PROCEEDINGS 1 2 1:33 p.m. PRESIDING MEMBER GEESMAN: 3 This is a 4 meeting of the California Energy Commission's 5 Siting Committee. I'm John Geesman, Presiding 6 Member of the Committee. to my left is 7 Commissioner Jeff Byron, the Associate Member of 8 the Committee. To his left is Staff Advisor Gabe 9 Taylor. To my right Suzanne Korosec and Jan 10 11 McFarland, my Staff Advisors. The purpose of the workshop today is 12 13 further consideration of proposed regulations 14 governing the transmission corridor designation 15 process created by SB-1059. Arlene, did you want to start us off, or 16 17 Gary? MS. ICHIEN: I'll turn to Gary first. 18 19 Go ahead, Gary. MR. COLLORD: Good afternoon, 20 21 Commissioners. Staff presented draft proposed 22 regulations for implementing Senate Bill 1059 at a workshop held on June 29th. 23 Following the June 29th workshop staff 24 made several revisions to the draft of the 25

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

proposed regulations to incorporate comments 2 provided by the parties at the June 29th workshop, 3 as well as submitted in writing following the 4 workshop.

5 Staff also initiated some clarifying б revisions to the proposed regulations. And copies 7 of these written comments, as well as copies of staff's revised proposed regulations are available 8 on the table out in front. 9

10 The revisions to staff's proposed 11 regulations are reflected in an underline-andstrikeout format and were posted on the 12 13 Commission's website on July 24th for discussion 14 at today's workshop.

Staff requested that any additional 15 written comments be provided by August 9th. 16

Last week staff met with Karen Mills of 17 the California Farm Bureau Federation to discuss 18 19 written comments she had provided in further 20 detail. And as a result, staff is proposing some 21 additional changes to the revised draft proposed 22 regulations, which we will also discuss today. 23 And a summary of these additional changes is also provided in a handout out front. 24

PRESIDING MEMBER GEESMAN: 25 Is that the

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

2

first that these proposed additional changes will have been circulated?

3 MR. COLLORD: Yes. Arlene Ichien with 4 our legal office is going to briefly summarize 5 staff's revisions to the draft proposed 6 regulations for the Committee and today's workshop 7 participants.

8 And we've organized the room again for kind of a workshop discussion. And so we 9 10 encourage participants to come forward and sit at the tables. 11

PRESIDING MEMBER GEESMAN: Yeah, I would 12 13 advise anybody that intends to be commenting on 14 this to come up, take a chair. It will facilitate 15 our discussion.

Again, the only rule we really follow is 16 17 that the green light on your microphone come on. There's a horizontal button that says push that 18 19 will turn that light on. And that you identify yourself by name and affiliation so that we can 20 21 keep our transcript orderly.

22 ASSOCIATE MEMBER BYRON: If I may, Mr. 23 Collord, can you just make sure I'm on the right page. Is it regulations ending in SD2, the 24 number? 25

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

MR. COLLORD: That's correct. 1 2 ASSOCIATE MEMBER BYRON: Okay, --3 MR. COLLORD: For second draft, 4 essentially. 5 ASSOCIATE MEMBER BYRON: -- thank you. 6 MS. ICHIEN: Good afternoon, --7 PRESIDING MEMBER GEESMAN: Okay, Arlene. MS. ICHIEN: Okay, thank you. Good 8 afternoon, everybody. I'm Arlene Ichien. And 9 first of all, let me say that staff would like to 10 11 thank everybody for the comments that we did receive. They were very helpful and instructive 12 13 in pointing out areas that were unclear about the 14 proposed regs. 15 And let me assure you that staff tried its best to be responsive to the comments. And so 16 17 if you feel that one or more of your comments has been overlooked, please feel free to bring it to 18 19 our attention. 20 I'd like to just summarize the changes 21 that did go out on July 24th. First of all, there 22 was a request referred to the Garamendi 23 principles; and so that was attempted in the revision to section 2401 on the scope and 24

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

objectives, where there was reference made to

25

encourage use of existing rights of way.

2 And also an explicit allowance for 3 existing corridors to be proposed for designation. 4 With respect to any sections where there 5 was reference to the Commission or assigned б committee we attempted to delete any reference to 7 the Commission to make it clear that there would 8 be a committee overseeing all proceedings for designation. 9 With respect to section 2404, review and 10 11 acceptance of applications, there the committee can be assigned either before, or at the time an 12 13 application is found to be complete. And if 14 assigned before an application is found to be complete, then the revisions clarify that it would 15 be the committee's responsibility to determine 16 17 when information is sufficient to complete the application based on the informational 18 19 requirements in the appendix.

20 Regarding public notification, there 21 were some specific changes made to clarify who at 22 the public level would be sent notification of an 23 application.

