## **I SUPPORT this will**

As a California architect with many clients deeply committed to building in a way that reverses the effects of construction on climate change, I urge you to support this bill. I work on education projects and public serving projects: libraries, schools, museums, parks and community buildings.

Not only does the bill make sense economically, it will reduce ozone air pollution—by the way, most of California is NOT meeting EPA air pollution standards!

All electric is also safer as it eliminates sources of carbon monoxide poisoning found inside our buildings and homes and, perhaps most importantly, it is required to meet our climate goals.

Please, California, continue to lead the way. Our world and humanity depend on it!

Jennifer K Devlin-Herbert, FAIA
