Docket Number: 18-IEPR-09

Jumpstarting Building Electrification

California must move away from methane and transition towards zero-emission homes and businesses. This will improve air quality and safety in our communities.

I urge the commission to prioritize building decarbonization and identify more strategies that will jump start electrification.

It's clear that electrifying over 13 million homes across the state will take all hands on deck. The IEPR should help prompt a successful transition toward zero-emission buildings.
