BUILDING THE PLUG & PLAY GRID

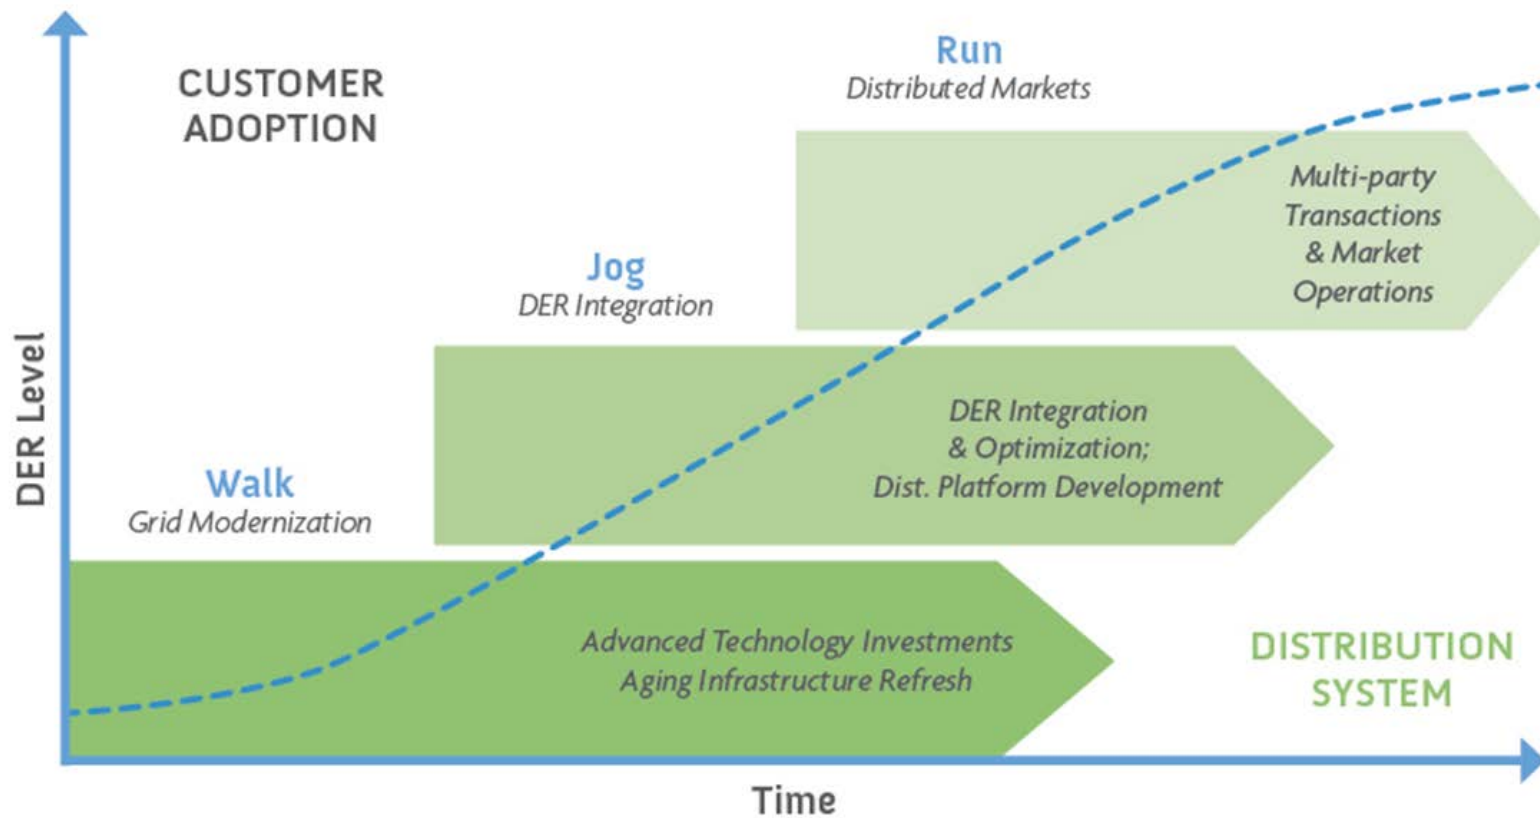

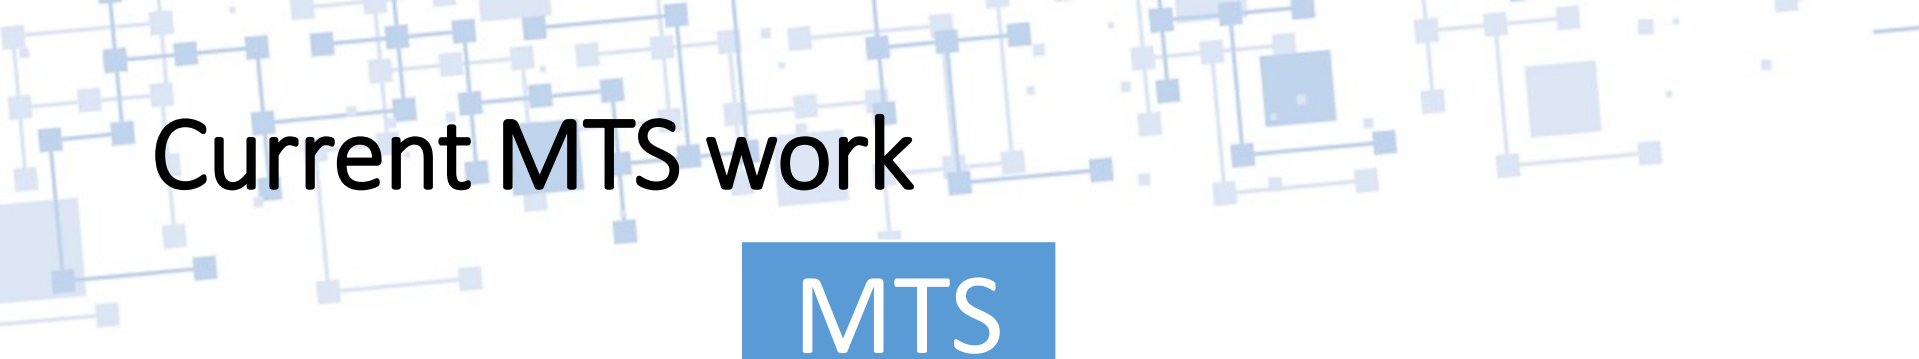

MORE THAN SMART

More Than Smart

- 501 (c)(3) non profit organization based in California and working in a handful of states across the country
- The MTS Mission is to *support policy-makers and stakeholders pursuing cleaner, more reliable, and more affordable electricity service through the integration of distributed energy resources into electricity grids.*
- Provides assistance to states to follow the Walk-Jog-Run framework for modernizing distribution grids through an engineering based framework that acknowledges the unique energy policies of each state.

