## **Docket 18-MISC-03 REAP Draft Guidelines Comments**

California Energy Commission,

I want to express our strong support for the proposed REAP Program in California. We work with many farmers who would benefit by making renewable energy projects feasible with this type of support. Such support will add to farmers'™ bottom lines by reducing a key expense of running their businesses; energy.

We have a couple of questions we would like to submit into this comment period.

First, we would like to verify that milk processing plants qualify for this program.

Second, would dairy community solar projects qualify for funding under this program?

Thanks for your attention. As stated, we strongly support the creation of this program.

Bill Jordan
