

DOCKETED

Docket Number:	17-IEPR-03
Project Title:	Electricity and Natural Gas Demand Forecast
TN #:	217111
Document Title:	Electricity and Natural Gas Demand Forecast LADWP
Description:	N/A
Filer:	Ramon D. Gamez
Organization:	Los Angeles Department of Water and Power
Submitter Role:	Applicant
Submission Date:	4/17/2017 3:35:14 PM
Docketed Date:	4/17/2017

Form 6 Uncommitted Demand-Side Program Methodology

Efficiency Program Costs and Impacts

Assembly Bill 2021 which became law in 2007 requires California Utilities to identify energy efficiency potential and establish annual efficiency targets that would result in the state meeting its energy efficiency goals. As mandated by the bill, LADWP is required to conduct an efficiency potential study every three years in order to establish and continuously update its efficiency goals and projections.

The results of the California Municipal Utilities Association (CMUA) Energy Efficiency Potential Forecasting Study conducted in 2016 by Navigant Consulting, Inc. (Navigant) eventually became the basis for the energy savings and projections as shown in this submittal. ***The same methodology used for the committed programs applies in determining the corresponding amounts of peak demand and energy saving impacts.***
