## **SkyCentrics Comments Regarding Proposed Changes to the Building Energy Efficiency Standards - Section 110.12(a)2**

SkyCentrics supports the comments by Lutron (TN# 223309) and NEMA (TN#223332) on Section 110.12(a)2 regarding the over-specific nature of the proposed language.

SkyCentrics believes that this unfairly restricts device manufacturers from adopting communications methods such as Bluetooth Low Energy, AMI or Lora which may offer better performance or cost in different situations.

SkyCentrics proposes that the Commission consider adding language that allows for the use of any open communication standard.
