Do not approve proposed Puente Power Plant in Oxnard

Please do not approve the proposed natural gas power plant in Oxnard. People need to conserve energy (12 years ago I tried to cut my carbon footprint and went from averaging 30KWH per day to about 11 KWH per day). Also around this time I installed solar panels and have generated more electricity then I use ever since.

We need to convert to renewables ASAP and conserve in the mean time.

Look how much people conserved water during the drought.

We all have to do our part to lower our GHG emissions on an individual level on up.

Please Be responsible for our planet and do your part. Do not build this fossil fuel power plant.
