Bad Idea

I was the CEO of the Industry Manufacturers Council (Chamber of Commerce for the City of Industry) for 19 years. The city has been incorporated for 60 plus years. Very few residents (400), but a large number of major companies, many in food preparation. The possibility of going total electric, not only would be a financial burden for the majority of home owners in the state of California, but in my opinion would add to the exodus of companies leaving California. Not a good idea.
