## **Cleaner energy**

As a parent , the main priority in my life is assuring the future for my daughter. A future with plastic and chemically polluted water, chemically polluted air, and chemically polluted and biologically altered food, is a dead end future. Anything that can be done to curtail the toxic influence of the energy sector, should be done. Solar, wind, and water power exist without its using resources the way we've have been for the last 150 years. Its time to evolve, and put people before corporations.
