## **Voluntary California Quality Light-Emitting Diode (LED) Lamp Specification 3.0**

As a laboratory, we need the specification describe the requirements accurately. I think the following issues should be clarified when the 3rd version is finalized.

1. Is there any Interim Certification procedure?.
2. The special test requirements of LED downlight retrofit kits for sample size and aging. We need to confirm if any additional test would be required compared to ENERGY STAR.
3. The distribution requirements for downlight retrofit kits.
4. The family policy for reporting and compliance.

Thank you!
