I oppose Puente Power Project

We do not need another power plant using outdated technology. CA already produces more power than it needs, so we don't need another plant. Newer technology exists which is less harmful to our environment, and that's the source that should be used for future power needs. As a CA taxpayer, I don't want to be paying for 30 years for technology that isn't needed now, that is outdated before it is begun, and will be obsolete before we are done paying for it!
