## **PG&E Comments on Modeling Tools RFC**

Given PG&E has invested in a different grid modeling tool than described in the proposed project by CEC, the project does not support PG&E's needs or capabilities of proving its ability to manage the grid safely and reliably for its customers. PG&E is generally supportive of entities that are working to advance R&D opportunities for third parties such as developers, researchers and public agencies. Unfortunately, this proposed project would not serve to advance PG&E's ability to improve safety and reliability for its customers.
