Background

The California Energy Commission proposes to amend California Code of Regulations, Title 20, sections 1601 to 1609 (the Appliance Efficiency Regulations) and take the following actions:

- (1) update provisions to reflect current federal law
- (2) change state-specific requirements

- (3) update the appliance certification procedures to reflect the current use of a new electronic database system
- (4) update the appliance data submittal requirements
- (5) improve the readability of the regulations

This rulemaking will not make changes to the underlying energy and water efficiency standards for any appliance or result in any changes in the estimated energy and water savings from those standards. As part of the formal rulemaking procedure, the Energy Commission is hosting a public meeting to present the proposed regulations to the public and to seek comments from interested parties.
