Jumpstarting building electrification

To improve air quality, health & safety in our communities, California must move away from methane and transition toward zero-emission homes and businesses.

I'm writing to urge the Commission to prioritize building decarbonization and to identify more strategies like this that will jumpstart electrification.

It's clear that electrifying over 13 million homes and buildings across the state will take all hands on deck. The IEPR should begin a successful transition toward zero-emission buildings.

Thanks for your consideration.
