Re: Pacific Gas and Electric Company Comments on 2019 Title 24, Part 6, Building Energy Efficiency Standards Rulemaking

PG&E is a strong supporter of codes and standards as a vital tool in helping California achieve its clean energy goals. The California Energy Commission's work on residential building standards in this Code cycle are an important step to achieving California's Zero Net Energy goals. These cost-effective measures will help reduce home energy usage over the lifetime of the home and reduce greenhouse gas emissions, and are essential to achieving California's energy efficiency and carbon-reduction goals. The proposed building standards also mark a shift in lighting sources to LEDs, which are expected to garner considerable savings for Californians over the next Code cycle.

PG&E supports adoption of the 2019 Building Codes and Standards and looks forward to working collaboratively with parties on the next cycle of Title 24 building efficiency standards.

Sincerely,

/s/

Valerie J. Winn
