Environmental Protection as CUPA for the County.

Imperial County CUPA Facility List:

[IMPERIAL CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Imperial County. This list is made available by the California Department of Toxic Substances Control (DTSC) which is appointed as CUPA for Imperial County.

Government Publication Date: Apr 28, 2016

Inyo County CUPA Facility List:

[INYO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Inyo. This list is made available by the Inyo County Environmental Health Services Department which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Jul 11, 2016

Kern County CUPA List:

[KERN CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Kern. This list is made available by Kern County Environmental Health Services Department which has been certified by CalEPA to implement the Unified program as a CUPA for Kern County.

Government Publication Date: May 20, 2016

Kern County UST List:

[KERN UST](#)

A list of all registered and inactive Underground Storage Tanks in the County of Kern. The list is made available by Kern County Environmental Health Division.

Government Publication Date: May 17, 2016

Kings County CUPA Facility List:

[KINGS CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Kings County. This list is made available by Kings County Department of Public Health which is appointed as CUPA for the county.

Government Publication Date: Jul 25, 2016

Lake County CUPA Facility List:

[LAKE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Lake County. This list is made available by Lake County Division of Environmental Health which is CUPA for the entire county.

Government Publication Date: Aug 15, 2016

Los Angeles County - El Segundo City Underground Storage Tanks List:

[ELSEGUNDO UST](#)

A list of all registered Underground Storage Tanks (USTs) in the City of El Segundo of Los Angeles County. The list is made available by El Segundo City Fire Department.

Government Publication Date: Mar 11, 2016

Los Angeles County - Torrance City Underground Storage Tanks:

[TORRANCE UST](#)

A list of registered Underground Storage Tank (UST) sites in Torrance City of Los Angeles County. This list is made available by Torrance City Office of Clerk.

Government Publication Date: Jun 23, 2016

Los Angeles County HMS List:

[LA HMS](#)

This list contains sites that have or had permits for Industrial Waste, Underground Storage Tanks, or Storm water in the County of Los Angeles. This list is made available by the County of Los Angeles Department of Public Works.

Government Publication Date: May 17, 2016

Los Angeles County Long Beach UST List:

[LA LONGB UST](#)

A list of all registered active Underground Storage Tanks in the City of Long Beach of Los Angeles County. The list is made available by Long Beach Certified Unified Program Agency.

Government Publication Date: Jan 6, 2016

Los Angeles County Solid Waste Sites:

[LA SWF](#)

List of permitted solid waste facilities, closed landfills, historical dumpsites and other solid waste sites in Los Angeles County, made available by the Department of Public Works in Los Angeles County.

Government Publication Date: Jul 07, 2016

Madera County CUPA Facility List:

[MADERA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Madera County. This list is made available by Madera County Environmental Health Department which is CUPA for the entire county.

Government Publication Date: Jun 16, 2016

Marin County CUPA List:

[MARIN CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Marin. This list is made available by Marin County which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Jul 28, 2016

Merced County CUPA Facilities List:

[MERCED CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Merced. This list is made available by Merced County which has been certified by CalEPA to implement the Unified program as a CUPA for the entire county.

Government Publication Date: Jul 16, 2016

Mono County CUPA Facility List:

[MONO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Mono County. This list is made available by Mono County Environmental Health Department which has been certified by CalEPA to implement the Unified program as a CUPA for the entire county.

Government Publication Date: Jun 22, 2016

Monterey County CUPA Facility List:

[MONTEREY CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Monterey County. This list is made available by Monterey County Hazardous Materials Management Services which is designated as the CUPA in Monterey County.

Government Publication Date: Aug 05, 2016

Napa County UST List:

[NAPA UST](#)

A list of all registered active Underground Storage Tanks (USTs) in the County of Napa. This list is made available by Napa County Environmental Health Division.

Government Publication Date: Mar 09, 2016

Nevada County CUPA Facility List:

[NEVADA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Nevada County. This list is made available by Nevada County Department of Environmental Health which is the CUPA for all cities and unincorporated areas within Nevada County.

Government Publication Date: Jul 25, 2016

Orange County Aboveground Petroleum Storage Tank Listing:

[ORANGE AST](#)

A list of Aboveground Petroleum Storage Tank (APST) facilities inspected by Orange County Certified Unified Program Agency (CUPA) Under the Aboveground Petroleum Storage Act (APSA). This list is made available by the Environmental Health Division of Orange County Health Care Agency.

Government Publication Date: Jul 01, 2016

Orange County Underground Storage Tanks Listing:

[ORANGE UST](#)

A list of registered Underground Storage Tank (UST) sites in Orange County. This list is made available by Orange County Health Care Agency (OCHCA), Environmental Health Division which oversees the underground storage tank inspection program in most of the cities of Orange County, with the exception of Anaheim, Fullerton, and Orange.

Government Publication Date: Jul 01, 2016

Placer County CUPA Facilities List:

[PLACER CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Placer County. This list is made available by Placer County Environmental Health which is designated CUPA for all areas of the county except for the City of Roseville.