24There's also reference to transmission25load-serving entities. This was in response to a

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

3

comment from Global representing IID, which requested that the regulations notify state political subdivisions such as IID.

And so in talking with the staff about
how best to identify such entities we came up with
the phrase load-serving entities.

With respect to section 2406,
coordination with interested agencies, we put in,
I think it was at the suggestion of Edison, a
timeline for -- or maybe it was San Diego -- a
timeline for local governments to respond to
initial requests for land use plans and
information.

We also clarified, tried to clarify the intervention rights and duties of intervenors similar to the way they are described in siting cases. And we tied the deadline for intervention to the draft EIR rather than the final EIR. So it did advance the deadline for intervention in that regard.

21 With respect to reimbursement this is 22 pretty much a new section. It would, first of 23 all, require that a fee be submitted with an 24 application based on the estimated cost for 25 reimbursement. And there would be regular

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

б

3

accounting of the drawdown from that fee; and regular accounting made to the applicant throughout the proceeding.

And at the end of the proceeding after the final decision there would be a final accounting with any revisions to the estimate made accordingly.

8 With respect to reimbursement to local 9 governments, the revisions refer -- will provide 10 two alternatives. One alternative is to use the 11 existing section in the regulations that sets out 12 a process whereby local governments submit a 13 budget for their estimated costs.

14And the Energy Commission Staff, in15effect, serves as a conduit between the applicant16and the local government for local reimbursement.

An alternative, in fact a preferred way, that's offered in the regulations is to have the applicants just set up an account directly with the local government and deal directly with them without having to go through the more rigorous method that's described in our regulation, section 1715.

24 With respect to requests for information 25 or discovery, trying to be responsive to

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 suggestions to tie the discovery approach more 2 closely to what's done in the siting case, we made 3 more explicit reference to section 1716, which 4 does govern siting cases. 5 And explicitly tied the deadline for б ending discovery to the date and application as 7 determined to be complete, or to 180 days after 8 it's determined to be complete. And that is the same deadline as in a siting case. 9 10 Regarding informational hearings and the 11 scoping meeting, again we deleted reference to the Commission so it's clear a committee would oversee 12 13 this part of the process. 14 We've also generalized reference to the 15 environmental document so that it doesn't explicitly refer to the meeting as a scoping 16 17 meeting for an EIR, but rather scoping meeting for environmental review. 18 19 And this is consistent with the 20 flexibility allowed under CEQA, and also 21 responsive to one or more of the comments to allow 22 for that kind of flexibility in terms of 23 environmental review of proposed designated corridors. 24 25 And then there's also a revision that PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

specifies committee order, that the committee
 issue an order after the informational hearing
 basically setting forth the scope and nature of
 the environmental review based on input from the
 parties and interested members of the public
 during the initial informational hearing.

7 With respect to the prehearing conference and hearing order, there was a 8 suggestion made, and we tried to respond to it, to 9 10 specify that the committee put out a notice making 11 it clear that the prehearing conference would be a 12 public event. And again deleted reference to the 13 Commission to make it clear the assigned committee 14 would be conducting the prehearing conference.

15 Regarding the hearings and the record. 16 In response to a comment we eliminated the 17 statement that basically allowed anybody to ask 18 questions at the hearings. And this helps clarify 19 the role of the public versus formal intervenors, 20 whereby formal intervenors do have certain rights. 21 For example, to cross-examination.

22 And the interested members of the 23 public, nonintervenors, don't have that same 24 right. They can ask questions, but they don't 25 have the right of cross-examination, for example.

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

And so deletion of that sentence is consistent 1 2 with trying to clarify the roles of intervenors 3 and nonintervenors. 4 With respect to the proposed decision, 5 at the suggestion of the Presiding Member, we 6 inserted a timeline for the proposed decision, 60 7 days after the completion of the evidentiary 8 hearing. Regarding catalogues of environmental 9 10 reports, we deleted specific reference to the EIR. 11 Again, to allow for staff maintenance of environmental reports that are other than just 12 13 EIRs. 14 With respect to the review of designated corridors, as you know, the statute directs the 15 Commission at least every ten years to review and 16 update, as necessary, the designated corridors. 17 The revision to section 2420 is an 18 19 attempt to make it clear that anybody can request an update for review and revision. And indicates 20 21 that the Commission has the discretion to review 22 and revise, as necessary. Section 2421 is a new section that has 23 24 been proposed. And this goes to the comment of 25 allowing flexibility in the environmental review

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

of a proposed corridor. And so the language
 explicitly says that nothing shall preclude the
 use of the CEQA exemption or a neg dec or
 mitigated neg dec unless there are facts to
 support a fair argument otherwise.

