## **Permanent Shutdown of Aliso Canyon**

It is my intention to address the California Public Utilities Commission, Cal-ISO, and DWP. I urge you to do whatever must be done to permanently shut down all operations at Aliso Canyon. SoCalGas storage facility at Aliso Canyon is unsafe and its routine leaks over the past several years, not to mention the severe blowout in 2015, have continued to cause and pose health problems in the highly populated surrounding residential communities. The health of all members of my household has been impacted. I believe we have barely scratched the surface in exposing the health damages the chronic leaks at this facility have been causing. I am beyond perplexed at how in good conscience the agencies in power collectively allowed it to operate in such a location on top of active earthquake faults and in a high fire danger zone. This facility is not needed for energy reliability, a fact substantiated by several engineering studies such as the EES Consulting study that was commissioned by LA County. It is time for the safety of the people to take priority over big business. The majority of this community's residents have no clue how to "fight City Hall," hence a small few represent the many with no voice, yet we all, our babies, our children, our elderly, our pets, suffer at the hands of corporate greed. Please do not allow this to continue. NONE of the companies, SoCalGas, and the smaller ones as well, should be allowed to operate at this location. PLEASE SHUT ALISO CANYON DOWN PERMANENTLY! Thank you for your time and consideration.
