**no more gas--its time to move to clean energy!**

Gas is polluting and it's dangerous. We need to get it out of our energy system, and especially out of our homes and buildings. California cannot afford another San Bruno or Aliso Canyon disaster. The transition off gas to clean zero-emission electric buildings is essential not just for the climate, but for the safety and health of our communities.

I strongly support clean energy buildings! I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification!