6 It nevertheless obligates a proceeding 7 to have certain basic features, an informational 8 hearing, a prehearing conference, evidentiary 9 hearings as needed, and a proposed and final 10 decision.

11 There were some revisions made to 12 appendix G, which is now referred to as appendix A 13 to avoid confusion with the CEQA guidelines 14 appendix G.

15 The revisions, I believe, by and large, are clarifying revisions. There's a little bit of 16 17 reorganization, but there's really not substantive 18 change that was made to the appendix, other than 19 reference, at the suggestion of a couple of 20 parties, to refer specifically to the WECC 21 regional planning and facility rating process 22 results, as well as other transmission planning 23 studies, together with the ISO's latest transmission planning results. And this is in the 24 25 informational section regarding information

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

showing consistency with the strategic plan.

2 So I open it up to any questions or 3 comments, or if anybody believes that one or more 4 of their comments has been overlooked, please feel 5 free. 6 PRESIDING MEMBER GEESMAN: Just so that 7 I'm clear, Arlene, one needs to read the draft 8 that you have handed out which has the cover on it, along with the single sheet printed on both 9 pages. It says, staff-proposed revisions to 10 11 California Farm Bureau Federation comments, 12 simultaneously? 13 MS. ICHIEN: Yes. And, in fact, I am 14 reminded now that there are additional revisions --15 PRESIDING MEMBER GEESMAN: Okay, do you 16 17 want to go through those. 18 MS. ICHIEN: -- in response to the Farm 19 Bureau's comments. And that shouldn't take very 20 long. 21 The Farm Bureau, the first comment they made to us, in need of a response, was to make it 22 23 clear that linkage with the federal government was 24 such that the federal government wasn't overriding 25 or stepping in place of state government

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 designation.

2	And so the suggested changes to just
3	make it more specific that the coordination with
4	our process with the federal process is to
5	coordinate with federally designated corridors
6	specifically under section 268 of the Federal
7	Power Act of 05. And any land designations that
8	are in adopted federal plans.
9	I believe that was worked out with the
10	Farm Bureau when the staff met last week with
11	them, with Karen.
12	The Farm Bureau had concern about the
13	content of the notice that would be sent to
14	landowners. And so the two suggested changes
15	under the second comment, I think, go to the
16	concerns that the Farm Bureau had.
17	Basically it would standardize the
18	content of the notices sent to interested
19	agencies, as well as members of the public and the
20	landowners.
21	The Farm Bureau had also asked that
22	procedures be clarified as to how to ask and whom
23	to ask for an extension of public review time.
24	And I just want to point out that in the meantime
25	the staff did extend the public comment period in

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

section 2411(b) from 30 days to 45 days. So I
 think that, in part, goes to addressing the
 concern that landowners might not get sufficient
 notice.

5 And as far as clarifying who to ask and 6 when to ask and how to ask, staff recommends that 7 those kinds of unexpected requests be dealt with 8 on a case-by-case basis. This is how they would 9 be dealt with in a siting case.

10 And my concern is that by putting in 11 more explicit language about how to ask for an 12 extension, there may be the apparent right then to 13 ask for an extension. And then the expectation to 14 receive one.

But I believe that the regulations do try to balance a timely processing for applications with allowing sufficient time, ample time for public review and comment.

19Anyway, assuming that balance is20observed throughout the proceeding any request for21needing more than 45 days, for example, for public22review hopefully will be rare. And if needed,23will be dealt with on a case-by-case basis.24PRESIDING MEMBER GEESMAN: And that

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

would be subject to the discretion of the assigned

25

1 committee?

MS. ICHIEN: Exactly. Each committee 2 3 would have the discretion to deal with those 4 procedural requests as it sees fit. 5 And then finally, the Farm Bureau had a 6 concern about alternative corridors. In the event 7 an alternative corridor became a proposed corridor 8 for designation, what would happen to property owners along the route of the alternative 9 10 corridor. Would they be notified to the same 11 extent as for a proposed corridor application. 12 And the answer rests on a couple of 13 things. First, with respect to CEQA, as you all 14 know, CEQA requires the review of alternatives, but requires the review at a less detailed level 15 than for the proposed project. 16 17 And so in the event there were a preferred alternative to what was proposed because 18 19 the proposed one had unavoidable, unmitigable 20 impacts, the Commission is not in a position, just 21 as in the siting case, to designate or to approve 22 an alternative corridor unless that alternative 23 were made the subject of an application. 24 So it's conceivable that an applicant 25 might have a change of mind in the course of a PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

3

4

proceeding. And based on input, decide that really the merits of the proposed corridor lie with one of the alternatives, and not what was originally proposed.

5 In that event the switching to an 6 alternative corridor, I think, would trigger all 7 of the informational and other requirements, 8 including noticing requirements, that are 9 associated with a proposed corridor that's 10 initially proposed in an application.

