Subject: Solar HERS Exclusion

Removal of the HERS requirement for “Solar” is a HUGE mistake!

We now have Designers and Contractors performing installations in such a way that systems perform at their best.

Without oversight, things will go back to the way they were with the Consumer not getting what they pay for (and the State being shorted on Renewable Energy and Revenue).

“While the cat’s away the mice will play” as the old adage goes!

I don’t see how the elimination of this requirement can be successful.

Respectfully,

Jim Taylor

Owner / HERS Rater