Government Publication Date: Jul 28, 2016

Riverside County Local Oversight Program List:

[RIVERSIDE LOP](#)

A list of Leaking Underground Storage Tank (LUST) facilities in Riverside County. This list is made available by Riverside County Department of Environmental Health. Environmental Cleanup Program provides oversight of assessments and cleanups at properties that have been, or may have been, contaminated with hazardous substances from LUSTs or releases associated with other commercial/industrial use.

Government Publication Date: May 18, 2016

Riverside County Underground Storage Tanks List:

[RIVERSIDE UST](#)

A list of registered Underground Storage Tank (UST) sites in Riverside County. This list is made available by Riverside County Department of Environmental Health. The Hazardous Materials Management Branch (HMMB) regulates and oversees the inspections of constructions, repairs, upgrades, system operation and removal of UST systems.

Government Publication Date: May 18, 2016

Sacramento County Master Hazardous Materials Facility List:

[SACRAMENTO HAZ](#)

A list of Hazardous Materials Facilities in Sacramento County. This list is made available by Sacramento County Environmental Management Department which has been designated as the Certified Unified Program Agency (CUPA) for the County.

Government Publication Date: May 02, 2016

Sacramento Toxic Site Cleanup List:

[SACRAMENTO TOX](#)

Sacramento County Environmental Management Department (EMD)'s Toxic Site Cleanup List includes sites where unauthorized releases of potentially hazardous materials have occurred. The EMD's Site Assessment & Mitigation Program, also referred to as Toxic Site Cleanup Program, provides mandated regulatory oversight of the assessment and remediation of properties on which there has been a release of hazardous materials to soil and/or groundwater.

Government Publication Date: Aug 22, 2016

San Bernardino County CUPA List:

[SANBERN CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Bernardino County. This list is made available by San Bernardino County Fire Department which is the CUPA for all areas of the County except the city of Victorville.

Government Publication Date: Jul 25, 2016

San Diego County Hazardous Materials Management Division Database:

[SANDIEGO HAZ](#)

A list of facilities with Unified Program Facility Permit in San Diego County. This list has been made available by County of San Diego Environmental Health.

Government Publication Date: Jun 19, 2016

San Diego County Site Assessment and Mitigation Investigation Sites:

[SANDIEGO SAM](#)

List of sites which have undergone a Site Assessment and Mitigation investigation. This list is made available by the County of San Diego Department of Environmental Health.

Government Publication Date: Jul 18, 2016

San Diego County Solid Waste Facility List:

[SANDIEGO SWF](#)

A list of open and closed Solid Waste Facilities in the County of San Diego. The list is made available by San Diego County Department of Environmental Health.

Government Publication Date: Aug 12, 2016

San Francisco County Aboveground Storage Tanks List:

[SANFRAN AST](#)

A list of Aboveground Storage Tanks (ASTs) facilities inspected by San Francisco Department of Public Health's (SFDPH) Hazardous Materials and Waste Program. Aboveground storage containers or tanks include oil-filled equipment (such as hydraulic systems/reservoirs and heat transfer systems) which have a petroleum storage capacity of 55 gallons or greater.

Government Publication Date: Jun 27, 2016

San Francisco County CUPA Facilities List:

[SANFRAN CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Francisco County. This list is made available by San Francisco County Hazardous Materials and Waste Program which is the CUPA for all areas of the County.

Government Publication Date: Jun 27, 2016

San Francisco County LOP Sites:

[SANFRAN LOP](#)

A list of Underground Storage Tank (UST) release sites in the County of San Francisco. This list is made available by San Francisco County Department of Public Health Environmental Health Protection Branch.

Government Publication Date: May 25, 2016

San Francisco County UST List:

[SANFRAN UST](#)

A list of all registered Underground Storage Tanks (USTs) in the County of San Francisco. This list is made available by San Francisco County Environmental Health Division. The Hazardous Materials and Waste Program provides regulatory oversight for the construction, operation, repair and removal of USTs in San Francisco.

San Joaquin County Aboveground Tank List:

[SANJOAQUIN AST](#)

A list of Aboveground Storage Tanks (ASTs) inspected by San Joaquin County Environmental Health Department (SJCEHD) under Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Jul 22, 2016

San Joaquin County UST List:

[SANJOAQUIN UST](#)

A list of all registered Underground Storage Tanks in the County of San Joaquin. The list is made available by San Joaquin County Environmental Health Division.

Government Publication Date: Jul 22, 2016

San Joaquin Hazardous Waste Facilities:

[SANJOAQUIN HW](#)

A list of Hazardous Waste Facilities in San Joaquin County. This list is made available by San Joaquin County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jul 22, 2016

San Mateo County CUPA Facilities List:

[SANMATEO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Mateo County. This list is made available by San Mateo County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: May 2, 2016

San Mateo County LOP List:

[SANMATEO LOP](#)

A list of Leaking Underground Storage Tank (LUST) facilities in San Mateo County. This list is made available by San Mateo County Environmental Health Services Division.

