Docket Number:	18-BSTD-01
Project Title:	Initial Study and Negative Declaration for the 2019 Energy Code
TN #:	223338
Document Title:	Addendum to Initial Study and Negative Declaration; Response to Comments
Description:	N/A
Filer:	Peter Strait
Organization:	California Energy Commission
Submitter Role:	Commission Staff
Submission Date:	5/7/2018 1:06:34 PM
Docketed Date:	5/7/2018

Memorandum

To: 2019 Energy Code Stakeholders Date: April 20, 2018

Telephone: (916) 654-2817

From: Peter Strait, Supervisor
Efficiency Division
California Energy Commission
1516 Ninth Street

Sacramento CA 95814-5512

Subject: Addendum to Initial Study and Negative Declaration; Response to Comments

The public comment period for the Initial Study and Negative Declaration prepared for the proposed 2019 revisions to the Building Energy Efficiency Standards (Energy Code) ended on March 16, 2018. The Energy Commission received one formal comment letter from the California Native Heritage Commission, and received informal feedback from the California Department of Fish and Wildlife. Staff has prepared this Addendum to the Negative Declaration

The comment letter from the Native American Heritage Commission (NAHC) identifies that the checklist included as an Appendix to the Initial Study did not include the Tribal Cultural Resources section added to the CEQA templates in 2016. An updated version of the checklist that includes these fields is included in this Addendum. Staff notes that updates to California's Energy Code do not cause specific building or construction projects to occur (rather, they specify energy efficiency features that must be included when a building is built) and therefore do not cause the disturbance of ground that would create a risk of disturbance to tribal cultural resources; inclusion of the updated checklist is therefore a minor technical correction appropriate for an Addendum.

The comment letter from the NAHC also requested documentation of government-to-government consultation by the lead agency under AB-52. Staff subsequently prepared and sent a letter offering consultation to Native American tribes consistent with AB-52. Staff received one request for government-to-government consultation in response to the letter, which was provided and did not result in additional comments on the Initial Study or the Rulemaking to which it applies. (Staff notes that updates to California's Building Standards Code would normally only apply to building projects regulated by the State of California and would not generally apply to building projects on tribal lands or under tribal jurisdictions.)

No other formal comments were submitted to the Energy Commission on the Initial Study and Proposed Negative Declaration. However, during informal consultation with

the California Department of Fish and Wildlife, Department staff identified two studies¹ relating to interactions of aquatic invertebrates with solar photovoltaic panels that were not referenced within the Initial Study.

The studies both start from the observation that aquatic invertebrates (primarily flying insects with aquatic nymph stages) visually identify water based on the polarization of reflected light. Other substances with smooth, flat surfaces such as asphalt and glass can also polarize reflected light and can attract some species of aquatic invertebrates who will then behave as though the surface was the surface of a body of water.

While the studies do demonstrate that this effect occurs for solar photovoltaic panels possessing a glass top layer, the studies were limited to examining panels that were placed flat and at ground level adjacent to asphalt roads where the invertebrates were already congregating. That is, the conditions of the studies were not representative of the expected conditions under which the panels specified in the Energy Code would be installed, which would include both elevating and angling the panels consistent with mounting atop a residential roof. Staff did not find evidence that elevated, angled panels that are removed from normally attractive features or areas where the invertebrates are already congregating would have the observed effect, as these changes in condition both remove the panels from areas with aquatic invertebrates and introduce a visual difference (angling) that would make them less similar in appearance to the (horizontal and ground level) surface of a calm body of water.

The Initial Study does not include discussion of aquatic invertebrates as staff did not find evidence that an impact would be created by the prescriptive requirement to install solar panels on the roofs of newly constructed residential buildings. That said, this explanation and citation to the two studies is included in this Addendum for the completeness of the record.

