Application for Confidential Designation

To: Energy Commission Docket Unit

Applicant: ConSol Home Energy Efficiency Rating Services. Inc. (CHEERS)

Address: 5757 Pacific Avenue, Suite 220, Stockton, CA

Project name: CHEERS Application for approval to become certified to provide registered Non Residential forms under the 2016 Building Efficiency Standards.

Docket Number: 16-HERS-01

CHEERS recently submitted its application to become a Provider for Newly Constructed buildings. As a part of the application submittal, CHEERS applied for confidentiality designation for certain portions of that Provider application. CHEERS received approval of the confidential designation for those items via a letter signed by the Chief Deputy Director of the Energy Commission and dated November 30th, 2015. That approval letter also states that any subsequent submittals can be deemed confidential without the need for a new application, if a certification is submitted indicating that the new information is substantially similar to the information granted previous granted confidentiality.

CHEERS is now submitting its application to become certified to provide registered Non Residential forms. CHEERS desires that the same sections of that application be given the same confidential designation. Accordingly, CHEERS will certify to the following, under penalty of perjury:

"The new information contained in the CHEERS application to become certified to provide registered Non Residential forms under the 2016 Building efficiency Standards is substantially similar to the information that was previously granted a confidential designation pursuant to the approval letter dated November 30th, 2015."

Please let me know if you have any questions regarding the above.

Sincerely,

Jason Lenzmeier

Executive Director, CHEERS