Government Publication Date: May 10, 2016

Santa Clara County CUPA Facilities List:

[SANTA CLARA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental Health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: Jun 01, 2016

Santa Clara Local Oversight Program Listing:

[SANTA CLARA LO](#)

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jul 07, 2016

Santa Cruz County CUPA Facility List:

[SANTACRUZ CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Cruz County. This list is made available by Santa Cruz County Environmental Health Services (EHS) Division which has been designated as the CUPA for the County.

Government Publication Date: Jul 20, 2016

San Luis Obispo County CUPA Facilities List:

[SANLUI SOB CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Luis Obispo County. This list is made available by County of San Luis Obispo Environmental Health Services Division which has been designated as the CUPA for the County.

Government Publication Date: Aug 01, 2016

Shasta County CUPA Facility List:

[SHASTA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Shasta County. This list is made available by Shasta County Environmental Health Division which has been designated as the CUPA for Shasta County by CalEPA.

Government Publication Date: May 19, 2016

Solano County CUPA List:

[SOLANO CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Solano. This list is made available by Solano County Environmental Health Division which has been certified by CalEPA to implement the Unified program as a CUPA.

Solano County Local Oversight Program List:

[SOLANO LOP](#)

A list of Leaking Underground Storage Tank (LUST) facilities in the Solano County. This list is made available by the Solano County Environmental Health Services. Since April 1993, the State Water Resources Control Board has contracted with the County of Solano to provide regulatory oversight for the cleanup of LUSTs under Local Oversight Program (LOP) contract.

Government Publication Date: Aug 04, 2016

Solano County Underground Storage Tanks List:

[SOLANO UST](#)

A list of all registered Underground Storage Tanks (USTs) in the County of Solano. The list is made available by Solano County Environmental Health Services Division. There are an estimated 190 facilities throughout the county that are subject to the regulatory requirements of the UST program.

Government Publication Date: Aug 04, 2016

Sonoma County CUPA Facilities List:

[SONOMA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sonoma County. This list is made available by Sonoma County Hazardous Materials (HazMat) Division which has been designated as the CUPA for the County.

Government Publication Date: Jul 08, 2016

Sonoma County LOP Site List:

[SONOMA LOP](#)

A list of Leaking Underground Storage Tank (LUST) facilities in Sonoma County. This list is made available by Sonoma County Department of Health Services. Sonoma County Local Oversight Program (LOP) oversees the investigation and cleanup of fuel releases from underground storage tanks in all areas of the County with the exception of the Cities of Santa Rosa and Healdsburg.

Government Publication Date: Jul 01, 2016

Sonoma County Petaluma City CUPA Facilities:

[SONOMA PETAL](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Petaluma City, as well as Closed files including pre-CUPA sites. This list is made available by Petaluma Fire Prevention Bureau which is the CUPA for Petaluma City in Sonoma County.

Government Publication Date: Jul 26, 2016

Sutter County CUPA List:

[SUTTER CUPA](#)

A list of facilities associated with Aboveground Petroleum Storage Tank (APSA) regulation, Hazardous Materials Business Plan (HMBP) Program and Underground Storage Tank (UST) regulation of Certified Unified Program Agency (CUPA) programs in Sutter County. This list is made available by Sutter County Environmental Health Division which has been designated as the CUPA for the County.

Government Publication Date: Jul 15, 2016

Tuolumne County CUPA Facility List:

[TUOLUMNE CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Tuolumne County. This list is made available by Tuolumne County Environmental Health which is the CUPA for all areas of the County.

Government Publication Date: May 2, 2016

Ventura County CUPA Facilities List:

[VENTURA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Ventura County. This list is made available by Ventura County Environmental health Division.

Government Publication Date: Jul 28, 2016

Ventura County City of Oxnard CUPA Facility List:

[OXNARD CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Oxnard City. This list is made available by Oxnard City Fire Department which is the CUPA for Oxnard City in Ventura County.

Government Publication Date: May 04, 2016

Ventura County Inactive Underground Storage Tanks Sites:

[VENTURA INUST](#)

A list of inactive Underground Storage Tank (UST) sites in Ventura County. This list is made available by Ventura County Environmental Health Division.

Government Publication Date: Jul 21, 2016

Ventura County Leaking Underground Fuel Tanks - Historic:

[VENTURA HLUFT](#)

A historical list of cleanup oversight of the Leaking Underground Fuel Tank (LUFT) program provided by Ventura County Environmental Health Division. All new and existing underground fuel storage tank releases are now referred to the Los Angeles Regional Water Quality Control Board.

Yolo County UST List:

[YOLO UST](#)

A list of registered Underground Storage Tank (UST) sites in Yolo County. This list is made available by Yolo County Environmental Health Department which regulates the construction, operation, repair and removal of USTs throughout Yolo County.