¹ Horvath et al., *Reducing the Maladaptive Attractiveness of Solar Panels to Polarotactic Insects*, Conservation Biology, Vol. 24, No. 6 (December 2010), pp. 1644-1653; Szaz et al., *Polarized Light Pollution of Matte Solar Panels*, J Insect Conserv (2016) 20:663–675

Attachment 1: CEQA Environmental Checklist

PROJECT DESCRIPTION AND BACKGROUND

Project Title:	2019 Energy Efficiency Standards for Residential and Nonresidential Buildings
Lead agency name and address:	California Energy Commission 1516 Ninth Street
	Sacramento, California 95814
Contact person and phone number:	Peter Strait, Supervisor, Efficiency Division, (916) 654-2817
Project Location:	Statewide
Project sponsor's name and address:	NA
General plan description:	NA
Zoning:	NA
Description of project: (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off-site features necessary for its implementation.)	The Energy Commission is proposing changes to the energy efficiency standards for residential and nonresidential buildings as mandated by the Warren-Alquist Act. A summarized list of the proposed changes is included in the executive summary of this initial study.
Surrounding land uses and setting; briefly describe the project's surroundings:	None; the project is an update to regulation, and does not cause land to be developed.
Other public agencies whose approval is required (e.g. permits, financial approval, or participation agreements):	The California Building Standards Commission must approve the changes.
Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, has consultation begun?	Consultation was requested and provided. No additional comments on the Initial Study were submitted following consultation.
Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21083.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3(c) contains provisions specific to confidentiality.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project. Please see the checklist beginning on page 3 for additional information.

	Aesthetics		Agriculture and Forestry		Air Quality	
	Biological Resources		Cultural Resources		Geology/Soils	
	Greenhouse Gas		Hazards and Hazardous		Hydrology/Water Quality	
	Emissions		Materials			
Щ	Land Use/Planning		Mineral Resources	Щ	Noise	
Щ	Population/Housing		Public Services		Recreation	
	Transportation/Traffic		Tribal Cultural Resources		Utilities/Service Systems	
	Mandatory Findings of Significance					
On t	TERMINATION: he basis of this initial evalu					
	a NEGATIVE DECLARA	TIÓN				
	there will not be a signific	ant ef	ed project could have a signific fect in this case because revi- oject proponent. A MITIGATE	sions i	in the project have been	
			MAY have a significant effect EPORT is required.	on th	e environment, and an	
I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.						
I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

CEQA Environmental Checklist

This checklist identifies physical, biological, social and economic factors that might be affected by the proposed project. In many cases, background studies performed in connection with the projects indicate no impacts. A NO IMPACT answer in the last column reflects this determination. Where there is a need for clarifying discussion, the discussion is included either following the applicable section of the checklist or is within the body of the environmental document itself. The words "significant" and "significance" used throughout the following checklist are related to CEQA, not NEPA, impacts. The questions in this form are intended to encourage the thoughtful assessment of impacts and do not represent thresholds of significance.

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact		
I. AESTHETICS: Would the project:						
a) Have a substantial adverse effect on a scenic vista?				\boxtimes		
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?						
c) Substantially degrade the existing visual character or quality of the site and its surroundings?				\boxtimes		
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?				\boxtimes		
Commission staff has determined that the proposed 2019 Standards will have no impacts on aesthetics.						
II. AGRICULTURE AND FOREST RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment Project; and the forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:						
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?						
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				\boxtimes		

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				
d) Result in the loss of forest land or conversion of forest land to non-forest use?				\boxtimes
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				
Commission staff has determined that the proposed 2019 Standar	rds will have no	impacts on ag	ricultural resourd	ces.
III. AIR QUALITY: Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?				\boxtimes
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?				\boxtimes
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non- attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?				
d) Expose sensitive receptors to substantial pollutant concentrations?				\boxtimes
e) Create objectionable odors affecting a substantial number of people?				\boxtimes
The building standards may result in reduced power plant operation reduce natural gas consumption and may therefore result in reduce experience a net environmental benefit and net reductions of emis Commission staff has therefore determined that the proposed 201	ed emissions. ssions resulting	Staff expects t from the propo	hat overall, Calif osed 2019 Stand	ornia will ards.
IV. BIOLOGICAL RESOURCES: Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact		
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?						
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?						
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				\boxtimes		
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?						
Commission staff has determined that the proposed 2019 Standards will have no impacts on biological resources.						
V. CULTURAL RESOURCES: Would the project:						
a) Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?				\boxtimes		
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?						
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?						
d) Disturb any human remains, including those interred outside of dedicated cemeteries?				\boxtimes		
Commission staff has determined that the proposed 2019 Standar	rds will have no	impacts on cu	ltural resources.			
VI. GEOLOGY AND SOILS: Would the project:						
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				\boxtimes		
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42?						
ii) Strong seismic ground shaking?				\boxtimes		
iii) Seismic-related ground failure, including liquefaction?				\boxtimes		

