Dear Robert B. Weisenmiller, Ph.D.,

14 May 2018

I am writing to convey my support for the recent mandate passed for solar installation on new homes beginning in 2020. It is refreshing to see California lead the way in such a bold move to further our initiative for reducing the state's greenhouse gas emissions. Despite the critics for the mandate with regard to addition costs, the benefits must be reaffirmed to communicate that we all will pay a price one way or another to reverse or reduce these pollutants in our great State. My hope is to continue reading on lasting and advanced successes from your Commission such as this. You have my admiration and full support.

Best Regards,

Laszlo Zoltan, BSEE
