## **Move away from gas and to clean electric energy**

California must move away from methane and transition toward zero-emission homes and businesses. This will improve air quality and safety in our communities.

Extracting and storing methane endangers our water and air. The transition to clean energy is already under way and needs to move even faster.

Please identify and support more ways to move over 13 million homes and buildings across California from gas to electricity, cleanly generated. It is a huge task that needs all of us.

The IEPR should help prompt a successful transition toward zero-emission buildings.â€