And I would also point out that in section 2405(a)(2), which has to do with notifying landowners, there's a requirement to notify landowners adjacent to and within a proposed corridor. And the operative word there is proposed.

17 So any corridor that becomes proposed 18 for designation, whether or not it starts out 19 initially as an alternative proposal, I think 20 triggers that requirement for notification.

21 PRESIDING MEMBER GEESMAN: Just a point 22 of clarification. The last two times you've said 23 that, you've allowed the words "I think" to come 24 in there. In my opinion there's no question at 25 all. Is there any reason that you have some doubt

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 on the subject?

2 MS. ICHIEN: I have no doubt personally. PRESIDING MEMBER GEESMAN: Why don't we 3 4 just leave it at that. 5 MS. ICHIEN: I habitually --6 (Laughter.) 7 MS. ICHIEN: -- used "I think" simply 8 because it wasn't explicit. 9 PRESIDING MEMBER GEESMAN: No, I understand that. 10 MS. ICHIEN: But I am expressing my 11 legal opinion --12 PRESIDING MEMBER GEESMAN: Okay. 13 14 MS. ICHIEN: -- about what would be 15 required. PRESIDING MEMBER GEESMAN: Okay, I want 16 17 to make certain our record stays clear on that. Okay, --18 MS. ICHIEN: So, with that, shall we --19 first of all, are there any volunteers, anyone 20 21 with an urge to make a comment or ask a question 22 or make a suggestion? Otherwise, we can just 23 start. Yes. 24 MS. FERRY: I'm sorry. I have two comments. I don't know if we just want to do a 25

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 roundtable like last time, or -- and they're

2 fairly brief, so --

3 PRESIDING MEMBER GEESMAN: You need to4 identify yourself.

5 MS. FERRY: I will. I'm Lynn Ferry with 6 Southern California Edison Company. And thank 7 you, staff and the Commission, for going through 8 all the comments. I think you did a fabulous job 9 in incorporating many of the proposed changes that 10 were made at the last workshop.

11 My first question is with section 12 2409(d). -- the new language that was in 15 days 13 of informational hearing the assigned committee 14 shall issue an order regarding the type and scope 15 of environmental review.

16 I'm just wondering if we maybe want to 17 include some language that allows the applicant to 18 request the specific environmental review and 19 maybe have the committee issue an order based on 20 that request.

It seems that PG&E had wanted a more specific environmental review whereas Edison was looking at maybe a more programmatic environmental review. So I don't know if we want to make that differentiation there.

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

MS. ICHIEN: Well, do you think that 1 2 would be something that the applicant would see 3 fit to present at the informational hearing? 4 MS. FERRY: Absolutely, yes --5 MS. ICHIEN: As opposed to allowing time 6 after the informational hearing for additional 7 comments to be received? 8 It occurs to me that the informational hearing would be an appropriate forum to present 9 10 the applicant's point of view on the environmental 11 review needed. MS. FERRY: Okay, procedurally that 12 13 certainly makes sense. It just didn't seem 14 explicit here. So, maybe with the application, itself, it would be -- the request would be made 15 there. I don't know if there's a proper place to 16 17 include language to that. MS. ICHIEN: Okay, anyway, we'll 18 consider that. See if we need to clarify --19 20 MS. FERRY: Okay. 21 MS. ICHIEN: -- maybe the contents of 22 the notice inviting parties, including the 23 applicant, to submit opinions about what the environmental review should look like. 24 25 MS. FERRY: Okay. I think that makes

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 sense certainly.

2 And the only other comment I had was in 3 appendix A, subsection (c), number 8. And I think 4 Edison is certainly more than willing to provide 5 any of the Cal-ISO transmission planning results 6 or WECC planning results if they're available. 7 But we were looking at this process going on maybe 8 five or ten years, and so we may not have a specific project identified for the underlying 9 corridor. 10 11 So I was just worried that, you know, if that information was not available would we not be 12 13 in compliance with the regulations. 14 MS. ICHIEN: Okay, so to allow for more 15 flexibility based on what's actually available, we should look at the wording there to make sure it's 16 17 not overly rigid. MS. FERRY: Right. That would be very 18 19 helpful. MS. ICHIEN: And, again, that was in? 20 21 MS. FERRY: Appendix A, subsection (c), 22 number 8. Conformity with strategic planning. That's it for us. 23 24 MS. ICHIEN: Maybe just including the word "as available"? 25 PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

