Support Clean Energy such as Solar

Gas is polluting and it's dangerous. We need to get it out of our energy system, and especially out of our homes and buildings.

California cannot afford another San Bruno or Aliso Canyon disaster. The transition off gas to clean electric buildings is essential not just for the climate, but for the safety and health of our communities.

The gas industry doesn't want Californians to choose clean energy alternatives. They're pushing back on the IEPR chapter, and claiming that Californians want gas instead of clean energy in their homes and businesses.