The Walk-Jog-Run Framework

MTS

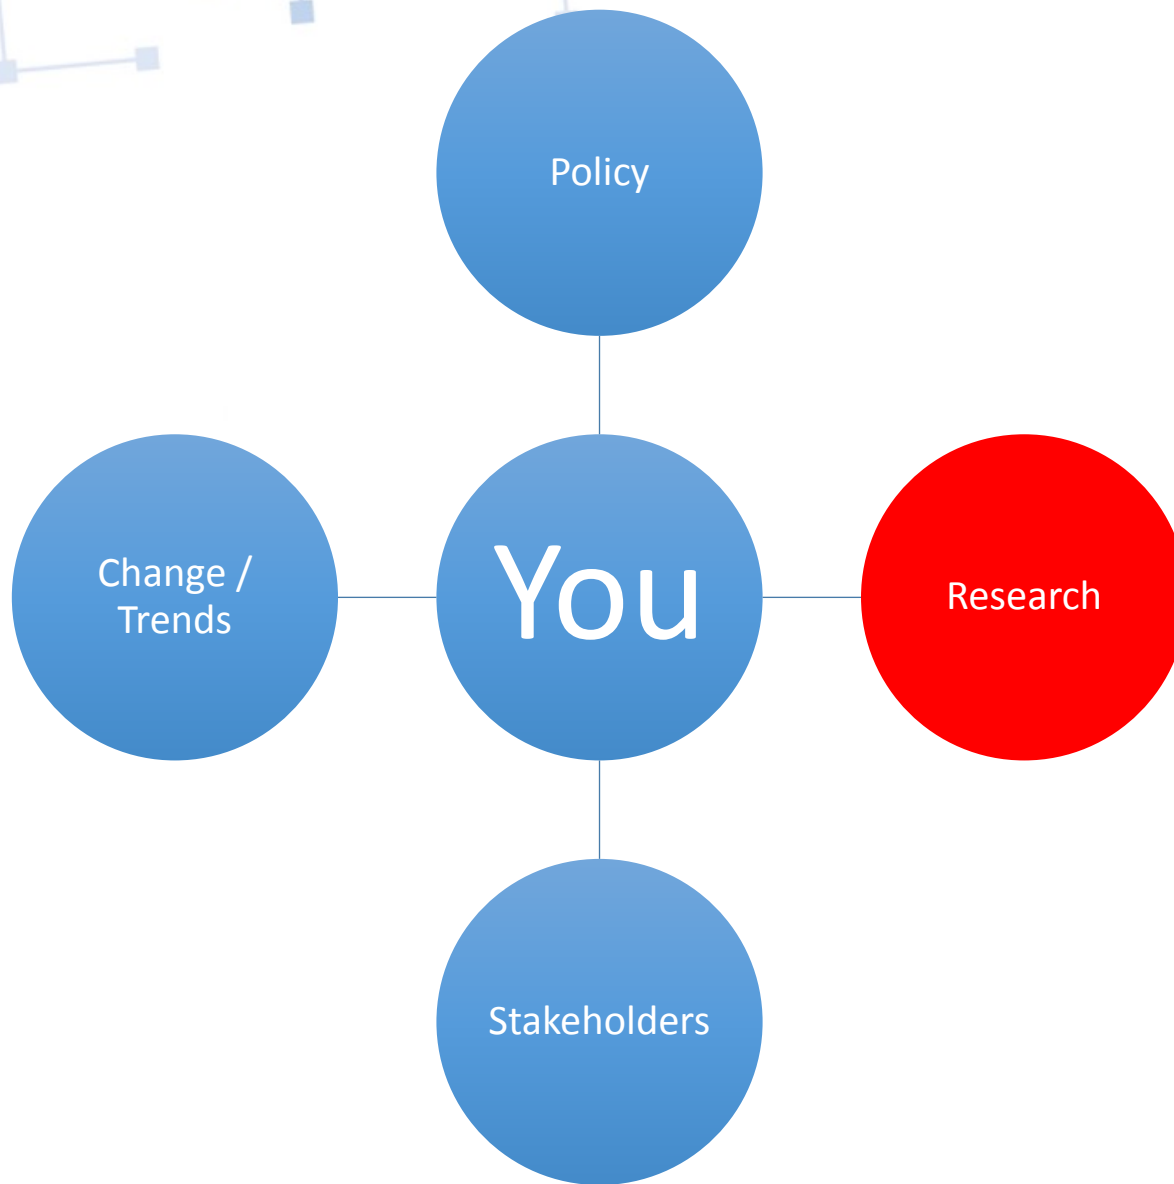

Grid Modernization Landscape

You are at the Center of Grid Mod

MTS Work helps – but there is a gap!

Grid Modernization Research Initiative

Purpose: Strategic coordination of research related to grid modernization

Scope:

- Subject: Grid planning, Grid operations, and DER integration
- Sources: CEC (EPIC), CPUC, DOE

Parts

- Active and ongoing stakeholder engagement process, a Practical Grid Research Engagement (PGRE), leading to...
- Comprehensive literature review of in scope research
- Searchable database of past, present, and potential future in scope research
- Gap analysis comparing ongoing in scope research and needs

Thank you!