MS. FERRY: Yes, maybe you could start 1 2 it off with "if available" or "as available". MR. COLLORD: And I understand we have a 3 4 caller from SDG&E, Chris Terzich. So if you want 5 to hear from him next. 6 MR. TERZICH: Okay, thank you. Yes, 7 Chris Terzich, SDG&E. Appreciate the opportunity to comment. We'd submitted some written comments 8 previously and had some discussions about kind of 9 10 a broader programmatic approach kind of like what 11 SoCalEdison was just referring to. And, you know, if you look at the 12 13 objectives and the way things are written there 14 might be room, or appears to be room, for maybe a 15 more programmed approach based on a broader kind of either geographical area, you know, defined by 16 a set of circumstances or defined by, let's say, a 17 service territory, or something like that. 18 19 But we were kind of hoping to have 20 something a little bit more, something more 21 explicit written to allow or take that into 22 account so that, you know, this process could 23 marry up with the IEPR process. And maybe, you know, you could have more of a, for lack of a 24 25 better term, kind of a general plan of energy

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 corridors.

2 The way this is geared now is more 3 towards a kind of a single corridor assessment. 4 And what we're finding is that it may be helpful 5 to have a multiple corridor assessment done all at 6 once so that you could prioritize and identify the 7 best corridors based on a geographical area, 8 whether that be a service territory or based on a set of either renewable resources or standard 9 10 energy resources, or, you know, what-have-you. 11 So, just wanted to kind of throw that out there. And I'm not sure if there's any way it 12 13 could be integrated in there. But if it could be, 14 or put in more explicitly, that would be very 15 helpful, I think, to this process. MS. ICHIEN: With respect to the 16 17 programmatic or the program EIR, there is nothing 18 barring use of a program, or preparation of a 19 program EIR. In fact, I think that's what the 20 statute generally contemplated with respect to 21 environmental review for a proposed corridor, on 22 the assumption that the proposal would be pretty 23 far in advance of when the actual project would 24 materialize.

25 As for considering a series of energy PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

corridors, as you put it, that's an exercise that 1 2 I think could be dealt with in the strategic plan 3 process. 4 PRESIDING MEMBER GEESMAN: Well, isn't 5 is also simply a function of the scope of what 6 kind of application is filed? 7 MS. ICHIEN: Certainly, but, you know, keep in mind that the statute contemplates a 8 single corridor. It authorizes the Energy 9 Commission to designate a corridor. 10 PRESIDING MEMBER GEESMAN: And if the 11 utility, in this instance San Diego, came in with 12 13 an application that contemplated several corridors 14 within its service territory, you know, we could, at least in theory, construe that either as a 15 single application or four or five applications. 16 MS. ICHIEN: That's true. I mean 17 there's nothing in the statute or in the 18 19 regulations that would suggest that is outside the 20 authority of the Energy Commission.

It would require, I think, similar level
of analysis --

23 PRESIDING MEMBER GEESMAN: Right.
24 MS. ICHIEN: -- for each of the proposed
25 corridors.

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

PRESIDING MEMBER GEESMAN: Right. 1 2 MS. ICHIEN: So, an ambitious, a more 3 ambitious undertaking. 4 PRESIDING MEMBER GEESMAN: Right. I see 5 our strategic plan people moving --6 MS. ICHIEN: I see a hand up. 7 PRESIDING MEMBER GEESMAN: -- to the microphone. 8 MS. ICHIEN: Larry Chaset. 9 10 MR. CHASET: Yeah, I'm Larry Chaset with the California Public Utilities Commission. Just 11 12 following up on this thought of the multiple 13 corridors in one application, I was intrigued with 14 the proposed revision in response to the Farm Bureau Federation's comments, making explicit 15 reference to section 368 of the EPACT. And as you 16 17 know, the EIR, programmatic EIR on those westwide 18 corridors is currently being prepared. And I 19 understand a draft is going to be out before the end of this year. 20 21 My sense is that the idea of having, you 22 know, state corridors that finish up what's left 23 just continuous. And the federal process would be 24 exactly the kind of multicorridor study that, you 25 know, might be contemplated here.

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

You know, we'll have a federal corridor 1 2 that does a preliminary or programmatic environmental review of the 368 corridors, and 3 4 then there's all this other land that's not 5 subject to federal jurisdiction that your 6 Commission might finish up the job on. 7 And that is exactly, I think, what San Diego's talking about. So, I don't know whether 8 you're thinking about that. It's a big job, 9 10 Arlene. It's very big. MS. ICHIEN: And certainly the 11 Commission, on its own initiative, could initiate 12 13 such a process. Because it has the authority, on 14 its own initiative, to propose a corridor for 15 designation. MR. CHASET: Right. Which actually gets 16 17 to my other comment, which either I can make it now or we can -- or I can come back to it later. 18 19 MS. ICHIEN: Go ahead. MR. CHASET: Yeah. In the comments we 20 21 submitted late last month we made a reference to 22 the need for you to put a sentence somewhere in 23 here, whether it go in appendix now A, or up in the front of the regulation, that states that if 24 25 the Commission, on its own initiative, is

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

proposing a corridor or a series of corridors, you need to essentially put the same burden on yourself with regard to the information that needs to be provided as your regs put on outside project proponents.

