Subject: MISSION ROCK ENERGY CENTER (15-AFC-02) STATUS REPORT #12

Staff submits the following status report #12 for the Mission Rock Energy Center.

Preliminary Staff Assessment Status

Staff continues to be fully engaged in the completion of the analysis component of the Mission Rock Energy Center (MREC) proceeding and the production of the Preliminary Staff Assessment. The Air Quality/GHG and Public Health sections are still awaiting the Preliminary Determination of Compliance (PDOC) from the Ventura County Air Pollution Control District (VCAPCD). All remaining sections have been submitted by staff and are currently undergoing final legal and management review. Staff is predicating its work on the assumption that the PDOC will arrive once VCAPCD staff incorporate “necessary revisions with the San Joaquin Valley APCD, the modeling sub-contractor for the project.” This information comes from Kerby E. Zozula, Manager Engineering Division with VCAPCD, who provided Energy Commission staff with the following update for purposes of this status report:

“The Ventura County APCD is reviewing a final draft of the ambient air quality impact analysis and health risk assessment modeling for the Mission Rock Energy Center (MREC). The VCAPCD is currently discussing the necessary revisions with the San Joaquin Valley APCD, the modeling sub-contractor for the project. Once this modeling is approved by Ventura County APCD, it will be incorporated into the draft PDOC for the MREC. San Joaquin Valley APCD is currently finalizing the draft PDOC, but has not yet provided it to the Ventura County APCD for review.”
