No to Puente Power plant

Oxnard has the highest rates of asthma in the state, all thanks to the three power plants that are placed there. And now, NRG wants to add a FOURTH one? That is ridiculous , and outright environmental racism is disturbing. Why not put the new plant in an affluent city, like Malibu? When this information is seen by the public-and with the serious situation at hand, it's likely it will- there will be public outrage, and I don't think the CEC wants to be the party responsible for causing that and endangering the lives of people living there. Do not approve this.
