Jumpstarting building electrification

I am a California resident who is very concerned with our present climate situation and the lack of concrete efforts being made to address it.

Gas is polluting and it's dangerous. We need to get it out of our energy system, and especially out of our homes and buildings.

Please help us in an attempt to mitigate or reverse our climate nightmare.

We NEED alternative energy sources.

California must move away from methane and transition toward zero-emission homes and businesses. This will improve air quality and safety in our communities.

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.

It's clear that electrifying over 13 million homes and buildings across the state will take all hands on deck. The IEPR should help prompt a successful transition toward zero-emission buildings.

Thank you for your attention to this matter,
Beth Goode
