Marty Turock Comment #2 School Bus Replacement

When the CEC negotiates the final EV Bus procurement contract(s) with the winning bidder(s) of the EV bus solicitation you should see if it would be possible to include a "piggyback clause" that would allow any other School District, COE or Charter Schools across the State to purchase similar buses at the same price and terms. In that manner, even school districts that do not receive any grant money from the SB 110 Bus Replacement Program will at least be able to take advantage of the work that the CEC will have done in conducting the competitive procurement and working through contract terms and conditions. This will save other districts significant time and money in the solicitation and contracting processes, and perhaps expedite their process for taking advantage of CARB's HVIP Program.
