Study on Early Business Cases for H2 in Energy Storage & More Broadly Power to H2 Applications (Addendum 2)

This is a study being submitted by CHBC as an Addendum to Comments submitted regarding the June 27 workshop on renewable gas; The Comments refer to it being submitted on the docket, but it turns out the pdf pdf file is too large to upload. Here is a link:

To be clear, Aaother addendum was also separately submitted - a letter to the CEC Chair, which addresses issues outside the scope of the workshop questions.
