"Jumpstarting building electrification"

Gas is polluting and it's dangerous. We need to get it out of our energy system, and especially out of our homes and buildings.

California cannot afford another San Bruno or Aliso Canyon disaster. The transition off gas to clean electric buildings is essential not just for the climate, but for the safety and health of our communities.

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.

The IEPR should help prompt a successful transition toward zero-emission buildings.
