## **Clean, renewable energy**

California should be using clean, renewable energy, not fossil fuel-based energy. Leave natural gas and other fossil fuels in the ground where Mother Nature sequestered it. Ma Nature knew that too much carbon in our atmosphere was not a good thing. And mankind is upsetting the natural balance by burning HUGE amounts of fossil fuels in a relatively short period of time. It should not be a surprise that Ma Nature is warning mankind with extreme weather events, drought, and growing pestilence that we are headed toward our own undoing. Please listen to Ma Nature and cause the switch over to clean, renewable energy. We have the technology to do this and converting now will not be as painful as waiting too long and suffering the inevitable consequences.
