## **Building electrification**

Please move California from methane to electrification of homes and businesses, and eventually to zero-emission homes and businesses. This is important for the safety of our communities and the health of our citizens.Â

Please prioritize building decarbonization and identify more strategies that will jumpstart electrification.Â

Of course transitioning 13 million homes and buildings across the state to all electricity is a major undertaking. The IEPR should help prompt a successful transition toward zero-emission buildings.

Thank you for your attention.
