Background

California Public Resources Code Section 25301 requires the Energy Commission to prepare an *IEPR* every two years that includes assessments and forecasts of all aspects of energy industry supply, production, transportation, delivery and distribution, demand, and prices. In addition, Senate Bill 350 (SB 350, de León, Chapter 547, Statutes of 2015) requires specified POUs to

adopt IRPs at least once every five years and submit them to the Energy Commission. SB 350 allows the Energy Commission to adopt guidelines to govern the submission of information, data, and reports needed to support the Energy Commission's review of IRPs for consistency with statutory requirements.

In advance of this workshop the Energy Commission will release draft guidelines to solicit public comment. The draft guidelines specify requirements for submitting an IRP to the Energy Commission and a process for the Energy Commission's review of IRPs. More information can be found at the following link: <http://www.energy.ca.gov/sb350/IRPs/index.html> .

Agenda

The workshop will include a presentation from Energy Commission staff on the draft guidelines. This will be followed by presentations and panel discussions featuring relevant stakeholders including, but not limited to utility representatives and environmental experts. The workshop will conclude with a public comment period.

The Energy Commission staff presentation will provide an overview of the following topics:

- Energy Commission's role
- Submission and review procedures
- Reporting requirements
- Standardized tables
- Next steps and schedule

A detailed schedule will be posted prior to the workshop at:
http://www.energy.ca.gov/2017_energypolicy/.