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
iv) Landslides?				\boxtimes
b) Result in substantial soil erosion or the loss of topsoil?				\boxtimes
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?				
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				
Commission staff has determined that the proposed 2019 Standar	ds will have no	impacts on ge	ology and soils.	
VII. GREENHOUSE GAS EMISSIONS: Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?				\boxtimes
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?				\boxtimes
The building standards may result in reduced power plant operatic reduce natural gas consumption and may therefore result in reduce experience a net environmental benefit and net reductions of emis Commission staff has therefore determined that the proposed 201 gas emissions levels, and that they are consistent with greenhous	ced emissions. ssions resulting 9 Standards wi	Staff expects t from the propo Il have no adve	hat overall, Califosed 2019 Standerse impacts gre	ornia will ards.
VIII. HAZARDS AND HAZARDOUS MATERIALS: Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?				\boxtimes
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?				
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?				
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				
Commission staff deems that the proposed 2019 Standards will ha hazardous materials.	ave no potentia	lly significant e	ffects on hazard	s and
IX. HYDROLOGY AND WATER QUALITY: Would the project:				
a) Violate any water quality standards or waste discharge requirements?				
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?				
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?				
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?				
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?				
f) Otherwise substantially degrade water quality?				\boxtimes

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
g) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				
h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?				\boxtimes
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				
j) Inundation by seiche, tsunami, or mudflow				\boxtimes
Commission staff has determined that the proposed 2019 Standar have no impacts on hydrology and water quality.	rds may reduce	the amount of	water used and	thus will
X. LAND USE AND PLANNING: Would the project:				
a) Physically divide an established community?				\boxtimes
b)Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?				\boxtimes
Commission staff has determined that the proposed 2019 Standar	rds will have no	impacts on lar	nd use and planr	ning.
XI. MINERAL RESOURCES: Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				
Commission staff has determined that the proposed 2019 Standar resources.	rds will have les	s than significa	ant impacts on m	nineral
XII. NOISE: Would the project result in:				
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?				\boxtimes
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?				\boxtimes

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				\boxtimes
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?				\boxtimes
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?				\boxtimes
Commission staff has determined that the proposed 2019 Standar	rds will have ins	significant impa	cts on noise.	
XIII. POPULATION AND HOUSING: Would the project:				
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				\boxtimes
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				\boxtimes
Commission staff has determined that the proposed 2019 Standar	rds will have no	impacts on po	pulation and hou	ısing.
XIV. PUBLIC SERVICES:				
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?				\boxtimes
Police protection?				\boxtimes
Schools?				\boxtimes
Parks?				\boxtimes

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact			
Other public facilities?				\boxtimes			
Commission staff has determined that the proposed 2019 Standards will have no impacts on public services.							
XV. RECREATION:							
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?							
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?							
Commission staff has determined that the proposed 2019 Standar	rds will have no	impacts on red	creation.				
XVI. TRANSPORTATION/TRAFFIC: Would the project:							
a) Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?							
b) Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?							
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?				\boxtimes			
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?							
e) Result in inadequate emergency access?				\boxtimes			
f) Conflict with adopted policies, plans or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?				\boxtimes			
Commission staff has determined that the proposed 2019 Standar	rds will have no	impacts on tra	nsportation and	traffic.			
XVII. TRIBAL CULTURAL RESOURCES: Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:							

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact		
a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or						
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.						
Commission staff has determined that the proposed 2019 Standar	rds will have no	impacts on trib	oal cultural resou	irces.		
XVIII. UTILITIES AND SERVICE SYSTEMS: Would the project:						
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?						
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?						
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?						
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?				\boxtimes		
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?						
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				\boxtimes		
g) Comply with federal, state, and local statutes and regulations related to solid waste?				\boxtimes		
Commission staff has determined that the proposed 2019 Standards will have no impacts on utilities and service systems.						

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
XIX. MANDATORY FINDINGS OF SIGNIFICANCE				
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				\boxtimes
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?				
Improvements in the energy efficiency of residential and nonresidential buildings will have less than significant impacts to the concerns listed in this matrix. The 2019 Building Standards may result in <i>reduced</i> power plant operation and <i>reduced</i> natural gas consumption in California and the Western States with associated potential reductions in emissions. Staff has considered the effects on materials use and other issues and deemed them insignificant.
