**CONFIDENTIAL (§ 1208.1)**

**greenNet Registry LLC Staff Bios**

**John Carrieri - Managing Director and Chief Technical Officer**

John will oversee the greenNet Registry LLC HERS Providership daily operations. John has 25 years of experience in technology, networking, cloud infrastructure and security, with 9 years of experience specifically focused in the energy efficiency sector. Mr. Carrieri built the cloud architecture and platform for greenNet Registry to be certified as a HERS Provider. Other energy related projects Mr. Carrieri has built include: a cloud-based HVAC compliance permitting system for State of California jurisdictions in conjunction with building departments; led a team to build the U.S. Energy Raters HERS Providership with new California Energy Commission Title 24 (2013) energy code and presented to the CEC review board in 2014 earning state approval; maintained the hosting and archiving of the CBPCA HERS Providership and documents; built a HVAC Serial Number tracking system in support of California State energy efficiency compliance goals to demonstrate such a system is feasible; built all of the greenNet energy efficiency portal cloud systems including online control of HVAC fan and compressors with a demand response capability; and is an active participating member of the Western HVAC performance Alliance. In addition, Mr. Carrieri focuses on helping commercial building clients with energy efficiency technologies, EM&V of energy, water and gas systems.

Previous companies Mr. Carrieri founded include [Colleges.com](http://Colleges.com), a leading college search site which has helped millions of students with their college and career selections; published a leading national college magazine with a 1,000,000 circulation including interviewing notable people such as Bill Gates, Muhammad Ali and many others; [Jobs.com](http://Jobs.com) which was acquired by Monster (NASDAQ: MNST) and [Jokes.com](http://Jokes.com) which was acquired by Comedy Central (Viacom NYSE: VIA) and incorporated into [comendycentral.com](http://comendycentral.com). Mr. Carrieri has extensive additional experience in contract law, investments, intellectual property and is LEED Certified by the U.S. Green Building Council. Mr. Carrieri holds a Network Engineering degree and is a distinguished graduate of the University of San Diego with degrees in History and Political Science.

**Jayme Carden - Director of Training**

Jayme is a registered HERS Rater, field inspector and training instructor skilled in FV/DT and HERS data systems for new construction and alterations. Jayme sits on the Training & Education Committee for the Institute of Heating and Air Conditioning Industries (IHACI) and develops training content and in-class instruction for all of the California investor owned utility training venues (SCE, SCG, SDG&E, PG&E). Jayme is also a L.E.E.D. Green Rater and L.E.E.D. Quality Assurance Designee (QAD) on projects across the country, providing U.S. Green Building Council audit calls to justify project certification, field inspections and diagnostic testing. Jayme has attended both California Building Performance Contractors Association (CBPCA) and Building Performance Institute (BPI) training. Jayme has held positions in all phases of construction from carpenter to superintendent of construction on projects of all sizes and scales since 1986. Jayme was mentored by one of the first HERS Raters to be certified by the State of California.

Jayme is also co-founder and owner of Maximum Performance Housing (MPH) since 2001, a Title-24 Home Energy Rating System (HERS) firm acting as a consultant to the construction industry from San Diego to Fresno. Primary functions are Title-24 Testing & Verification and helping builders and contractors navigate the CA Energy Codes. Jayme has been the HERS Rater of record on over 10,000 homes in CA. He also holds a residential and light commercial air balancing certificate from National Comfort Institute. Jayme has held the position of Construction Field Superintendent for CBI, a construction defect litigation contracting firm. Duties included overseeing all aspects of construction and re-construction in all trades and managing more than 100 in house field workers. With over 20 years of experience in construction projects, administrative and field training, Jayme brings a wealth of knowledge to the greenNet Registry team. Jayme will be responsible for rater training, classroom instruction, field training, testing and certification of greenNet HERS Registry Raters.

## **CONFIDENTIAL**

### **Brooke Benton - Quality Assurance and Compliance Manager**

Brooke has 11 years of experience in Quality Assurance and Customer Service in California. Brooke previously worked with Enalasys Corporation on California utility projects, including the 2006 PG&E quality install rebate program. Brooke started working for Enalasys in 2006 in the PG&E quality install rebate program. Brooke oversaw all aspects of the program from training, data entry, billing, customer support and contractor support. In 2009 Brooke took time off to be with her young children and came back to Enalasys in 2013. From 2013 - 2016 Brooke was the Director of the Enalasys Third Party Quality Control Program and has assisted with the Imperial Irrigation District Quality AC Maintenance Program. Her duties include; contractor outreach and support, customer support, scheduling, billing, complaint response, scheduling quality assurance and training. Brooke went through HERS training in December of 2013. Outside of Enalasys, Brooke also volunteered as the treasurer for Imperial Little League for 2 seasons and has been a dance teacher at a local dance studio for the past 8 years.

### **Willis Noble Butts III (Bill) - Programming and Technology Manager**

Bill has 20+ years of experience in HVAC systems, radio communications, programming, infrastructure technology, and diagnostics software. Bill developed radio communications for an HVAC capture hood for home airflow diagnostics, developed software for use by technicians in the field for utility programs at PG&E, SCE, SDG&E, IID, LADWP and Nevada Energy and others. Software developed includes radio communications with distributed databases used in performing refrigerant charge, Duct Test and Seal, Airflow measurement and Fan Watt Draw measurements. All necessary data entry is performed by technicians in the field. Results of the tests are transmitted via Internet to a central database where they can be consolidated and forwarded to the utility. Bill has been a programmer in a multitude of programming languages and frameworks including Visual Basic, Delphi, Terascript among others for front end applications for SQL databases.

In the last three years, Bill was the key programmer working on CEC Title 24 approved registry software and compliance forms for the USERA Providership. He is also responsible for the content of the user interface as well as HERS Rater technical support. Bill works regularly with the GUI for data entry as well as any calculations, and currently provide form registrations for HVAC Alterations. Bill will be responsible for greenNet Registry technology support, systems, maintenance, and software updates.
