- 2. State and justify the length of time the Energy Commission should keep the information or data confidential.

The information should be designated confidential permanently. The information includes confidential settlement communications, which contains confidential business information, including customer information and test results of products.

- 3(a). State the provision(s) of the Public Records Act (Gov. Code, § 6250 et seq.) or other law that allows the Energy Commission to keep the information or data confidential, and explain why the provision(s) apply to that material.

The Public Records Act at Government Code Sections 6254(f) and 6254(k) allow for the exemption of disclosure of records pertaining to the investigation of information by a state agency, and records protected under provisions of the Evidence Code relating to privilege, such as settlement communications.

- 3(b). Discuss the public interest in nondisclosure of the material submitted for a confidential designation. If the material contains trade secrets or its disclosure would otherwise cause loss of a competitive advantage, please state how it would be lost, the value of the information to the applicant and the ease or difficulty with which the information could be legitimately acquired or duplicated by others.

State the degree of aggregation or masking required. If the data cannot be disclosed even if aggregated or masked, explain why.

The information cannot be masked as all the documentation is a part of a settlement communication.

The information for which confidentiality is sought has been shared with counsel for Pilot Automotive, Inc. The information has been disclosed only to upper management within Pilot Automotive, Inc.
