Re: Docket No. 17-HYD-02, Hydrogen Refueling Station Technical Requirements

Dear CEC Administrator –

As leading Industry stakeholders, we appreciate this opportunity to provide a response in support of the next CEC Grant Funding Opportunity (GFO). Enclosed with this letter are consensus recommendations in response to the Hydrogen Refueling Station Technical Requirements Workshop on December 4, 2017.

Adoption of these recommendations are consistent with global efforts to enable:

- Performance requirements to improve customer experience, and support market growth
- Promulgation of industry consensus listing and test standards
- Cost reduction through serial production of fueling equipment

Given the importance to facilitate an expedited pathway to complete the 100 stations, and the impact on business planning, equipment design, and supply chain development, we respectfully request the CEC take the following steps to reach a firm consensus amongst industry stakeholders to:

- 1) Develop a draft GFO document reflecting the attached recommendations for review
- 2) Convene a workshop(s) for industry members to provide comment and clarification of the draft GFO

Thank you for your consideration.

For further information on this proposal, please contact the company representatives listed below.

David P. Edwards, PhD
Director, Hydrogen Energy
Air Liquide

Nitin Natesan
Business Development Manager, H2 Fueling
Linde LLC