Government Publication Date: Jul 25, 2016

Yuba County CUPA Facilities List:

[YUBA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Yuba County. This list is made available by Yuba County Environmental Health Division which is the CUPA for all areas of the County.

Government Publication Date: Aug 03, 2016

City of Bakersfield CUPA List:

[BKRSFIELD CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Bakersfield. This list is made available by the City of Bakersfield Fire Department.

Government Publication Date: Jul 29, 2016

Gilroy City CUPA Facilities List:

[SANTA CLARA GIL](#)

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Apr 26, 2016

Alpine County CUPA List:

[ALPINE CUPA](#)

The Alpine County Health Department has been certified by Cal / EPA to implement the Unified program and maintains a list of Certified Unified Program Agency (CUPA) facilities.

Government Publication Date: Feb 24, 2015

Glenn County CUPA List:

[GLENN CUPA](#)

The Glenn County Air Pollution Control District is the Administering Agency and the Certified Unified Program Agency (CUPA) for Glenn County with responsibility for regulating hazardous materials handlers, hazardous waste generators, underground storage tank facilities, above ground storage tanks, and stationary sources handling regulated substances.

Government Publication Date: Aug 02, 2016

Lassen County CUPA List:

[LASSEN CUPA](#)

The Environmental Health Program of Lassen County tracks Certified Unified Program Agencies (CUPA) facilities.

Government Publication Date: Jul 28, 2016

Mariposa County CUPA List:

[MARIPOSA CUPA](#)

Mariposa County Health Department, Environmental Health Services, is certified by Cal-EPA as the Certified Unified Program Agency (CUPA) that administers specific hazardous materials/hazardous waste programs.

Government Publication Date: Jun 23, 2016

Plumas County CUPA List:

[PLUMAS CUPA](#)

In Plumas County, the Environmental Health Department is the designated Certified Unified Program Agency (CUPA) that consolidates and coordinates administrative activities such as permits, inspections, and enforcement. CUPA Programs include Hazardous Materials Business Plan (HMBP), Underground Storage Tanks (USTs), Above Ground Storage Tanks (AGTs), Hazardous Waste Generators (HWG) and CAL-ARP.

Government Publication Date: Apr 14, 2016

Siskiyou County CUPA List:

[SISKIYOU CUPA](#)

The Hazardous Materials Management Group of Siskiyou County's Environmental Health Division Certified Unified Program Agency (CUPA) regulates underground tanks, hazardous materials (including but not limited to: hazardous substances, hazardous waste, and any material which a handler or the CUPA has reasonable basis for believing that it would be injurious to the health and safety of persons or harmful to the environment if released into the workplace or the environment.

Government Publication Date: May 18, 2016

Stanislaus County CUPA List:

[STANISLAUS CUPA](#)

The Environmental Resources Department of Stanislaus County maintains a list of Certified Unified Program Agency (CUPA) facilities.

Trinity County CUPA List:

[TRINITY CUPA](#)

On January 1, 2005, the Department of Toxic Substances Control (DTSC) was authorized by the California Environmental Protection Agency (Cal/EPA) as the Trinity County Certified Unified Program Agency (CUPA). This CUPA list was made available by the DTSC.

Government Publication Date: Jul 08, 2016

Tulare County CUPA List:

[TULARE CUPA](#)

The Certified Unified Program Agency (CUPA) unifies and consolidates under one roof the various requirements for businesses handling hazardous materials, generating or treating hazardous wastes, or operating aboveground or underground storage tanks. CUPA thereby enhances consistency, reduces duplication, and simplifies compliance for the regulated public. The Tulare County Environmental Health Division was certified as a CUPA in December, 1996.

Government Publication Date: Jul 07, 2016

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

Government Publication Date: Mar 9, 2016

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Dec 31, 2014

Hazardous Materials Information Reporting System:

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: May 10, 2016

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: May 17, 2016

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA of the Act) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Toxic Substances Control Act:

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Jun 30, 2014

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Nov 12, 2013

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. It is comprised of states with established drycleaner remediation programs. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: May 09, 2016

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: May 24, 2016

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 20, 2016

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Dec 31, 2013

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC.

Government Publication Date: Jul 13, 2016

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Feb 19, 2016

State

EnviroStor Inspection, Compliance, and Enforcement:

INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Jul 15, 2016

Clandestine Drug Lab Sites:

CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Dec 31, 2015

School Property Evaluation Program Sites:

SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jul 19, 2016

California Hazardous Material Incident Report System (CHMIRS):

CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jun 03, 2016

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Hazardous Waste Manifest Data:

HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 2, 2015

Historical Hazardous Waste Manifest Data:

[HIST MANIFEST](#)

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

Historical California Hazardous Material Incident Report System (CHMIRS):

[HIST CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Cease and Desist Orders and Cleanup and Abatement Orders:

[CDO/CAO](#)

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

Drycleaner Facilities:

[DRYCLEANERS](#)

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: May 20, 2016

Tribal

No Tribal additional environmental record sources available for this State.