6 So, you know, I think once sentence will 7 do it. Something along the lines of to the extent that the Commission, or the Commission Staff, on 8 its own initiative, proposes the designation of a 9 10 corridor, the same information requirements set forth hereunder shall also apply. 11 12 Something along that line. 13 MS. ICHIEN: Or maybe just a note that 14 the word application in appendix A shall also include reference to the Commission's own 15

16 initiative or motion to initiate a process.

17 MR. CHASET: Yeah, either way.

18 MS. ICHIEN: So that it's clear.

19 MR. CHASET: I think you need just to

20 tie that bow.

21 PRESIDING MEMBER GEESMAN: Yeah, I think22 that makes sense.

23 MS. MILLS: Perhaps I could go next 24 here, the microphone's on. Karen Mills with the 25 California Farm Bureau Federation. And I

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

2

appreciate staff taking the time to meet with me and discuss some of our concerns.

3 Obviously we're motivated by making sure 4 that the process is as transparent as possible to 5 the landowners and affected parties by this.h

6 There is a multitude of transmission 7 efforts going on throughout the state these days. I know there's another one going on, just starting 8 up through the PIER program. And other agencies, 9 10 as well. So, it's a challenge certainly, for us 11 to provide information; and then to make sure that through this kinds of processes where the 12 13 landowners are directly impacted, that they get 14 the information needed.

15 So some of these revisions that have 16 been made, I think, are really helpful in 17 clarifying the kind of notice that the landowners 18 will get. We appreciate it, and providing 19 notification and the initial notice about how they 20 would go about requesting an extension of time.

21 Certainly in the context of your 22 discussing multiple corridors in a region, when 23 you're talking about something like that, that 24 ratchets up what kind of impact there may be to 25 the surrounding areas. And what kind of review

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

parties might want to do for something of that
nature.

PRESIDING MEMBER GEESMAN: It also 3 4 exponentially expands the noticing requirements. 5 MS. MILLS: Right, absolutely. And so I 6 assume that there would be a careful review before 7 something like that happened, because obviously it 8 would impact the payor --PRESIDING MEMBER GEESMAN: Right. 9 MS. MILLS: -- in that context. And 10 11 then just finally with respect to the alternative discussion, you know, it wasn't real clear to me 12 13 in the appendix, and tying to the draft 14 regulations, themselves, what was envisioned by 15 the use of the alternatives in this context. Because certainly in siting transmission 16 17 lines, when that occurs at the PUC, the alternatives have somewhat of a different status. 18 19 And I just want to have clarified. And it was 20 very helpful for Arlene to offer her legal opinion 21 about the proposed, is proposed, is proposed. 22 And if you're calling it anything else, 23 then that doesn't count for any of those purposes. And so it creates a different status and the 24 25 requirements are rigorous for it. So that's very

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

helpful to have that clarified how that would be
 used.

So, I appreciate, again, the time and 3 4 we're still trying to make sure that the 5 landowners who, looking at this going over their 6 land, are adequately protected. So, thanks. 7 PRESIDING MEMBER GEESMAN: We share that interest. Thank you for your comments, Karen. 8 MS. MILLS: Yeah. 9 10 MS. ICHIEN: Shall we just continue 11 around here. MR. BRAUN: Thank you. Tony Braun on 12 13 behalf of the California Municipal Utilities 14 Association. My comments, I think, are in the 15 mode of clarification and hopefully improving the work product. 16 And I would note, as a procedural 17 matter, we did review the initial draft 18 19 regulations; didn't find any issues with them, so 20 we did not participate in the last workshop. We 21 did not file written comments on the second 22 version, so I apologize to the Commission and 23 staff that some of these points are new. But hopefully they're minor, and should not be a point 24 25 of controversy.

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 The first note is on page 3, section 2 2401(c). I think i would start with a clarifying 3 question because I was unsure about the purpose of 4 that language.

5 It seemed, when I first read it, I 6 thought perhaps it was taking a shot at trying to 7 define persons, as who could be an applicant. 8 Then I thought perhaps it was meant to just make 9 clear that upgrades to existing facilities 10 could -- persons that were going to attempt that 11 could also be applicants.

12 And the reason I raise this is because 13 I'm painfully burdened by history and knowledge of 14 the evolution of the ISO and the rules. We have 15 ISO facilities that in some parts of the state are 16 below 200 kV. We have other parts of the state 17 where it's only the system at 200 kV and above.

