**Project Location:** City of Eureka, in Humboldt County, California.

**Project Description:** Humboldt Bay Generating Station project is a 163-megawatt facility certified by the California Energy Commission in its Final Decision on September 24, 2008, that began commercial operation in 2010.

**Modification Description:**

- Increase in the pilot heat limit from 0.8 million British thermal units per hour to 2.0 million British thermal units per hour;
- Decrease the PM10 emission rate from 10.8 lb/hour to 5.5 lb/hour; and
- Reduce diesel source testing frequency from a 3-year testing cycle at near full load to a 5-year testing cycle at one of three load points (~50 percent load, ~75 percent load, and ~100 percent load) with diesel toxic air contaminants (TAC) emissions testing reduced from every 10 years to every 15 years at 100 percent load (while retaining the initial 10-year TAC source testing requirement).