County

Los Angeles County Site Mitigation List:

[LA SML](#)

A Site Mitigation List in the County of Los Angeles. The list is made available by Los Angeles County Fire Department. Site mitigation is handled by the Site Mitigation Unit (SMU) which facilitates completion of site clean-up projects of contaminated sites in an expeditious manner in all cities of the Los Angeles County except El Segundo, Glendale, Long Beach, Santa Fe Springs, and Vernon.

Government Publication Date: Jun 23, 2015

Riverside County Disclosure Facility List:

[RIVERSIDE HZH](#)

A list of facilities disclosed to Riverside County Department of Environmental Health (DEH). This list is made available by Riverside County DEH which has been designated as the CUPA for the County. A business is required to establish and submit a Business Plan if the facility handles hazardous material equal to or greater than 55 gallons, 500 pounds or 200 cubic feet at any time during the year.

Government Publication Date: May 18, 2016

Riverside County Hazardous Waste Generator Sites List:

[RIVERSIDE HWG](#)

A list of Hazardous Waste Generator Sites in the County of Riverside. This list is made available by Riverside County Department of Environmental Health which has been designated as the CUPA for the County.

Government Publication Date: May 18, 2016

San Joaquin County Hazardous Materials Facilities List:

[SANJOAQUIN HM](#)

A list of Hazardous Materials Facilities in San Joaquin County. This list is made available by San Joaquin County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jul 22, 2016

Ventura County Hazardous Material Release (Prop 65) Sites:

[VENTURA HAZR](#)

A historic list of hazardous material releases from the Hazardous Material Release Report collected by the Environmental Health Division of Ventura County. As per the department this report contains records from 1987 to 2014.

Government Publication Date: 1987 - 2014

Ventura County Inactive Hazardous Waste Sites:

HW INACTIVE

A list of Inactive Hazardous Waste Sites in Ventura County collected by Ventura County's Environmental Health Division.

Government Publication Date: Jun 28, 2016

Delisted County Records:

DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Aug 15, 2016

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

FIRE INSURANCE MAP RESEARCH RESULTS

Date: 2016-08-04

Order Number:20160804105

10711 Dale Ave, Stanton, CA, 90680

ERIS has searched our in-house collection of close to 1 million Fire Insurance Maps for the address at 10711 Dale Ave, Stanton, CA, 90680.

Please note that no information was found for your site or adjacent properties.

If you have any questions regarding the enclosed information, please do not hesitate to contact us.

Individual Fire Insurance Maps for the subject property and/or adjacent sites are included with the ERIS environmental database report to be used for research purposes only and cannot be resold for any other commercial uses other than for use in a Phase I environmental assessment.

Address: 38 Lesmill Road Unit 2, Toronto, ON M3B 2T5
Phone: 416-510-5204 Fax: 416-510-5133

13.5 Qualifications of the Environmental Professionals

Advantage Environmental Consultants, LLC

ENVIRONMENTAL DUE DILIGENCE AND REMEDIATION SPECIALISTS

GREGORY N. STULL, REA **Project Manager – Western Regional Office**

EDUCATION

- Bachelor of Arts- Environmental Studies – Connecticut College, New London, CT (2001)
- Certificate of Urban Planning and Development – University of California San Diego, San Diego, CA (2009)

PROFESSIONAL REGISTRATIONS, LICENSES, AND CERTIFICATIONS

- Registered Environmental Assessor #30072 in the State of California
- OSHA 40-hour Hazardous Waste Operations Worker and Supervisor Certifications and Annual Refreshers

PROFESSIONAL SUMMARY

Mr. Stull is a project manager with AEC's western regional office based in the City of San Marcos, San Diego County, California. He has 10 years of experience in the environmental sciences and consulting fields and is supported by Professional Geologists, Engineers and other technical team members of AEC staff. His responsibilities at AEC include project management, technical oversight and quality control for assessment and remediation services, project staffing, and office financial management. Mr. Stull also completes technical services (including field activities) required of select projects completed by AEC. He has a proven ability to manage personnel, subcontractors, and interact with clients. Such clientele include local government entities, redevelopment agencies, affordable housing developers, Federal government entities, environmental and land use attorneys, architectural and engineering firms, commercial lending institutions, conservancies, commercial/industrial real estate owners/managers, insurance companies, and real estate developers. He is also very experienced in the completion of assessment, construction and remediation quality assurance during the completion of urban redevelopment/brownfields projects, many of which have been located in downtown San Diego, Los Angeles and other urban communities throughout the State of California.