Also the reference, I think literally read, the transmission line that is, under operational control of the California ISO or would operate at a voltage of 200 kV or more, creates a little confusion as to what subset of upgrades we were talking about.

24So, I wasn't quite sure -- before I25suggest language I wasn't quite sure what the

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 underlying intent of the section was.

2 MS. ICHIEN: That wording referring to the ISO and 200 kV, that's taken directly from the 3 4 statute, itself; from SB-1059. 5 MR. BRAUN: And so is the --6 MS. ICHIEN: And --7 MR. BRAUN: I'm sorry. MS. ICHIEN: -- so the purpose of this 8 revision is to just clarify that applicant may 9 10 include those who are simply planning to upgrade 11 an existing transmission line. MR. BRAUN: So if there was a new 12 13 transmission line the applicants may also, 14 obviously, include --15 MS. ICHIEN: Yes. MR. BRAUN: So then I would suggest, 16 17 just to clarify for the record, that "or" means that it could be a person, an applicant could be a 18 19 person that plans to upgrade a transmission line 20 that may or may not be under the ISO's operational 21 control, such that if an applicant was Los Angeles 22 or SMUD or another municipal, Transmission Agency of Northern California, and the line was -- the 23 24 upgrade would result in an operating -- the 25 current language is capacity, I would suggest

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

voltage of 200 kV or above, that that person could 1 2 also be included as an applicant. MS. ICHIEN: Do you think that's already 3 4 taken care of by the "or", the last line. 5 MR. BRAUN: I think it is. I just want 6 to clarify for the record. I mean I'm trying to 7 avoid major modifications to the section. I think 8 the "or" does take care of that. I would suggest operating voltage 9 10 irrespective of the legislative language, because 11 operating capacity would be a megawatt number. MS. ICHIEN: Okay. 12 13 MR. BRAUN: My next clarifying point, 14 and it is one that you've already touched upon. It's at page 5, 2405(3). The new language, 15 transmission load-serving entities. 16 MS. ICHIEN: Yes. 17 MR. BRAUN: The Public Utilities Code 18 19 definition of load-serving entity does not 20 including local publicly owned electric utilities. 21 So I think that choosing that defined term, which 22 you can find somewhere in the California Code, might create a bit of confusion. 23 MS. ICHIEN: Um-hum. 24 25 MR. BRAUN: I would suggest, and this

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

would also include IID, because this definition 1 2 includes IID. It's locally transmission owning 3 and then I would use the defined term in the Code, 4 local, publicly owned electric utilities. And if you want to get very specific, would be as defined in section 9604(d) of the 7 Public Utilities Code. And that will cover all the CMUA members, including the joint powers authorities. 9 MS. ICHIEN: Okay. 10 11 MR. BRAUN: And then, again, a point that you reference, and this is truly in the 12 13 matter of clarification in the appendix. We 14 already -- section (c)(8) that we've discussed

previously.

5

6

8

15

The reference to other planning studies 16 17 I would certainly argue in any future forum includes anything that the municipal utilities are 18 19 doing.

But given that we have 50 percent of the 20 21 import capability and a large section of the 22 transmission system, I was thinking that perhaps 23 it would be good to reference the transmission plans that the municipal utilities have out there 24 25 already.

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

The point of this, I think, and the move 1 2 that we're all trying to get to is to have a 3 better integrated planning mechanism. And we would believe it would be appropriate to 4 5 specifically and affirmatively reference the 6 transmission plans of local publicly owned 7 electric utilities there, rather than relying on 8 the generic reference to other transmission planning studies. 9 MS. ICHIEN: Okay, thank you. That's 10 11 helpful. That phrasing was local publicly 12 13 owned --14 MR. BRAUN: Electric. Yes, the 15 definition is local publicly owned electric utilities. And through whatever vehicle you deem 16 17 appropriate I can get that to -- any of these modifications in writing and --18 19 MS. ICHIEN: That would be helpful. Thank you. 20 21 MR. BRAUN: Thank you. 22 MR. BARTRIDGE: Tony, what was the Public Resources Code on that? 23 MR. BRAUN: It's actually Public 24 Utilities Code section 9604(d) has the definition 25

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

of local publicly owned electric utilities.

