Need Measurements

I know you have listed that getting baseline measurements is important for SB-350 measurements "doubling energy efficiency". I did not see many measurements stating what the increase in energy efficiency was for the reference period. Without this, it will be very difficult to have accurate improvement measurements.

What is the plan to provide the baseline measurements for energy efficiency?
When would we expect to see them?

Thanks

Bruce

.

This email is to emphasize the need for these measurements. I looked through a number of documents