PROFESSIONAL EXPERIENCE

Mr. Stull has completed over 300 due diligence related environmental assessments (i.e. Phase I ESAs, Transaction Screen Analyses, etc.) and has managed over 200 subsurface environmental investigations of soil gas, soil and/or groundwater. Such investigations have also included human health risk assessments, evaluations of indoor air conditions based on interpretations of subsurface conditions, underground storage tank (UST) evaluation/closure and hazardous waste characterization/management. Subsurface activities performed include the completion of soil borings using various drilling technologies, soil and groundwater sampling, installation and sampling of groundwater monitoring wells, free product evaluations, exploratory trenching and real-time delineation using mobile analytical laboratories and other soil screening technology. Assets evaluated include industrial, commercial, residential, agricultural and vacant land sites throughout California, with many of the assessments completed under the regulatory oversight of local environmental regulatory agencies, the California Regional Water Quality Control Boards (RWQCBs) and the California Environmental Protection Agency Department of Toxic Substances Control (DTSC). Mr. Stull has also conducted and/or managed drinking water assessments, asbestos containing materials (ACM) and lead-based paint (LBP) surveys. Mr. Stull has managed over 10 remediation related projects primarily related to source removal of subsurface contaminants including but not limited to petroleum hydrocarbons, chlorinated solvents, heavy metals, organochlorine pesticides and other agricultural related chemicals, dioxins and furans and polychlorinated biphenyls (PCBs).

Advantage Environmental Consultants, LLC

ENVIRONMENTAL DUE DILIGENCE AND REMEDIATION SPECIALISTS

DANIEL A. WEIS, R.E.H.S. Branch Manager – Western Regional Office

EDUCATION

- Bachelor of Arts - University of Delaware, Newark, DE (1995)
- Master of Science – Public Health, San Diego State University, San Diego, CA (1998)

PROFESSIONAL REGISTRATIONS, LICENSES, AND CERTIFICATIONS

- Registered Environmental Health Specialist #8172 in the State of California
- OSHA 40-hour Hazardous Waste Operations Worker and Supervisor Certifications and Annual Refreshers

PROFESSIONAL SUMMARY

Mr. Weis is the branch manager of AEC's western regional office based in the City of San Marcos, San Diego County, California. He has 14 years of experience in the environmental sciences and consulting fields and is supported by Professional Geologists, Engineers and other technical team members of AEC staff. His responsibilities at AEC include client development and management, project management, technical oversight and quality control for assessment and remediation services, project staffing, and office financial management. Mr. Weis also completes technical services (including field activities) required of select projects completed by AEC. He has a proven ability to manage multiple personnel and technical projects, negotiate with regulatory agencies and maintain strong and trusting client relationships. Such clientele include but are not limited to local government entities, redevelopment agencies, affordable housing developers, Federal government entities, environmental and land use attorneys, architectural and engineering firms, commercial lending institutions, conservancies, commercial/industrial real estate owners/managers, insurance companies, wireless telecommunication carriers and real estate developers. He is also very experienced in the completion of assessment, construction and remediation quality assurance during the completion of urban redevelopment/brownfields projects, many of which have been located in downtown San Diego, Los Angeles and other urban communities throughout the State of California. Mr. Weis has a deep understanding of environmental due diligence guidelines including:

- American Society for Testing and Materials (ASTM) E1527-13, Standard Practice for Environmental Site Assessments (ESAs)
- ASTM E2247-08, Standard Practice for ESA: Phase I ESA Process for Forestland or Rural Properties
- ASTM E1903-97 (Re-approved 2002), Standard Practices for Environmental Site Assessments: Phase II ESA Process
- ASTM E2600-10, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions
- 40 Code of Federal Regulations (CFR) Part 312 Standards for Conducting All Appropriate Inquiry (AAI)
- 33 CFR Part 137 Oil Spill Liability Standards for Conducting AAI
- United States Department of Housing and Urban Development Guide to Multifamily Accelerated Processing
- Other financial institution specific guidelines including The United States Small Business Administration, Fannie Mae and Freddie Mac

PROFESSIONAL EXPERIENCE

Mr. Weis has completed over 1,000 due diligence related environmental assessments (i.e. Phase I ESAs, Transaction Screen Analyses, etc.) and has managed over 200 subsurface environmental investigations of soil gas, soil and/or groundwater. Such investigations have also included human health and ecological risk assessments, evaluations of indoor air conditions based on interpretations of subsurface conditions, underground storage tank (UST) evaluation/closure and hazardous waste characterization/management. Subsurface activities performed include the completion of soil borings using various drilling technologies, soil and groundwater sampling, installation and sampling of groundwater monitoring wells, free product evaluations, exploratory trenching and real-time delineation using mobile analytical laboratories and other soil screening technology. Assets evaluated include industrial, commercial, residential, agricultural and vacant land sites throughout the State of California and numerous additional states of the Nation, with many of the assessments completed under the regulatory oversight of local environmental regulatory agencies, the California Regional Water Quality Control Boards (RWQCBs) and the California Environmental Protection Agency Department of Toxic Substances Control (DTSC). Mr. Weis has also conducted and/or managed hundreds of public/environmental health related assessments including electromagnetic field surveys, radionuclide surveys, indoor air quality investigations, radon surveys, drinking water assessments, asbestos containing materials (ACM) and lead-based paint (LBP) surveys and mold/microbial evaluations.