2 MS. ICHIEN: Thank you very much. Let's go around, past the lectern. 3 4 MR. WISEMAN: Good afternoon. David 5 Wiseman with Galati and Blek, representing PG&E. 6 Once again, thank you for inviting us to 7 participate in the regulatory workshop. 8 We would agree that staff was very responsive to all of our comments that we 9 10 submitted. So much so that today I'll be focusing 11 mainly on the type and scope of the environmental review expressed by Scott Galati at the last 12 13 workshop. 14 Notwithstanding section 2421, we 15 recognize the revisions made to 2410 and 2411(a), which show the purpose of the informational 16 17 hearings are to scope the environmental review in the transmission corridor zone. 18 19 Our concern is that it would seem that 2410(a), as well as 2411, would still work to bind 20 21 staff in issuing an EIR instead of the ability to 22 publish the appropriate level of review, as referenced under 2409. 23 So our comments mainly focus on -- which 24 25 we'll be submitting in a written format -- that PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

possibly we could adjust some of the language under section 2411, as well as 2410, to not require staff to publish a draft environmental impact report, but also to allow them to be able to publish other forms of environmental review.

6 MS. ICHIEN: So maybe just insertion of 7 simple wording like, unless otherwise directed, or 8 unless otherwise ordered. Because there is 9 allowance in the proposed revisions for the 10 committee to come out with an order, after the 11 informational hearing, setting forth the scope and 12 nature of environmental review.

MR. WISEMAN: That would seem
acceptable, especially in light of section 2421,
defining the application of CEQA.

PRESIDING MEMBER GEESMAN: I thought 16 17 though, at the last workshop, and we spent a fair amount of time discussing this, in order to take 18 19 into account the possibility of other types of 20 environmental documentation we were going to try 21 and strike all of the references to environmental 22 impact report in the regs; and use appropriate 23 environmental document, or some other slightly 24 more generic phrase.

25 MS. ICHIEN: I mean that's another way PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

to do it, as well. I mean it was done in a couple 1 2 of sections, for the scoping meeting and for the 3 cataloging of reports. 4 PRESIDING MEMBER GEESMAN: I heard, 5 though, and I don't want to put words in his 6 mouth, but I heard Mr. Galati arguing at the last 7 workshop that his concern was that our use of the 8 phrase environmental impact report seemed to create an expectation -- and frankly, it may be an 9 10 accurate expectation in the majority of cases --11 but seemed to create an expectation that an EIR 12 would always be required. 13 And I think that probably better to be a 14 little more neutral than that. MS. ICHIEN: So, anyway, we will 15 consider either neutralizing any reference to the 16 17 EIR specifically, or putting in qualifying words 18 like, unless otherwise ordered. 19 MR. WISEMAN: Thank you. MS. ICHIEN: Thank you. Chris and Jim, 20 21 do you have comments, questions? 22 DR. TOOKER: This is Chris Tooker from 23 the Energy Commission Staff. We just came forward 24 because it would appear that we were talking about 25 some new concepts, and we wanted to be here if we

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 needed to engage.

2 But I think my concerns about the 3 complexity of multiple corridor applications have 4 been expressed by the Farm Bureau and others. 5 MS. ICHIEN: Are there any other 6 comments or questions? 7 Okay, hearing none, then staff will take under consideration those suggestions that have 8 been made today, and we'll make additional 9 10 changes. 11 Would you then like the staff to publish the additional changes for public review? 12 13 PRESIDING MEMBER GEESMAN: Well, I think 14 that Commissioner Byron and I would prefer to take this to the full Commission. So, yes, you should 15 certainly make that publication, but I think that 16 17 it would probably be best to put that under the Committee sponsorship as something that we would 18 19 be recommending to the full Commission. MS. ICHIEN: Okay, the next --20 21 PRESIDING MEMBER GEESMAN: I think we've 22 had a good process here and gotten input from a 23 lot of people. I think it's now ripe to move 24 beyond the Committee. ASSOCIATE MEMBER BYRON: I concur. 25 Т

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345

1 feel that all the comments have been

2 satisfactorily resolved here. MS. ICHIEN: Okay, good. 3 4 Well, the next major step then is to 5 prepare the package for OAL for publication in the б California Register. And then also for 7 commencement of the formal rulemaking process, 8 which would start the 45-day public review process of the Committee's then proposed regulations. 9 PRESIDING MEMBER GEESMAN: That's where 10 11 we are. Any public comment today? 12 13 I want to thank you all for your 14 attendance both today and in our earlier workshop. I think this has been a very productive process. 15 We'll be adjourned. 16 (Whereupon, at 2:21 p.m., the Committee 17 Workshop was adjourned.) 18 --000--19 20 21 22 23 24 25

## CERTIFICATE OF REPORTER

I, PETER PETTY, an Electronic Reporter, do hereby certify that I am a disinterested person herein; that I recorded the foregoing California Energy Commission Committee Workshop; that it was thereafter transcribed into typewriting.

I further certify that I am not of counsel or attorney for any of the parties to said workshop, nor in any way interested in outcome of said workshop.

IN WITNESS WHEREOF, I have hereunto set my hand this 16th day of August, 2007.

PETERS SHORTHAND REPORTING CORPORATION (916) 362-2345
