Re: Public Comments on Draft IEPR
Docket # 17-IEPR-01
TN # 221520

Dear Chairman Weisenmiller:

The Alliance for Nuclear Responsibility (A4NR) wishes to make the following comments on the 2017 Draft IEPR:

- A4NR wishes to reinforce our request, and the Commission's support, of a public review process for the 2018 review of PG&E's ongoing spent fuel storage plans;
- A4NR seeks an explanation for PG&E's announced fuel loading and transfer schedules for the 2018, 2020 and 2022, as those campaigns appear to represent a slowdown from the current pace of fuel transfers;
- Correction of statistical errors regarding the output from the former San Onofre Nuclear Generating Station as found on pages 23 and 27 of the Draft IEPR that report the output from the plant as having been 1,200 MW. In fact, the correct output is mentioned on page 338, at 2,200 MW.

A4NR appreciates the opportunity to file these comments and will continue to monitor the IEPR process through its adoption.

Yours truly.

/s/

Rochelle Becker
Executive Director
Alliance for Nuclear Responsibility
