IN THE MATTER OF:

***Southern California Public Power Authority
Emission Performance Standard
Compliance Filing***

Docket No. 17-EPS-01

I. INTRODUCTION

Pursuant to Public Utilities Code section 8341(e)(1), the Energy Commission established a greenhouse gases emission performance standard (EPS) of 1,100 pounds carbon dioxide per megawatt hour, as codified in Title 20 of the California Code of Regulations, sections 2900 et seq. The Energy Commission is responsible for reviewing all long-term financial commitments entered into by local publicly owned electric utilities for compliance with the EPS.

II. FINDINGS

a. On December 28, 2016, the Southern California Public Power Authority (SCPPA) submitted a compliance filing requesting that the Energy Commission find that SCPPA's Power Purchase Agreement (PPA) with Ormesa LLC for electricity from the Ormesa Geothermal Complex Energy Project, which involves seven renewable geothermal power plants, be determined to be compliant with the EPS;

b. Energy Commission staff reviewed SCPPA's filing and found it complete. Based on its review, staff recommended that the procurement be found to be in compliance with the EPS; and

c. The Energy Commission concurs with staff's recommendation that SCPPA's compliance filing is complete and that the contract with Ormesa LLC, as described in the compliance filing, complies with the EPS.

III. CONCLUSION AND ORDER

The California Energy Commission hereby adopts staff's recommendation and orders that the long-term financial commitment described in SCPPA's compliance filing complies with the Energy Commission's Greenhouse Gases Emission Performance Standard, as codified in Title 20 of the California Code of Regulations, section 2900 *et seq.*

CERTIFICATION

The undersigned Secretariat to the Commission does hereby certify that the foregoing is a full, true, and correct copy of an Order duly and regularly adopted at a meeting of the California Energy Commission held on January 25, 2017.