Mr. Weis has managed over 50 remediation related projects primarily related to source removal of subsurface contaminants including but not limited to petroleum hydrocarbons, chlorinated solvents, heavy metals, organochlorine pesticides and other agricultural related chemicals, dioxins and furans and polychlorinated biphenyls (PCBs). Cost effective solutions and various remedial action options are provided prior to remedial action implementation. He is very proficient in developing remediation cost estimates and evaluating multiple remedial strategies on specific projects and conducting budget tracking to ensure the accuracy of such estimates during remedial implementation. Mr. Weis also assists clients with the preparation of contractor bid specifications, contractor bid and change order reviews for such projects, contractor agreements and project status reports/updates and has conducted presentations to client personnel, regulatory agencies and/or the public pertaining to such remediation related projects. He has also assisted numerous clients in cost recovery efforts from private parties and State/Federal funding programs for environmental assessment and remediation work.

SPECIFIC PROJECT EXPERIENCE

48 Property State Lands Exchange Project, Various Locations Throughout San Bernardino and Inyo Counties, California - Project director for the completion of a Phase I ESA in accordance with ASTM Practice E 1527-05, 40 CFR Part 312 Standards for Conducting AAI, and other Federal Agency specific guidelines at forty eight State of California School Lands properties ranging in size from 40 acres to 666.54 acres, located in San Bernardino and Inyo Counties, California and either partially or entirely within Death Valley National Park or the Mojave National Preserve. Due to the remoteness of the properties, the site reconnaissance was conducted via helicopter flyover with intermittent landings as needed to evaluate conditions on the properties. Prior to the site reconnaissance, Geographical Information Systems (GIS) technology was utilized to determine the coordinates of each property (corners and center) and such data was subsequently provided to the aviation company in a format compatible with the helicopter's navigation system. Additional components of the ESA (i.e. interviews, regulatory research and historical research) were completed in strict accordance with the applicable guidelines. The assessment revealed no evidence of recognized environmental conditions (RECs) in connection with the properties and additional assessment was not recommended. The assessment also included an evaluation of several non-scope ASTM considerations including ACM, LBP, radon potential and lead in drinking water. None of the non-scope ASTM evaluation items were found to be a potential concern with respect to the subject properties.

Industrial Facility, West Bradley Avenue, El Cajon, California – Technical lead on pre-business acquisition due diligence (i.e. Phase I/II ESAs) at a facility that conducts the manufacturing of forged metal products for the medical field and aerospace/defense industry and that was historically used for related industrial purposes. Investigation revealed releases of chlorinated solvents to the vadose zone and groundwater underlying the facility, as well as off-site sources of chlorinated solvents to the property in groundwater. Two phases of due diligence related subsurface investigation consisted of 25 direct-push soil

borings and the collection of soil, groundwater, and soil gas samples. The analytical laboratory data was evaluated, deliverables were prepared and preliminary evaluations of risk conducted using County of San Diego Department of Environmental Health and DTSC Johnson and Ettinger vapor intrusion risk models. The case was subsequently referred to the DTSC due to permit by rule conditions and Mr. Weis oversaw and participated in the preparation a current conditions report, Facility Investigation (FI) Work plan and Community Profile for the property under a Corrective Action Consent Agreement between the interested parties and the DTSC. The FI Work Plan described the investigation objectives, pertinent background information related to the facility, current conditions, and a description of each identified Solid Waste Management Unit and Area of Concern identified at the facility. The document also included a Quality Assurance Project Plan (QAPP), data management plan and information pertaining to the proposed reporting structure. Mr. Weis also served as the project lead/coordinator for the implementation of the FI Work Plan which included the installation of sub-slab and at-depth soil gas probes and multiple groundwater monitoring wells, and the drilling of several direct-push soil borings. On-going regulatory negotiation is being conducted in efforts to reach a quantifiable approach to future monitoring of subsurface conditions at the property.

Santa Monica Beach Public Restroom Facilities Replacement Project, Santa Monica, California - Project director and lead on the completion of a Phase I ESA in accordance with ASTM Practice E 1527-05 of eight public restroom facilities on the Santa Monica State Beach in the City of Santa Monica, Los Angeles County, California. ACM, LBP and PCB surveys were also completed in conjunction with the ESA. All components of the ESA were completed in strict accordance with the applicable guidelines. The assessment revealed no evidence of RECs in connection with the properties and additional assessment was not recommended. Recommendations were provided regarding abatement of ACM and LBP identified at the facilities.

