Jumpstarting building electrification

California must move away from methane and transition toward zero-emission homes and businesses. This will improve air quality and safety in our communities.

I strongly urge the Commission to prioritize building decarbonization and identify more strategies that will speed the goal of electrification.

It's clear that electrifying over 13 million homes and buildings across the state will take all hands on deck. The IEPR should show leadership toward successful transition toward zero-emission buildings.

Thanks for your help on shifting California to a clean energy future.
