Commercial Dryers

Making changes to the current commercial dryer regulations will only make doing laundry more expensive for customers. Typically the customers come from lower income backgrounds and this regulation will hurt the people that need the money the most. The commercial dryers and coin laundromats have been working fine for years, why would we fix something that is not broken? Don't change the laws and don't hurt the people financially that use the dryers! Stop over regulating something that does not need regulation. Keep everything the same!
