## **Jumpstarting building electrification**

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification. Let's move away from destructive oil and gas and into clean energy sources. California should move away from methane and transition toward zero-emission homes and businesses which will improve air quality and safety in our communities.

Electrifying more than thirteen million homes and buildings across California means we must all work together towards this goal. I hope the IEPR will do their part towards a successful transition to zero-emission buildings.
