aliso canyon gas storage should shut down

the aliso canyon storage is really dangerous for the porter ranch. it still leaks and affect many people's health in porter ranch. air quality is more important than efficient of gas storing-ability.

we can't replace our life with the efficiency. it's like time bomb whoever doesn't want to put in their backyard

please shutdown all down and find alternative solution to store the gas which doesn't have any health affect to people living in the great socal.