Seventh and Market Street Property - 7th and 8th Avenues and Market Street, San Diego, California - Project lead and manager for remediation planning assistance associated with a proposed 55,000 square foot mixed-use redevelopment project including a multiple level subterranean parking garage) in downtown San Diego. Subsurface characterization utilized in conjunction with prior site data included the drilling of ten soil borings using a hollow-stem auger drill rig, excavation of ten exploratory test pits using a backhoe and sampling/analysis of soil samples for various contaminants of concern. The additional data obtained was used for evaluating the feasibility of alternative remedial strategies, revising remedial cost estimates for multiple redevelopment scenarios and preparation of a mitigation plan and community health and safety plan for the project. Eligible costs for the site characterization related work were recovered from the State Water Resources Control Board (SWRCB) Orphan Site Cleanup Account (OSCA) program on behalf of the client. Although redevelopment plans for the project changed due to various factors, funding remained secured for the project and remediation work consisting of a removal action of lead and petroleum hydrocarbon impact soil was conducted. Over 15,000 tons of contaminated soil was removed from the property during the remediation effort. Mr. Weis served as the project lead and manager for the remediation phase of work which included the excavation and segregation of lead and petroleum hydrocarbon contaminated soils within an approximately 30,000 square foot remediation area, backfilling the excavation with non-contaminated soil generated from the proposed excavation as well as soil to be imported to the property and reconstruction of the property to City of San Diego surface parking lot standards. The remediation activities required the displacement of approximately 27,000 cubic yards of soil. Pre-remediation work completed by Mr. Weis included revising the mitigation plan to account for changes to the project plan, assistance with the preparation of technical bid specifications pertaining to the proposed site remediation, pre-bid meeting representation and responding to questions/inquiries from prospective bidders regarding the technical specifications, drawings and other items related to the proposed remediation effort and associated construction activity. Over 99% of \$1,500,000 in SWRCB OSCA grant funds for the cleanup was recovered on behalf of the client.

Proposed Charter School Athletic Field Complex, Temple Avenue and Hoover Street, Los Angeles, California - Project lead and manager for the completion of a Phase I and II ESA during a property acquisition due diligence period at this approximately one-acre property located in the northern portion of the downtown area of the City of Los Angeles. The Phase I ESA was completed under ASTM-2005/AAI protocol and supplemental DTSC guidelines. Prior uses of the property included metal plating activity and a gasoline service station. Other deliverables provided and approved by the DTSC included a Preliminary

Environmental Assessment (PEA) Work Plan, QAPP and a Site Specific Health and Safety Plan. Additional subsurface investigation was subsequently completed to close data gaps pertaining to contaminant distribution and remediation costs prior to a removal action completed at the property. Such investigation included the drilling of over 70 soil borings and sample collection/analysis of soil, soil gas and groundwater samples. Remediation (excavation) at the property was completed by on a turn-key basis and consisted of the excavation and disposal of approximately 2,500 cubic yards of metals contaminated soil and removal of a UST under Los Angeles Fire Department oversight. Other duties completed during the course of the project included regulatory negotiation and litigation support. Community outreach associated with the project included a public hearing with the Los Angeles Department of Building and Safety pertaining to the site permit grading and haul route for trucking of contaminated soil and mass mailing of fieldwork notification activities to all properties situated within a 300 foot radius of the property.

Strata - 9th and 10th Avenues and Market Street, San Diego, California – Project manager for the completion of California SWRCB OSCA Program application assistance pertaining to a portion (former gasoline station) of this downtown San Diego redevelopment site, which included a four-level subterranean parking garage. Initial tasks included a review of prior environmental assessments, written response to SWRCB inquiries pertaining to historical site uses and principal contamination sources and preparation of select sections of OSCA Pre-Assessment and Cleanup Grants. Portions of the Grants included a summary of background information pertaining to the property, detailed scopes of work pertaining to prior eligible assessment response work and proposed cleanup response actions and specific budget details. Cost recovery efforts from the OSCA program were successful. Mr. Weis also served as the project lead for general remediation planning assistance which included the preparation of multiple variations of remediation cost estimates for the project and attendance of meetings with the development team. The remediation cost estimate variations were broken down by physical address (parcel) and three contaminant types (lead, chlorinated solvents and petroleum hydrocarbons) and differing combinations of the referenced parameters. The cost estimation included interface with UST removal, excavation, shoring and dewatering contractors, landfill/recycling facilities, trucking companies, vapor barrier design and installation companies and analytical laboratories. Mr. Weis oversaw subsequent third-party oversight activities on behalf of the client as the property was sold to a third-party and included field oversight of remediation activities, budget tracking, invoice approval, compliance with the OSCA Grant conditions, attendance at meetings and other tasks.

Tijuana River Watershed Project, San Diego State University Graduate School of Public Health - In early stages of the project, implemented a stormwater sampling program within various areas of watershed including the use of auto sampling apparatus triggered by rainfall and flow of rivers and creeks of interest. Personally performed analytical laboratory analysis of water and sediment samples using University owned instruments for constituents of concern including heavy metals, nutrients, and bacteriological indicators and maintained chemistry and flow databases for the development of pollutographs, mass loading estimates and calibration of GIS models.
