We Must Decarbonize Buildings

California now burns more gas in our buildings than in our power plants. We have to transition to electricity and renewable energy to reach CA climate goals. But we must decarbonize buildings or face inhumane conditions, rising sea levels in 100 years, drastic droughts in California, massive migration from Mexico from sweltering heat. We must decarbonize buildings. Stop the oil and gas industry and their lobbyists from ruining the future for our grandchildren. The oil and gas industry cares only about making major profits. Do not give in to them. For the sake of our future, we must stop their selfish behavior.
