Background

The purpose of this webinar is for the Energy Commission to present to the public the proposals received as a result of the “Invitation to Submit Proposals.”

Energy Commission staff will provide an overview of the proposals submitted for consideration as part of the rulemaking process for the following topics:

Appliance Efficiency Standards:

- Commercial and Industrial Fans and Blowers
- General Service Lamps (Expanded Scope)
- Sprinkler Spray Bodies
- Tub-Spout Diverters
- Irrigation Controllers

Appliance Efficiency Roadmaps:

- Set-Top Boxes
- Low-Power Modes and Power Factor
- Solar Inverters

Energy Commission staff will consider these proposals, along with the data and information received through the Invitation to Participate, as they draft recommendations for the Energy Commission's consideration as part of the rulemaking process.

Any measures will be incorporated into California's Appliance Efficiency Regulations in Title 20 of the California Code of Regulations, sections 1601 – 1609, or into staff-issued white papers that will establish non-regulatory efficiency roadmaps for the identified appliance types.
